Brand design

BRAND DESIGN

00

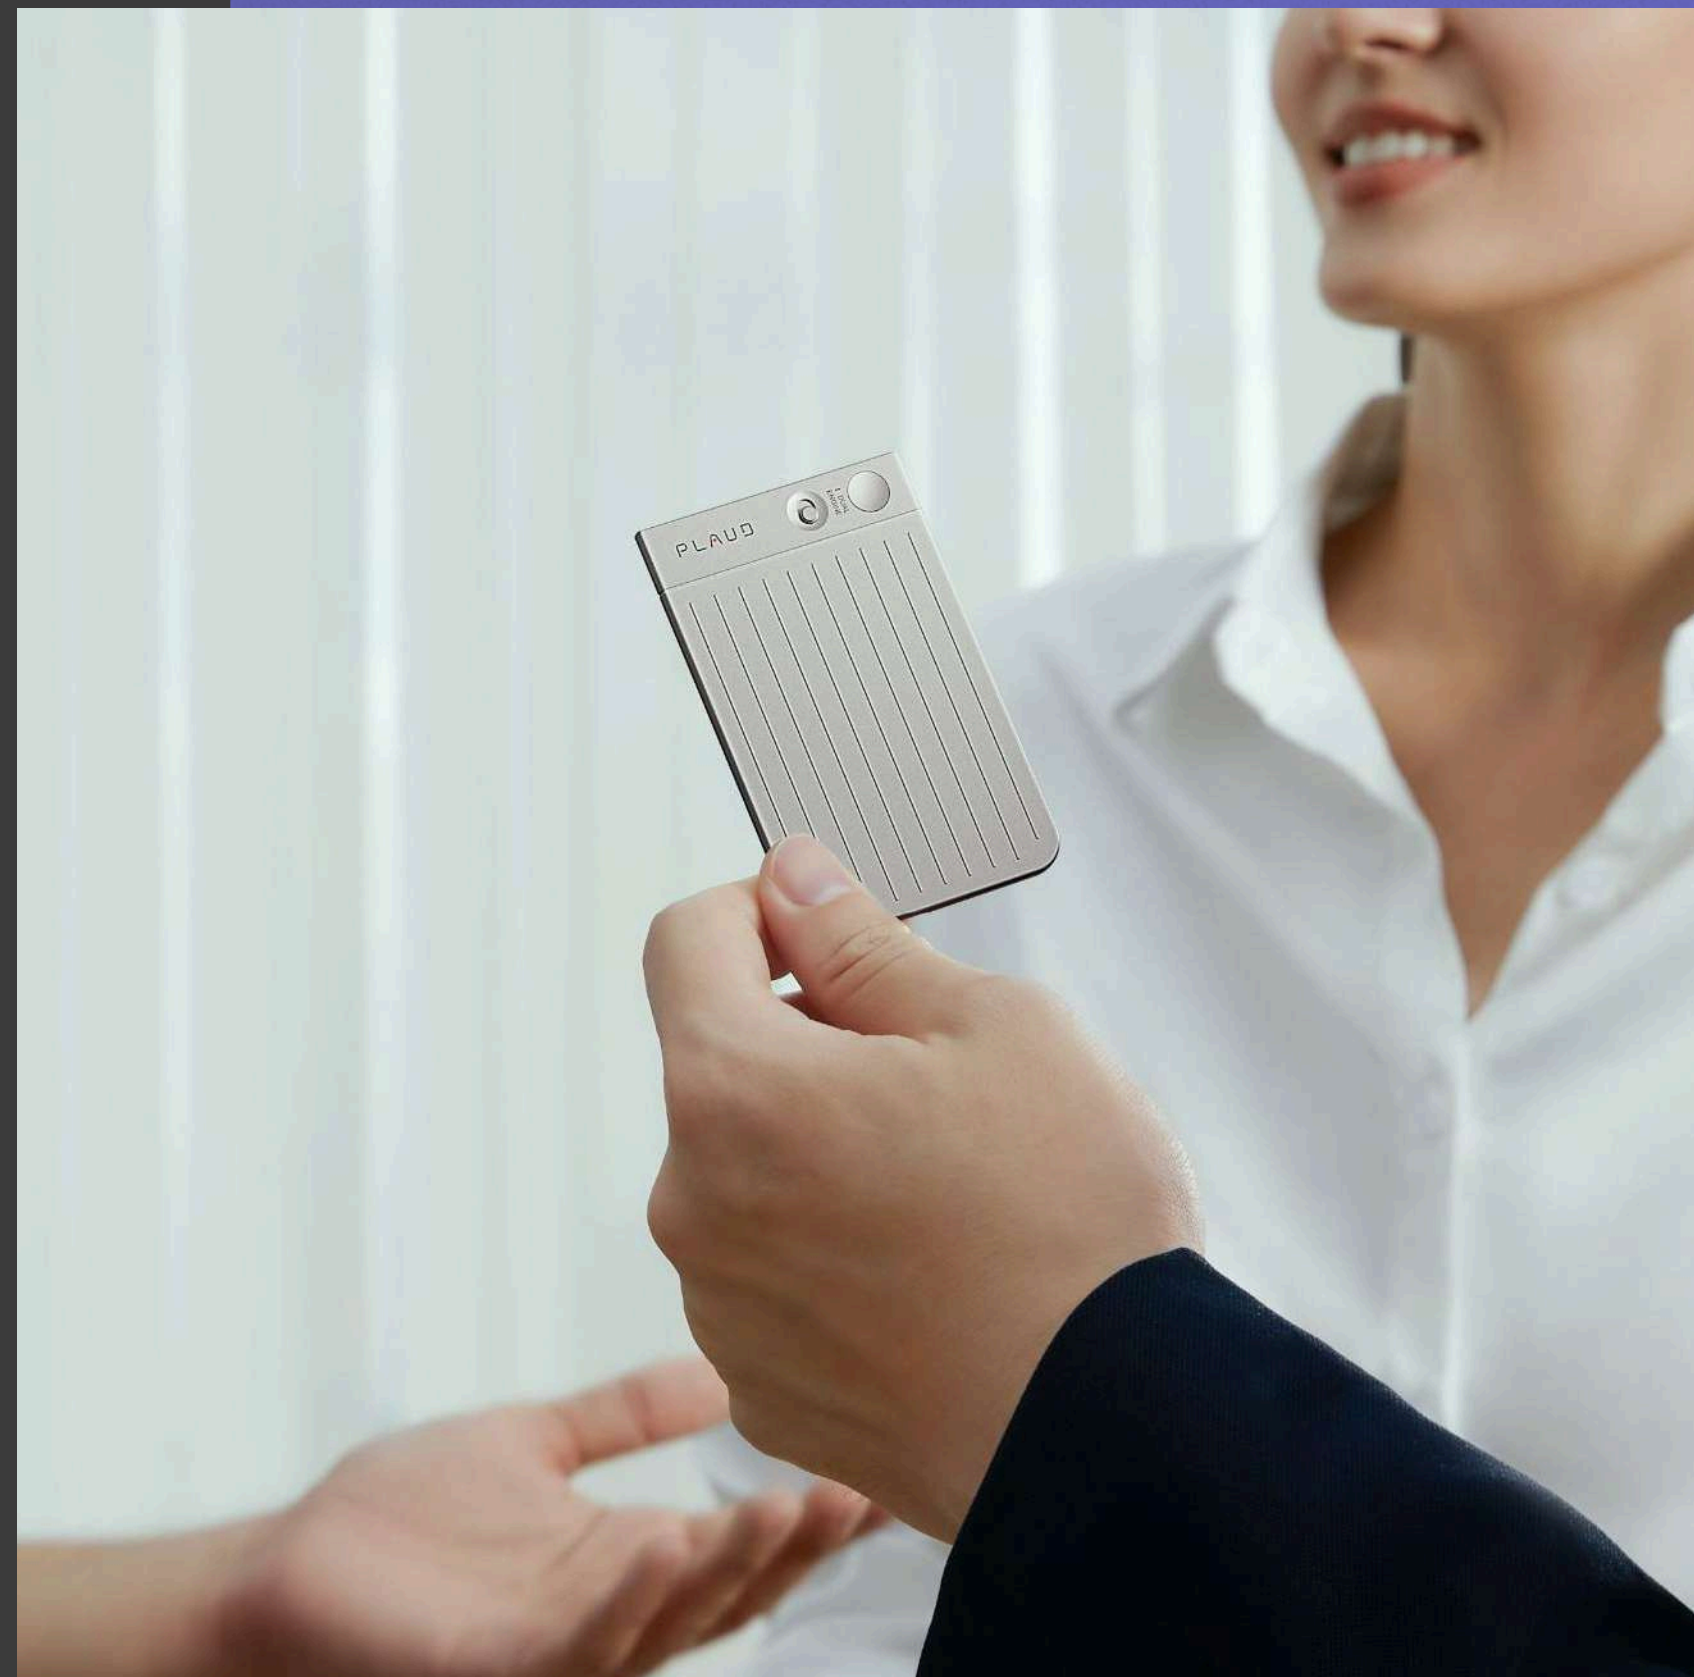

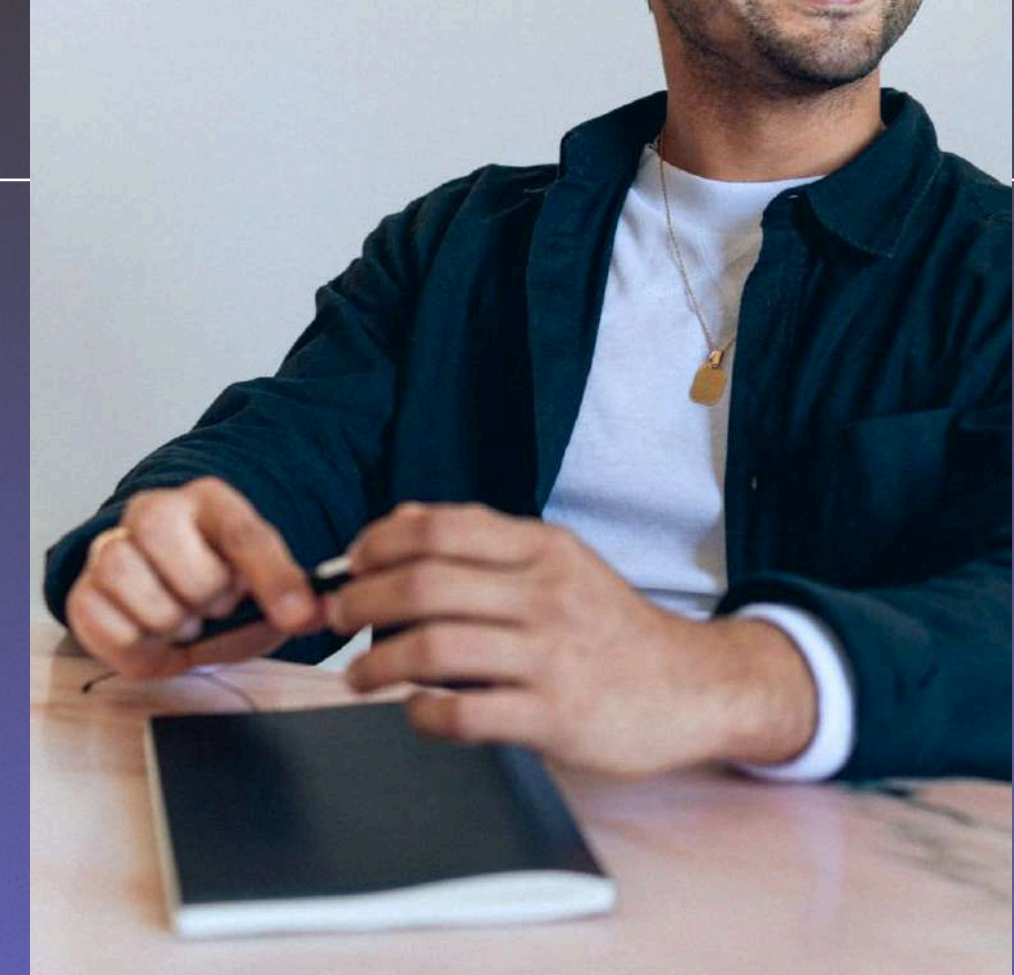

Creative concept

Our creative concept is
based around the idea of

Amplify human intelligence.

Using this concept, we show how
we help people achieve more.

This core idea shapes everything
we do and is the backbone of the
brand identity.

BRAND DESIGN

01

Logo

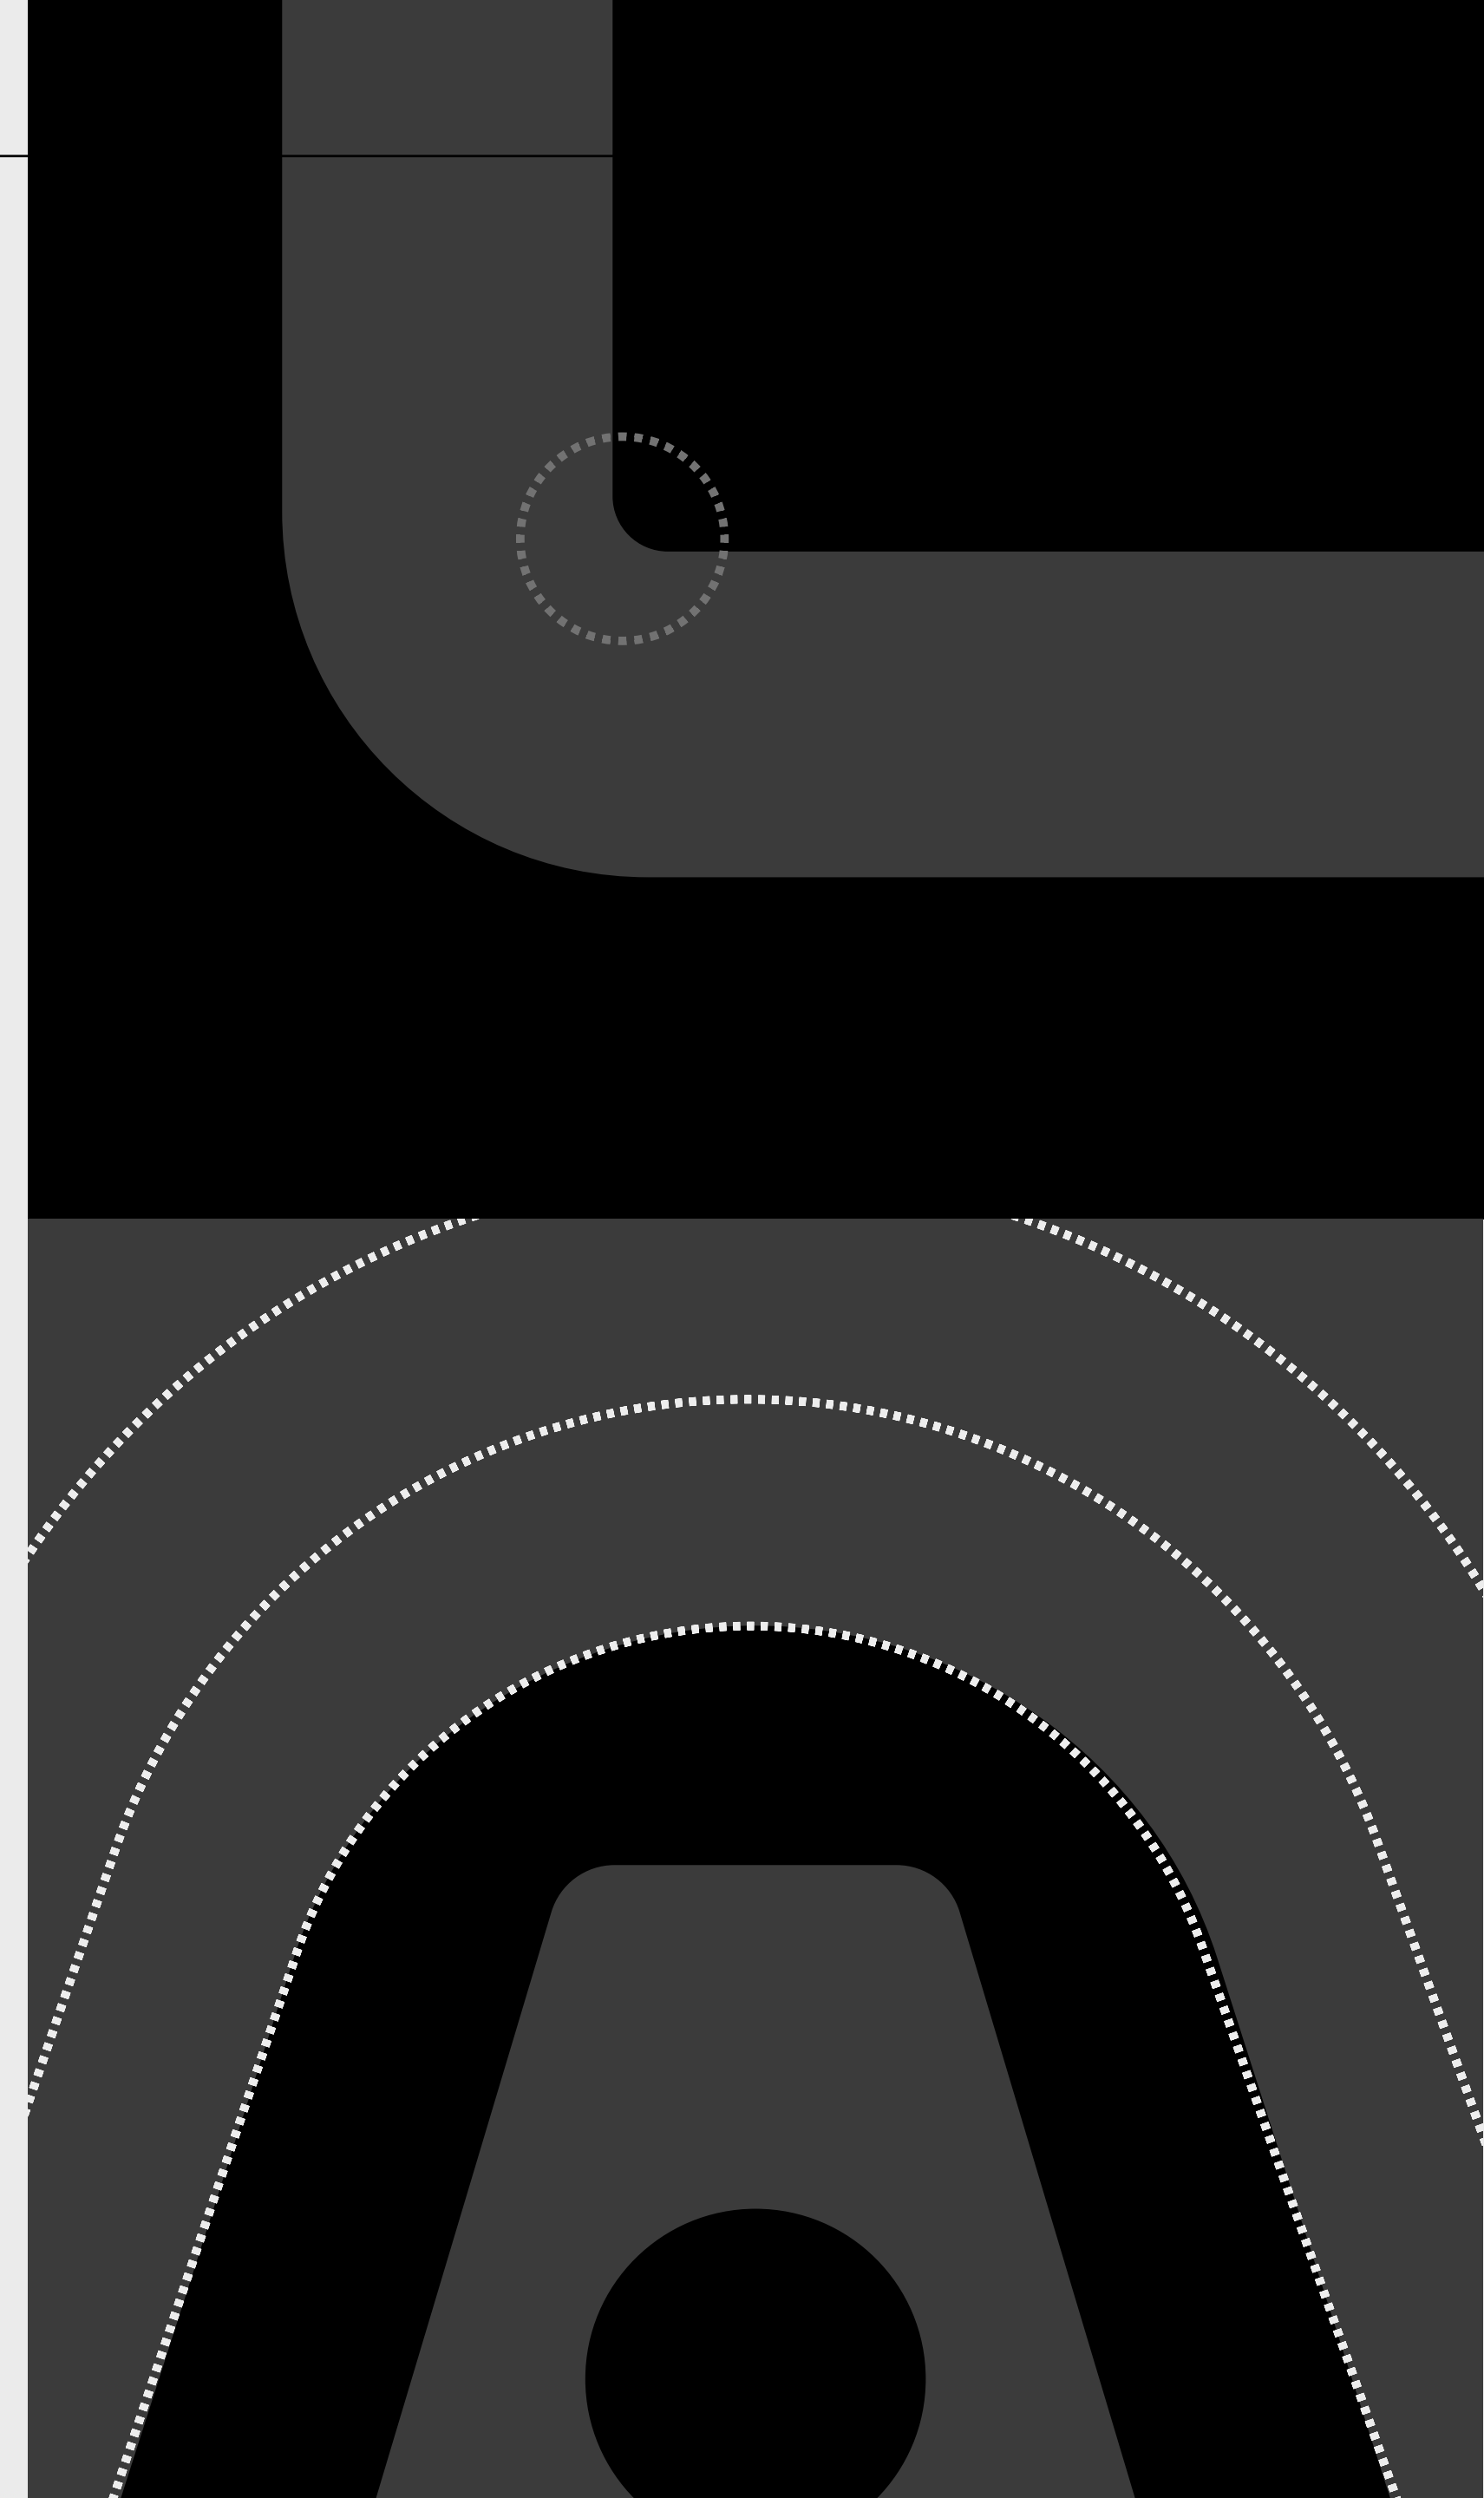

Logo story & name

Our name comes from the heart of the word ‘applaud’ — with and emphasis on ‘aud’ — Latin for ‘to hear’.

Building on the brand equity of our original brandmark, this evolved logo is confident and proud.

The central dot talks about Plaud’s value of precision, while the A represents amplification.

PLAUD

Sub-brands

For simplicity we type out sub-brands rather than locking them up with our Logo.

Sub-brands are created by setting Plaud and the sub-brand in Jokker Regular, with a -2% tracking.

Writing Plaud

When writing Plaud, we use title case so the brand reads as a name.

Plaud
amplifies
human
intelligence.

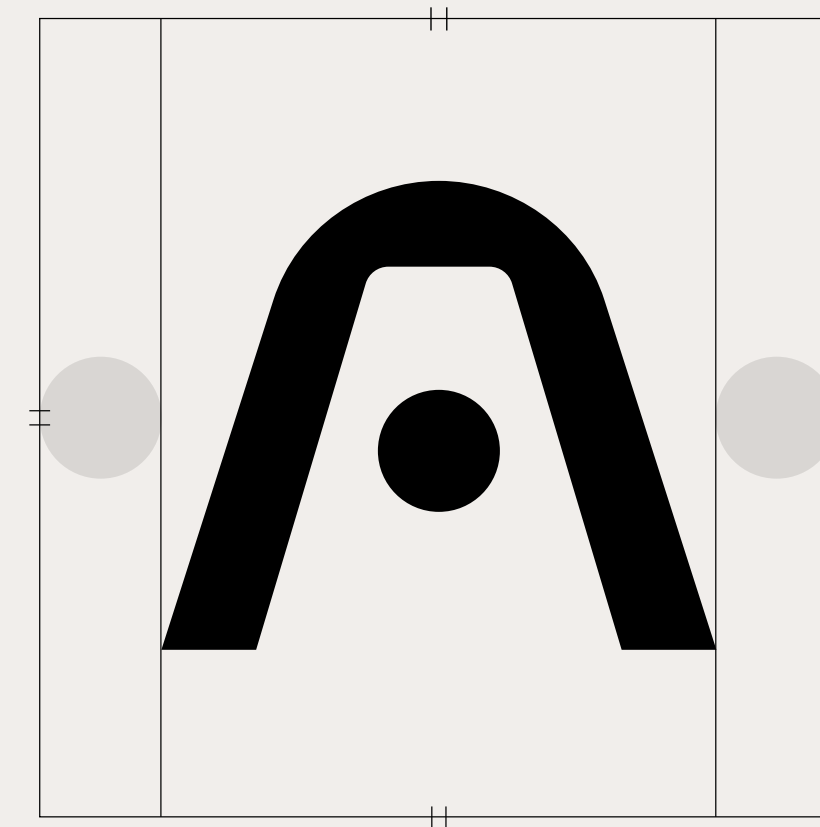

Logo and Icon

Logo

Our Logo is our most recognized asset. It is designed to work at large as well as smaller sizes. It is only used in Black or White.

Minimum height: 15px/ 1,5 mm

Icon

Our Icon is the shorthand of our Logo, and should be used where there is no space for the full logo — for example, as an avatar or app icon.

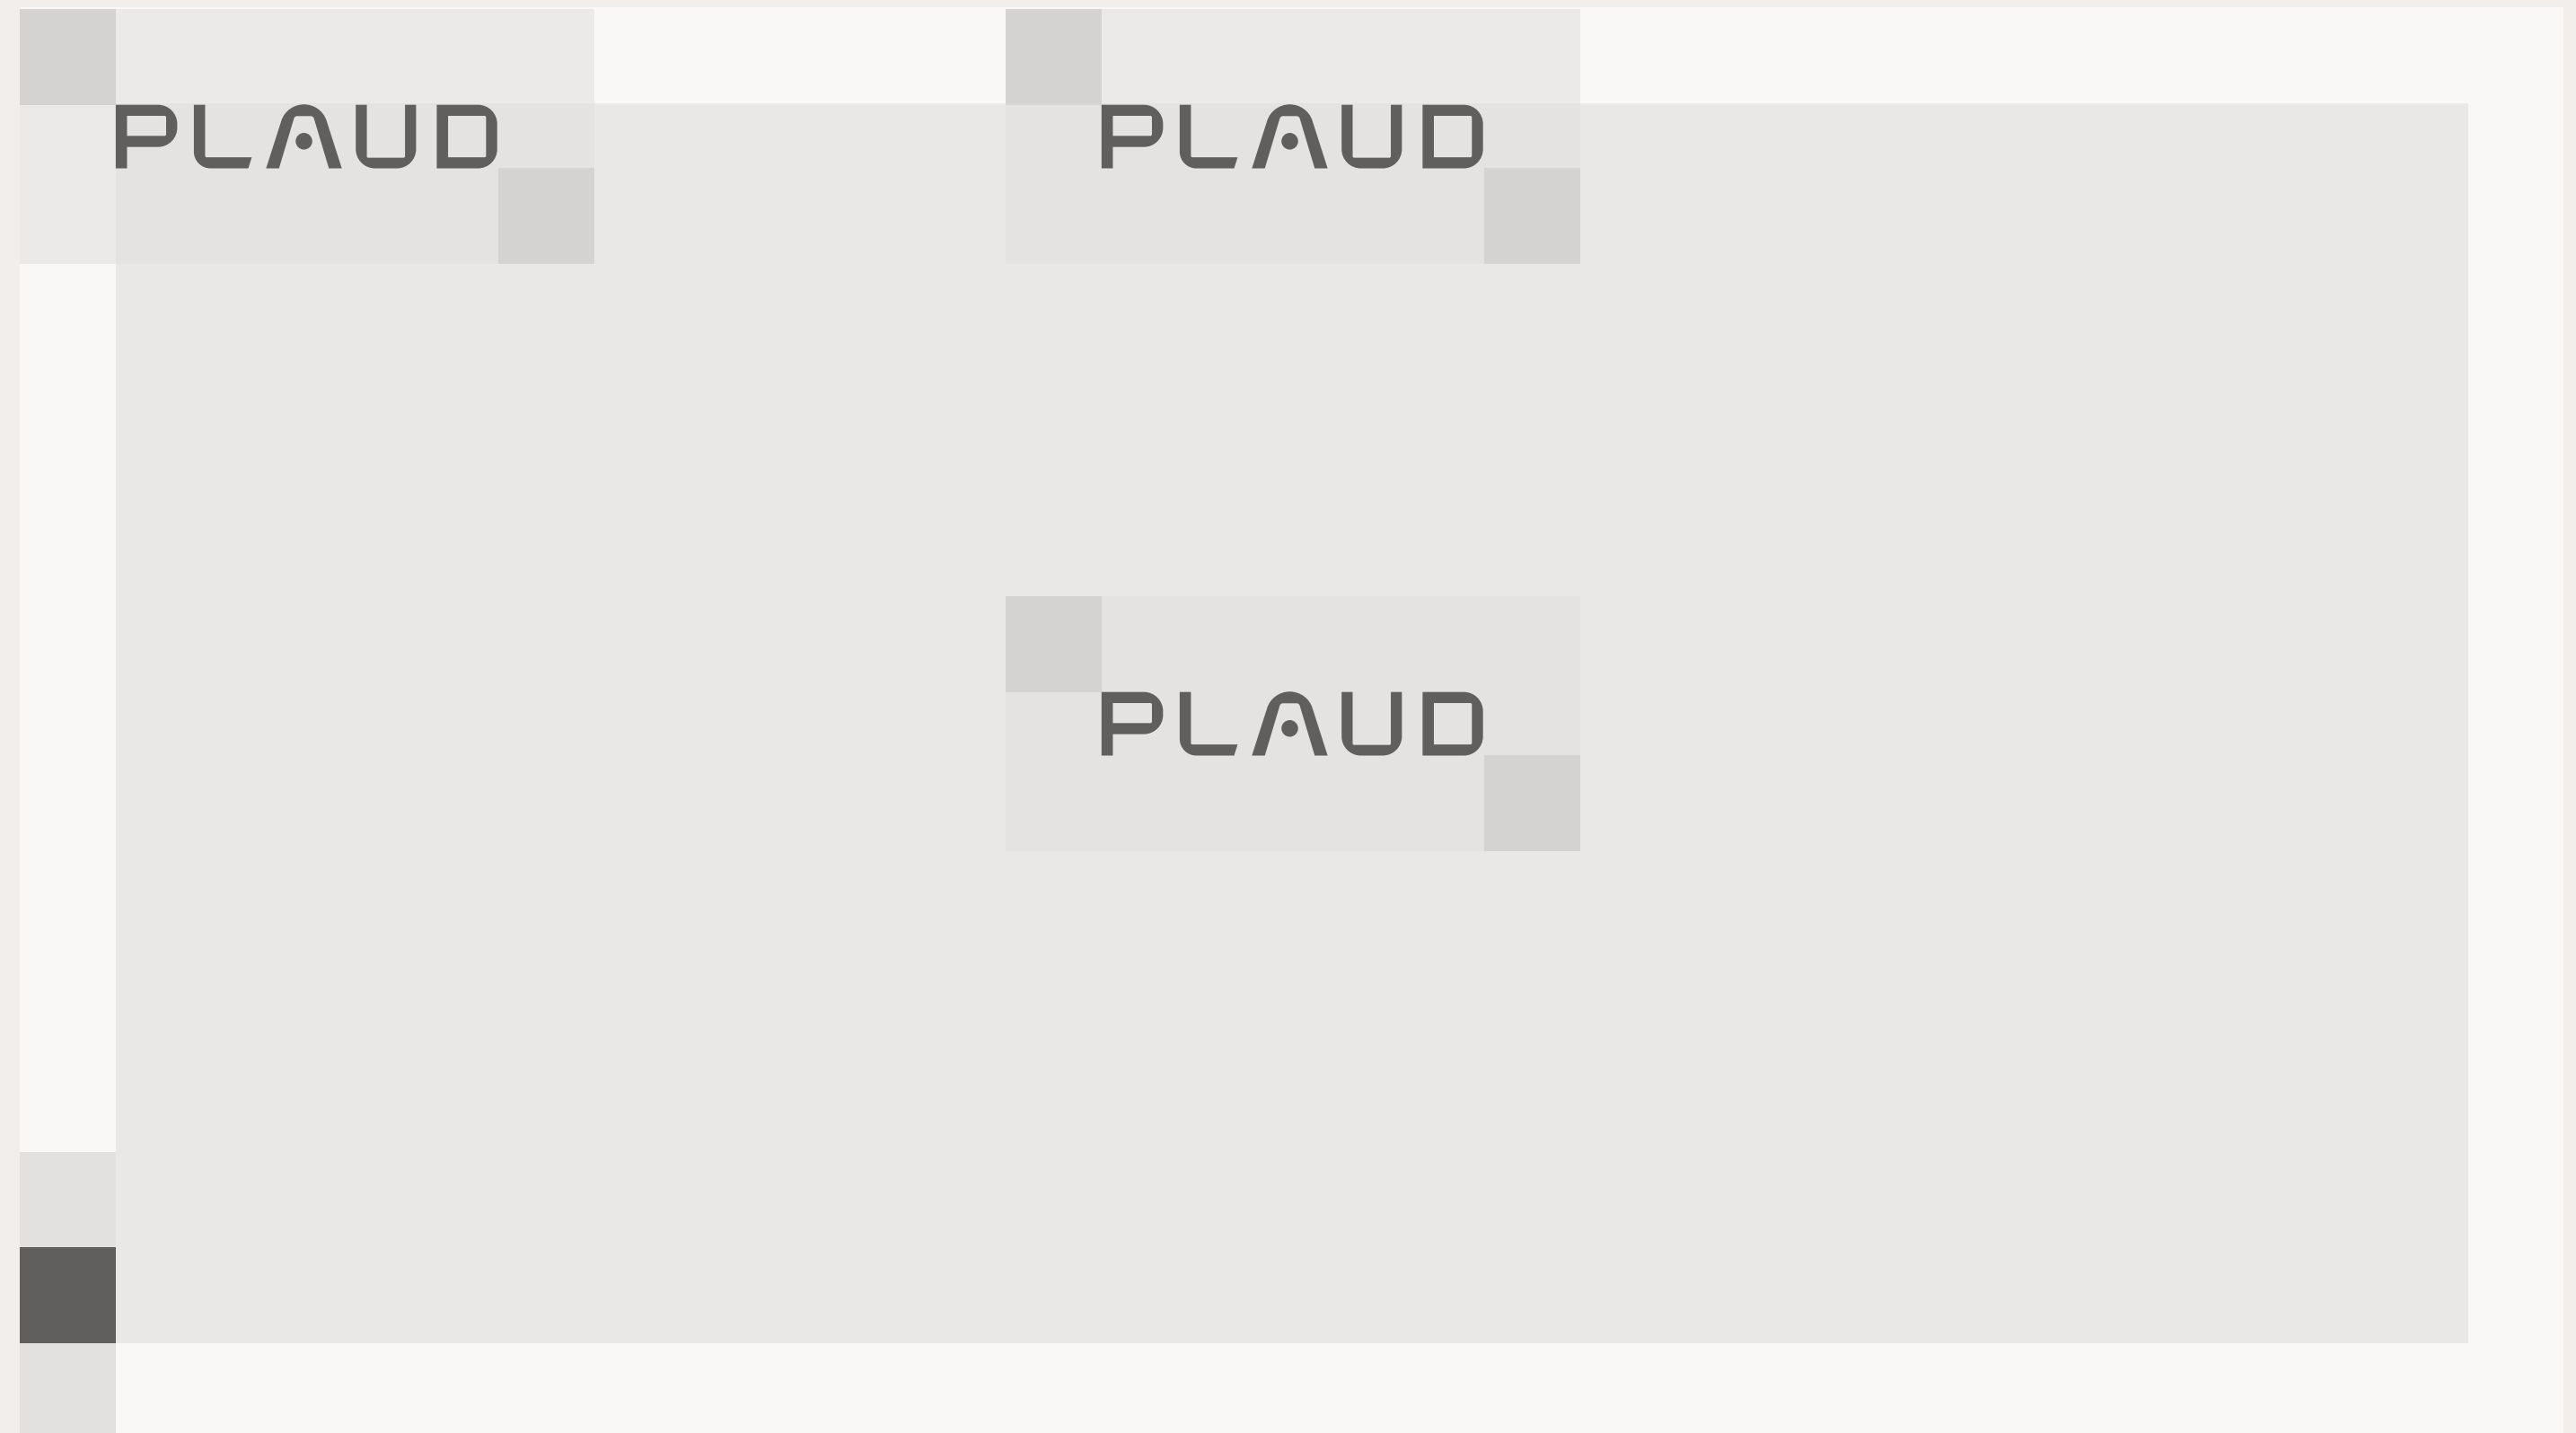

Minimum height: 15px/ 1,5 mm

Logo and Icon

Logo layout suggestions

We recommend centering or left-aligning the logo, but the primary consideration, however, is its aesthetic appeal within the overall visual design. Therefore, as long as the logo adheres to the safe area guidelines, placing it anywhere within the grid area is acceptable.

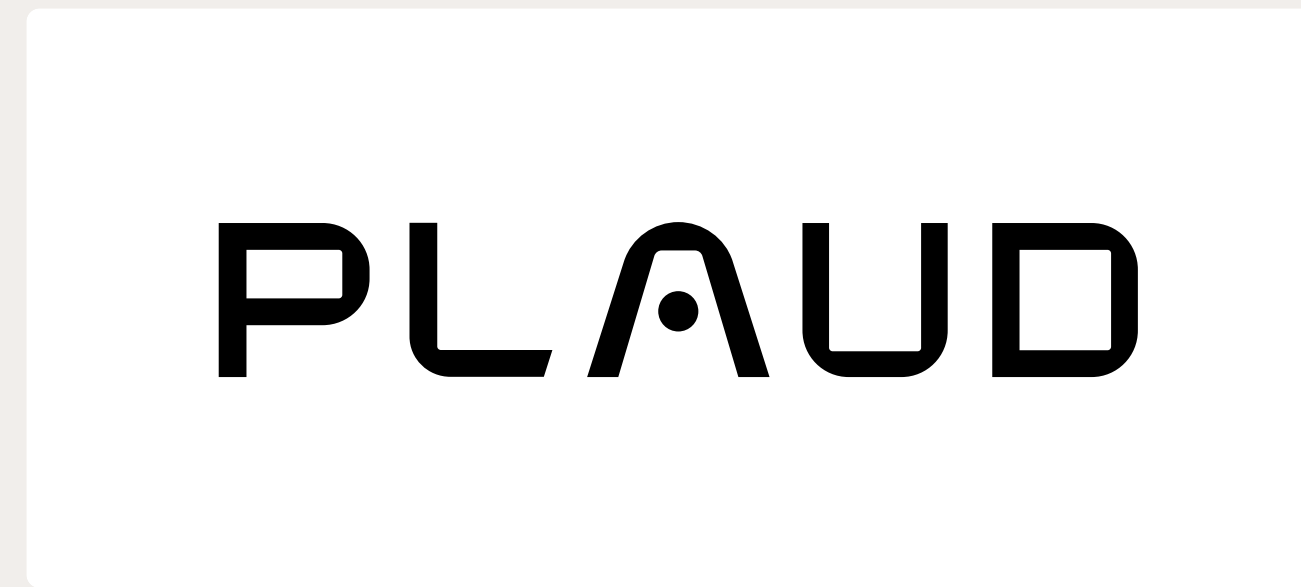

Minimum height: 15px/ 1,5 mm

Logo and Icon

Clarity White #FFFFFF

Deep Black #000000

Color of the logo

The logo may only be applied in the three colors mentioned above; the use of other colors is not allowed.

Minimum height: 15px/ 1,5 mm

Logo and Icon (Social media icon)

Clarity White #FFFFFF

PRIORITY

Deep Black #000000

Clarity White #FFFFFF

PRIORITY

Deep Black #000000

Small-size applications (app icon, favicon)

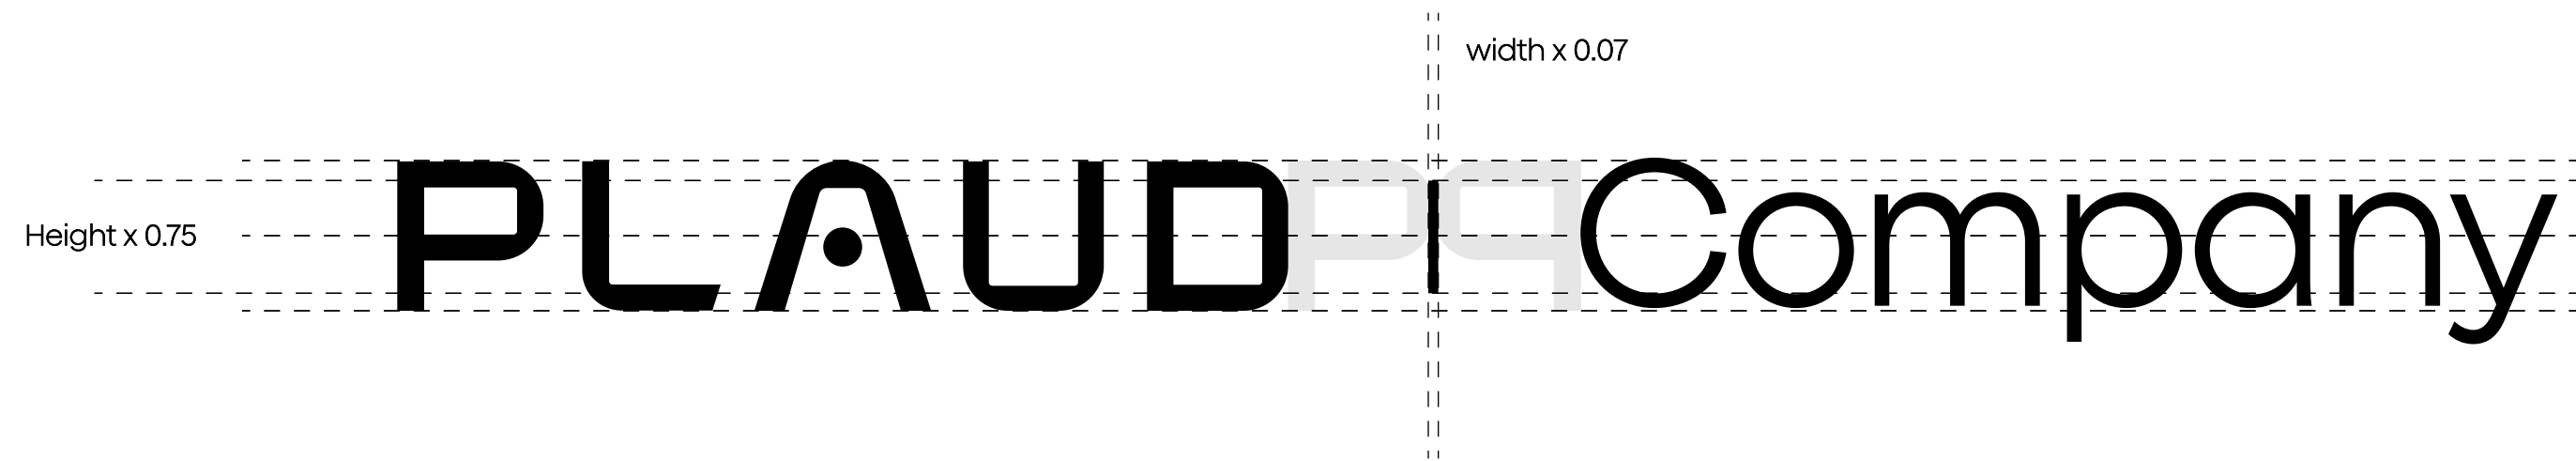

In certain applications, the symbol may be used on its own instead of the full logo.

This ensures clarity at smaller sizes, provides flexibility across digital platforms, and allows the brand to remain recognizable even in limited spaces. When the symbol alone is sufficient to represent the brand, its use conveys a confident and timeless expression of our identity.

Minimum height: 15px/ 1,5 mm

Co-branding

Partnership Symbol : The Pipe (|)

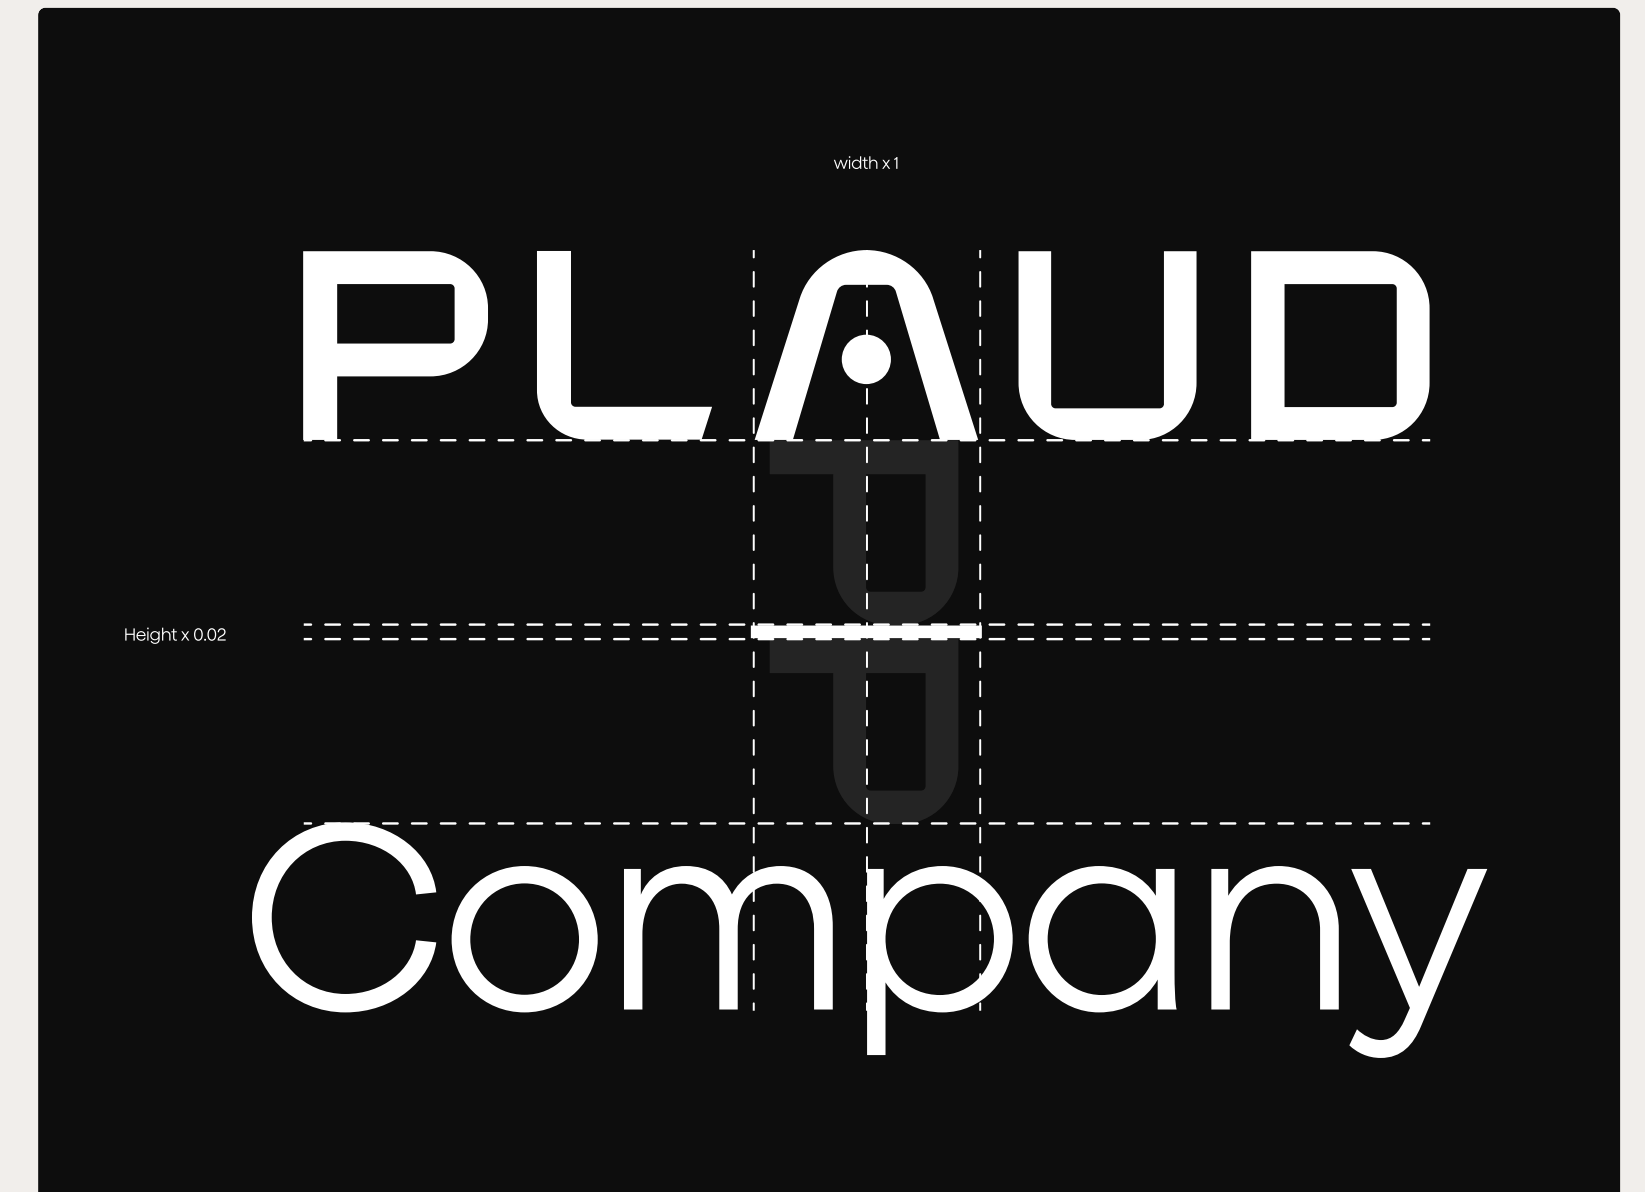

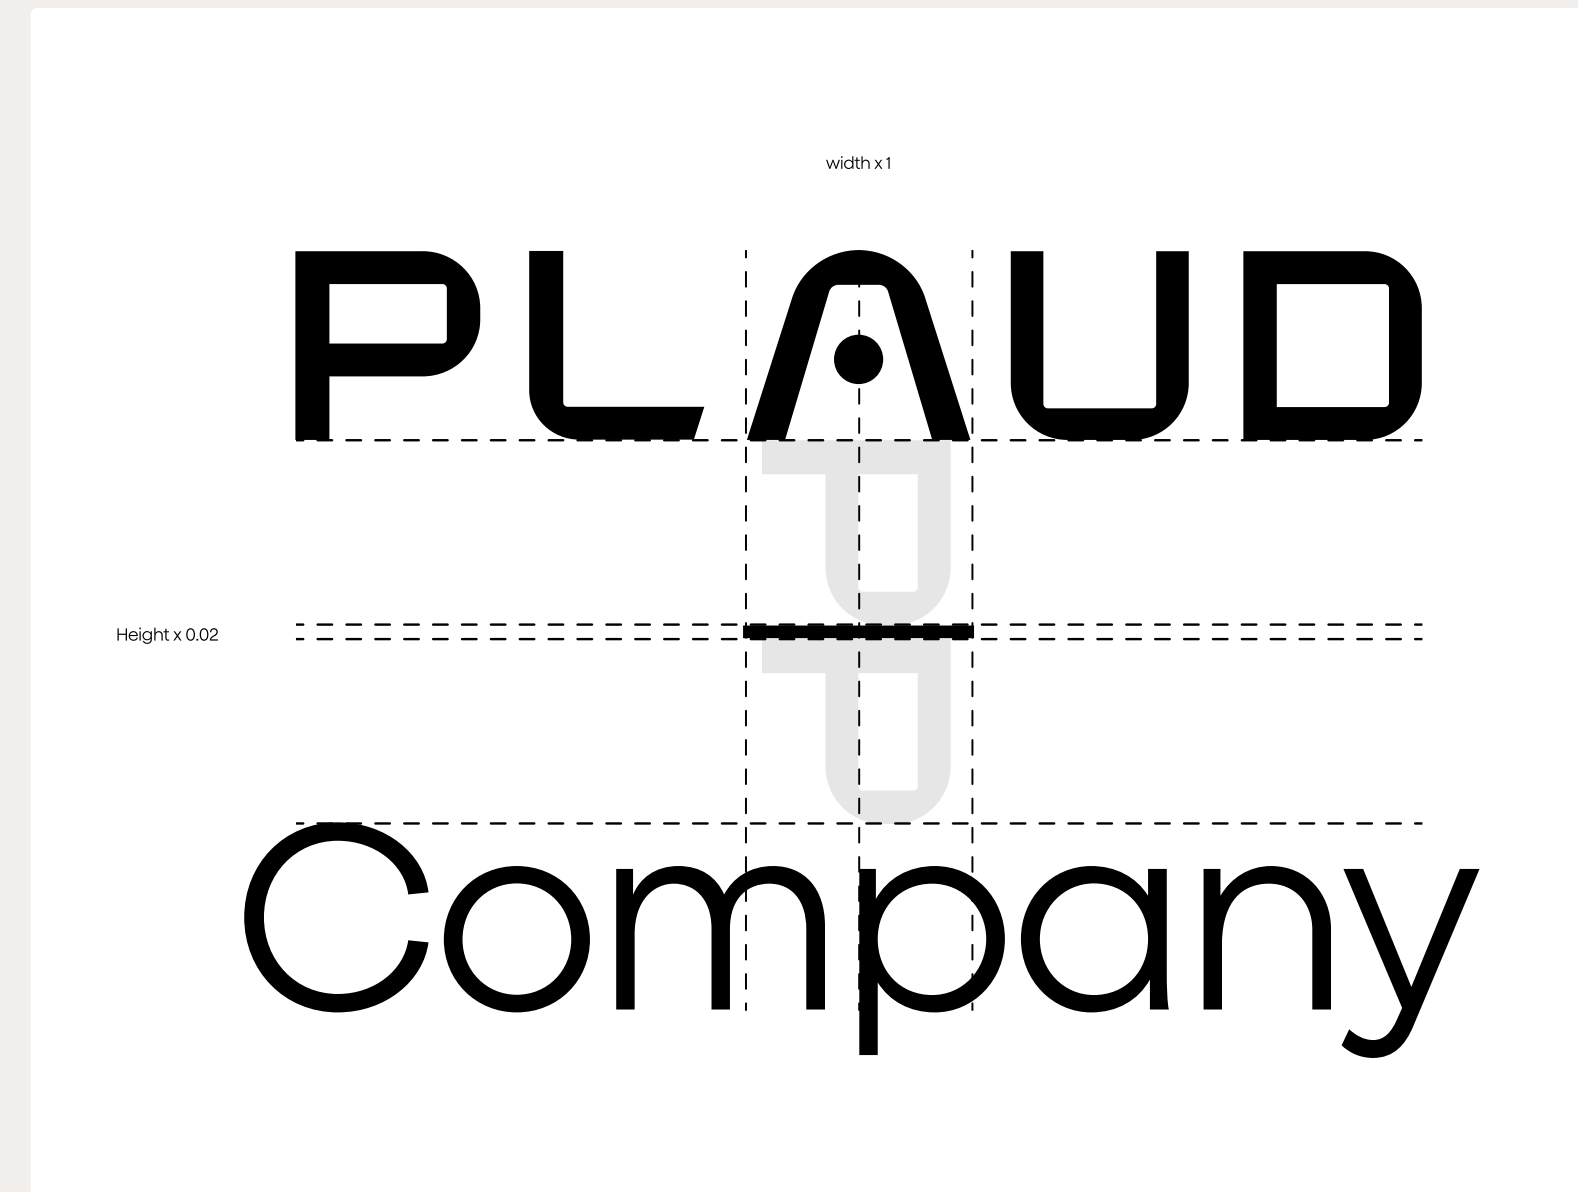

Represents a parallel collaboration model built on Plaud's existing products.

It indicates professional collaboration or co-branding support without shared product development, while each party maintains independent brand identity.

Co-branding

Partnership Symbol : The Pipe (|)

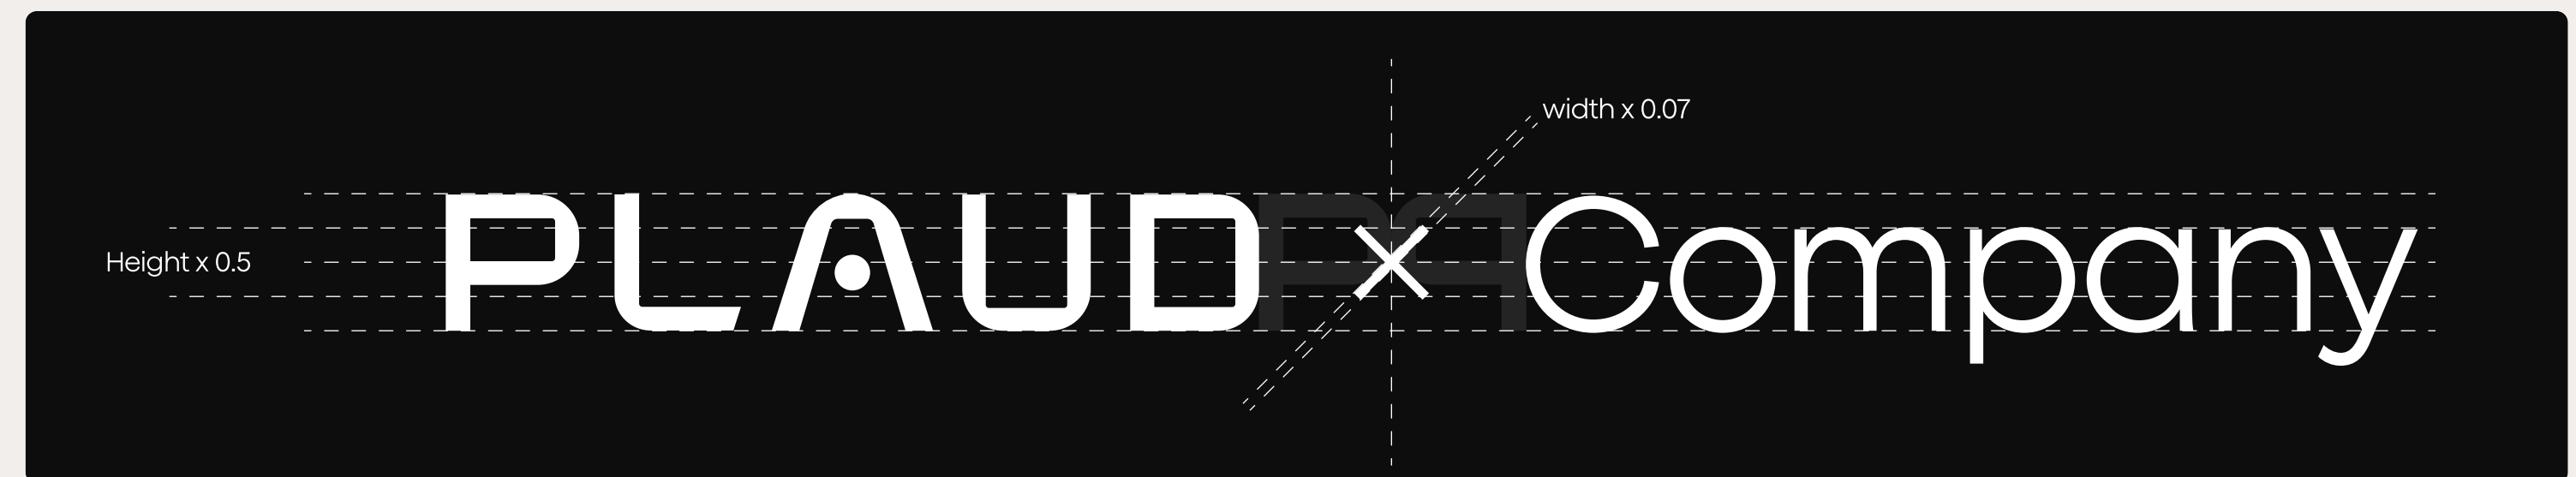

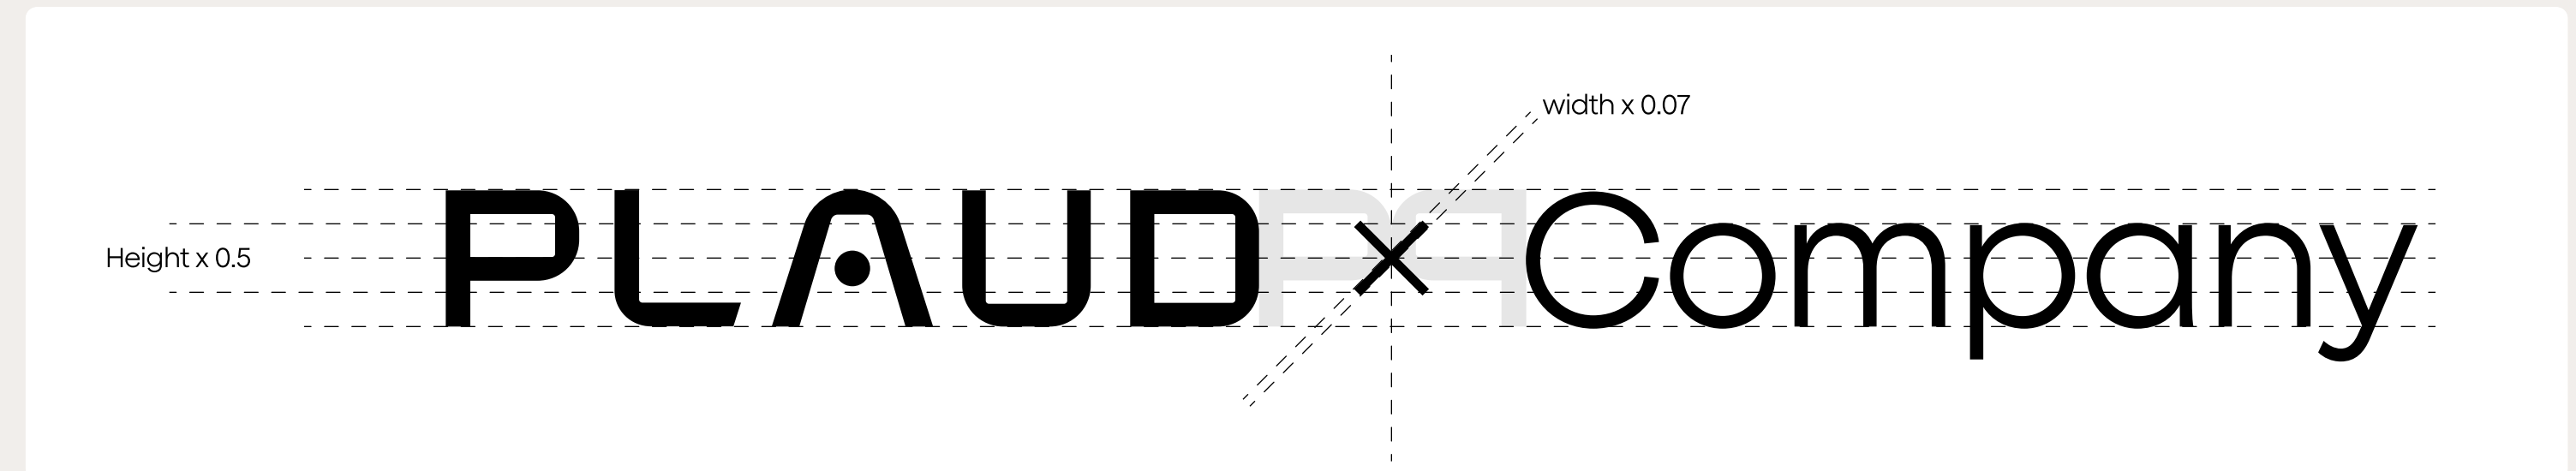

Represents a parallel collaboration model built on Plaud's existing products.

It indicates professional collaboration or co-branding support without shared product development, while each party maintains independent brand identity.

Co-creation

Co-Creation Symbol : The Cross (×)

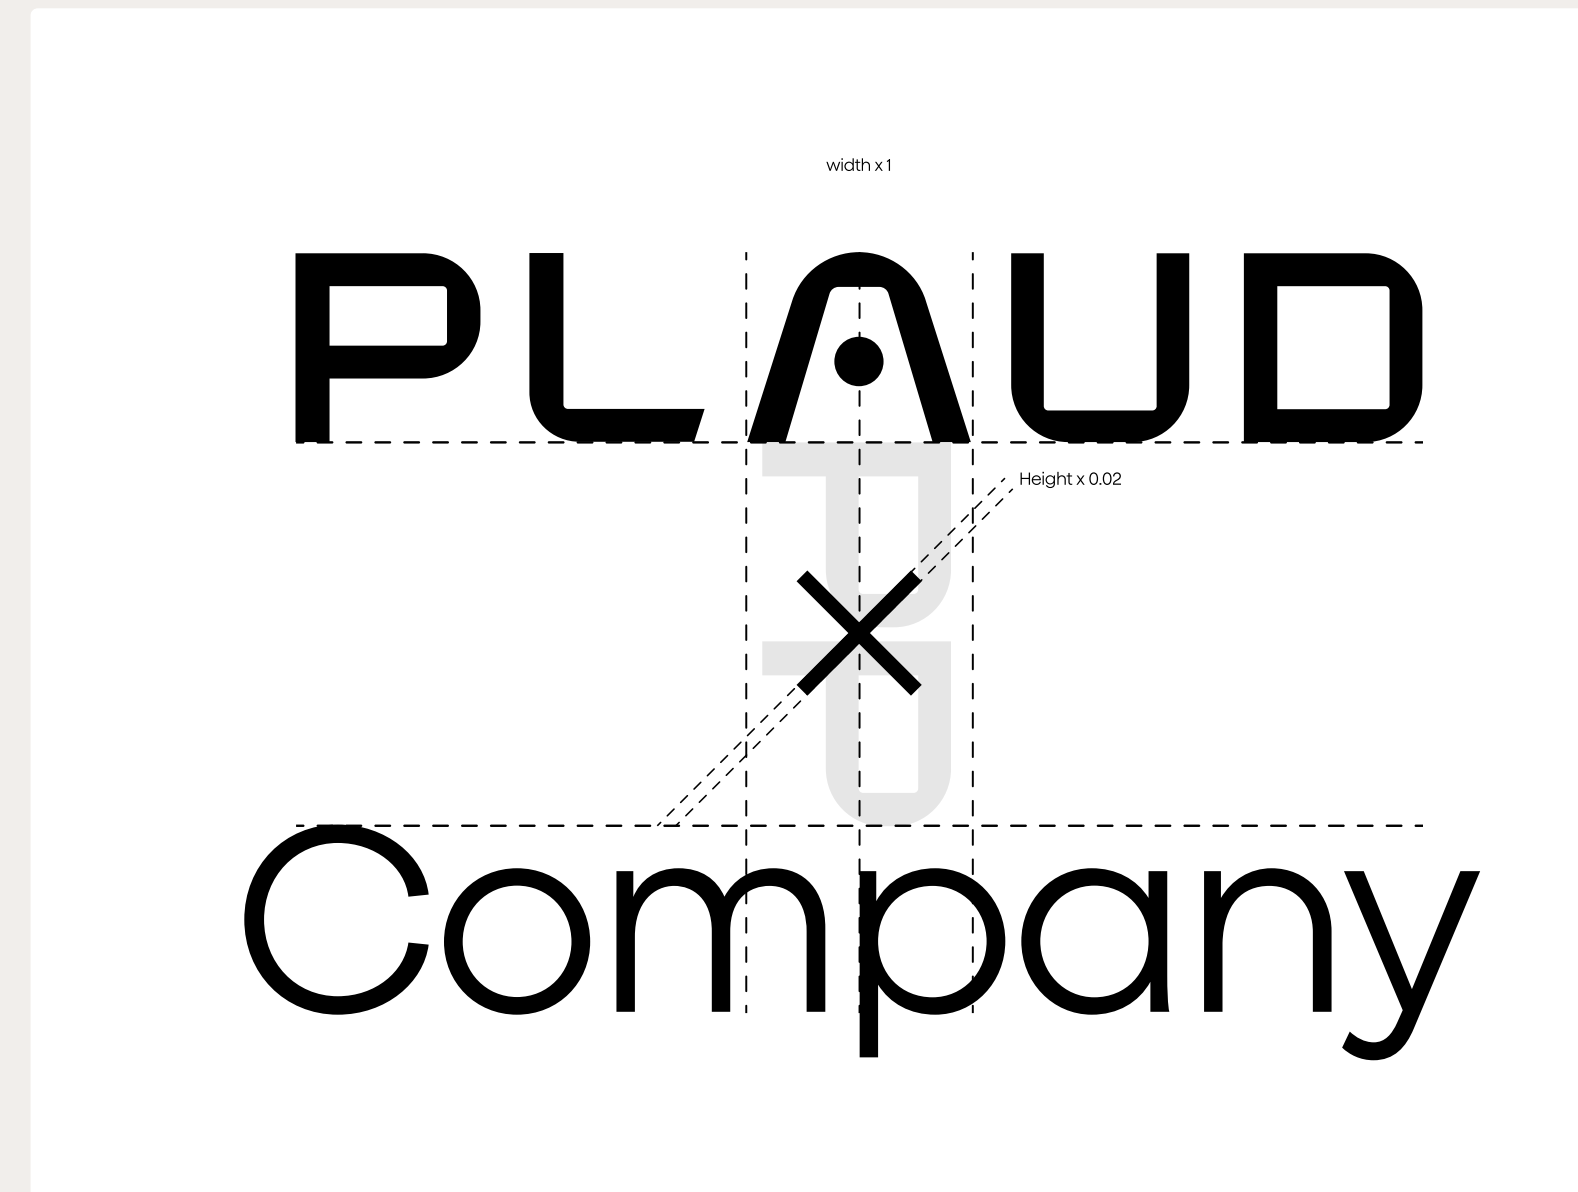

Definition: Represents the fusion of distinct brand DNAs. It signifies a "multiplication" of value, where two entities blend to create a unique, shared product.

Application: Limited Edition Hardware, Exclusive Crossovers.

Application: Limited Edition Hardware,
Exclusive Crossovers.

Logo — What to avoid

Do not fill the logo with an image

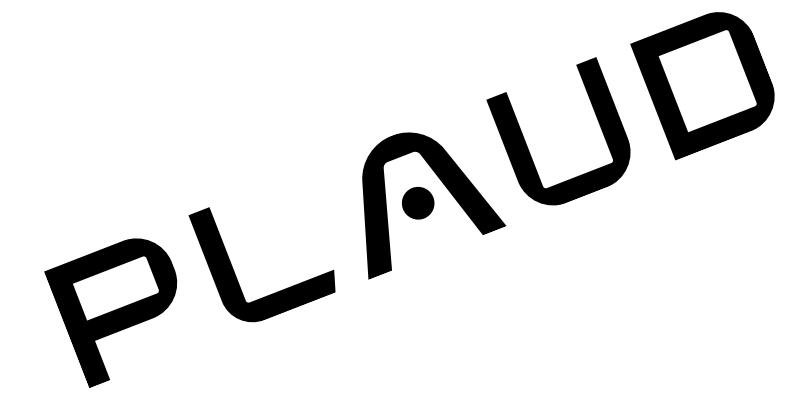

Do not fill the logo with a gradient

Do not add a drop shadow to the logo

Do not add a stroke to the logo

Do not tilt the logo

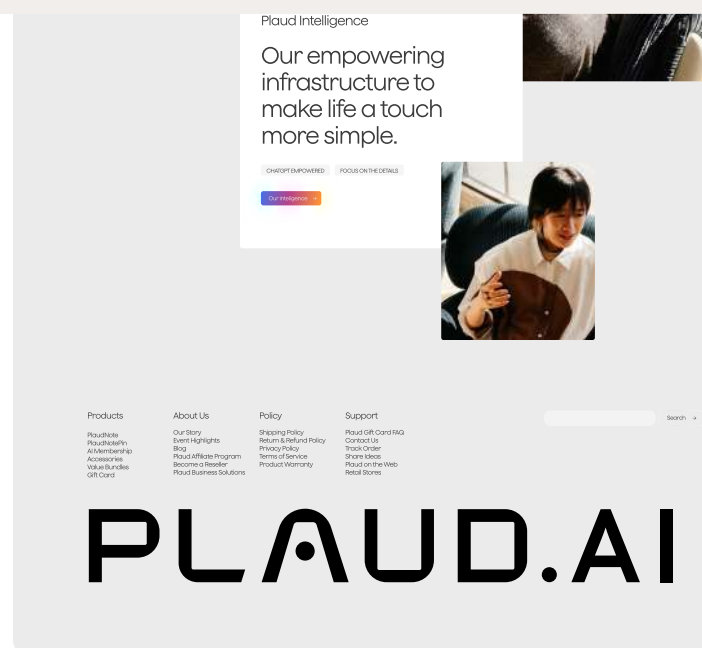

Do not modify the logo (for example — don't change the letter spacing)

Do not use any color other than black or white for the logo

Do not put a white logo on a light image (always ensure there's enough contrast)

Do not use the PLAUD.AI logo on the website or social media

Do not distort, stretch, or skew the logo.

Logo usage

We select the logo variant based on the design context and intended application.

Color breakdown

— Color Application Proportion

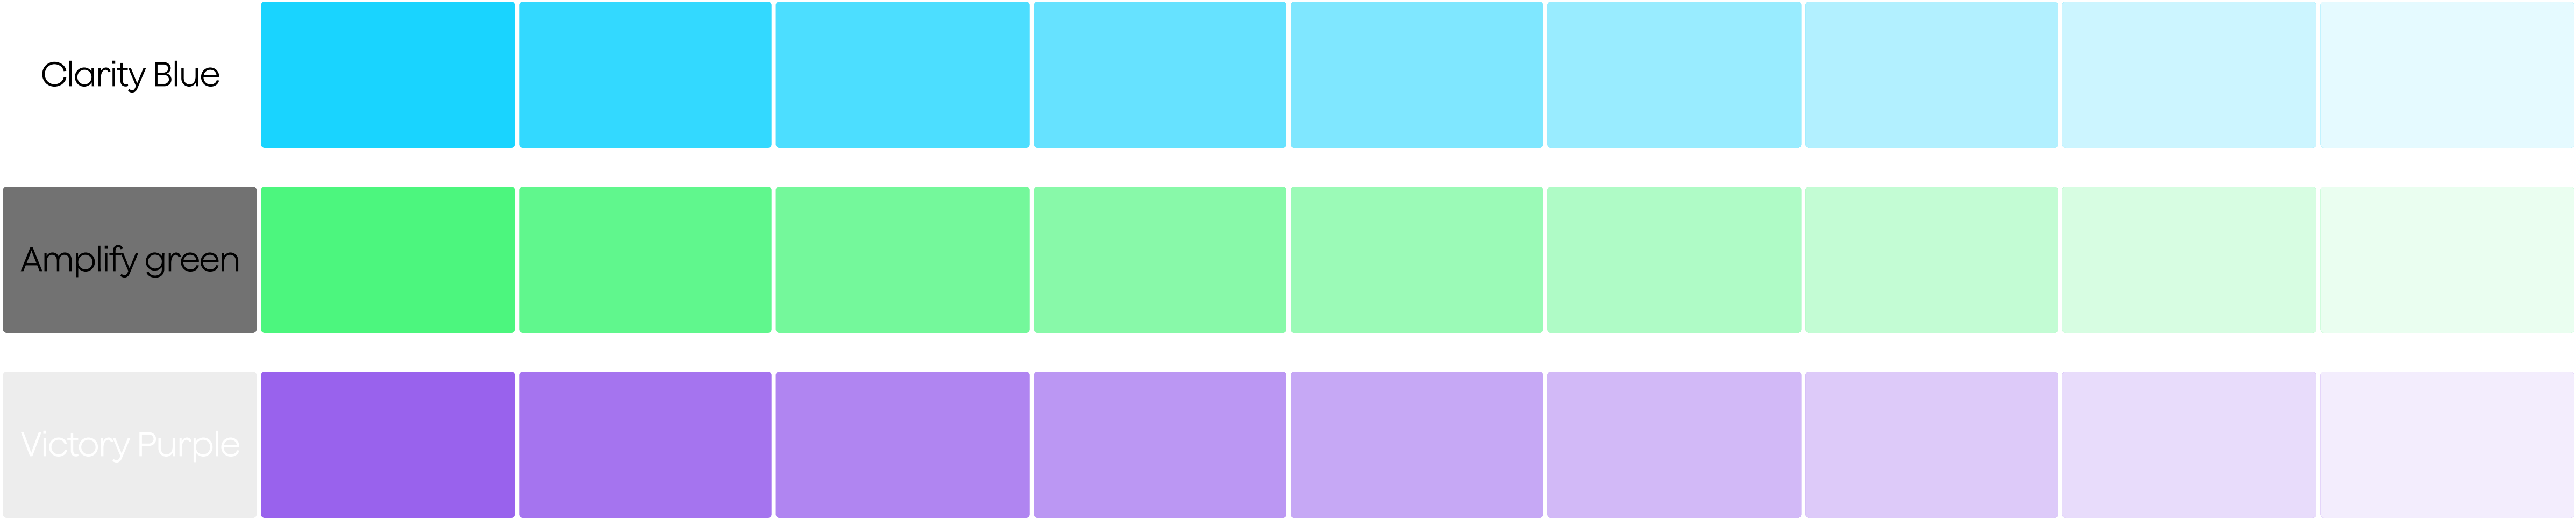

The application ratio of different brand colors within the design should generally adhere to the proportional diagram shown on this page.

Among these, the usage area of highlight colors should not exceed 15% of the total design area.

Color breakdown — Gradient Palette

Color Gadient

Solid Color

Color breakdown — Call-to-Action

Call-to-Action (CTA) elements should use the following fixed colors (or adhere to the Campaign color palette requirements). When multiple CTAs appear together:

- Non-emphasized elements use solid colors
- Emphasized elements use brand highlight colors
- Brand gradients are only permitted when highlighting AI-related functions.

Color breakdown

— Highlight color gradient

We use gradients of three brand highlight colors to emphasize AI-related features and elements, or to make small areas within the image stand out.

The application of gradients should follow the specified color positions and gradient directions, with the preferred directions being starting from green to the right, or starting from green upward.

The overall area where gradients are applied must adhere to the brand highlight color’s usage standards in terms of overall color proportion.

Ask Plaud

Can you extract all the to-dos from the Q3 Planning Meeting?

Action Items from Q3 Planning Meeting

- Finalize the Q3 campaign brief and share it with the team by **July 17, 2025**
- Align with the hardware team on testing logistics before **July 21, 2025**
- Draft updated messaging copy by **July 18, 2025**
- Analyze Q2 performance data and prepare summary slides for the next check-in on **July 19, 2025**

Ask about this note

Background Gradients

Inspired by the Plaud A icon.

Based on the shape of Plaud A, our gradients radiate outwards, drawing from our mission: Amplify human intelligence.

Background gradients add depth to layouts and speak to the drive and energy, fitting with the Plaud brand.

They are a powerful element within our identity and should therefore be used sparingly.

Note: graphic is to illustrate where gradient comes from – not artwork.

Color breakdown — Background gradients

Our background gradients are used to add depth and richness to layouts.

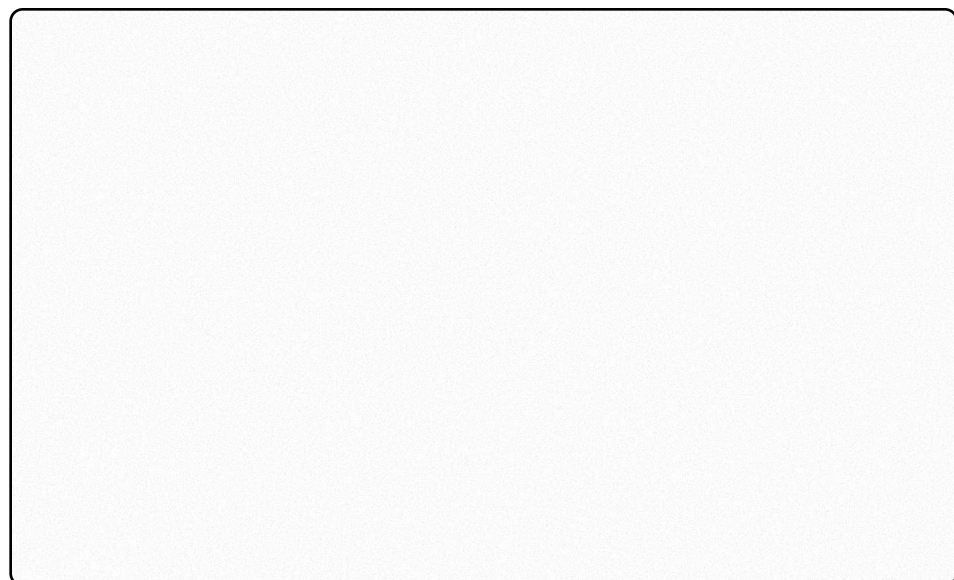

We use cool gradients to represent the technological side of the brand.

Gradients are created with the Radial Gradient tool. Position the centre point at the bottom centre of the frame.

Only use one background gradient per application.

Additional grain texture

Where possible it is recommended to add our grain texture layer as a multiply effect on top of gradients — giving life, realism and texture.

Dark Warm Grey
100% 413D3B

60% 6666BF

40% 3B95DF

20% 74D9D2

0% DAF FE7

Light Warm Grey
100% F2EFEB

60% EFF5FF

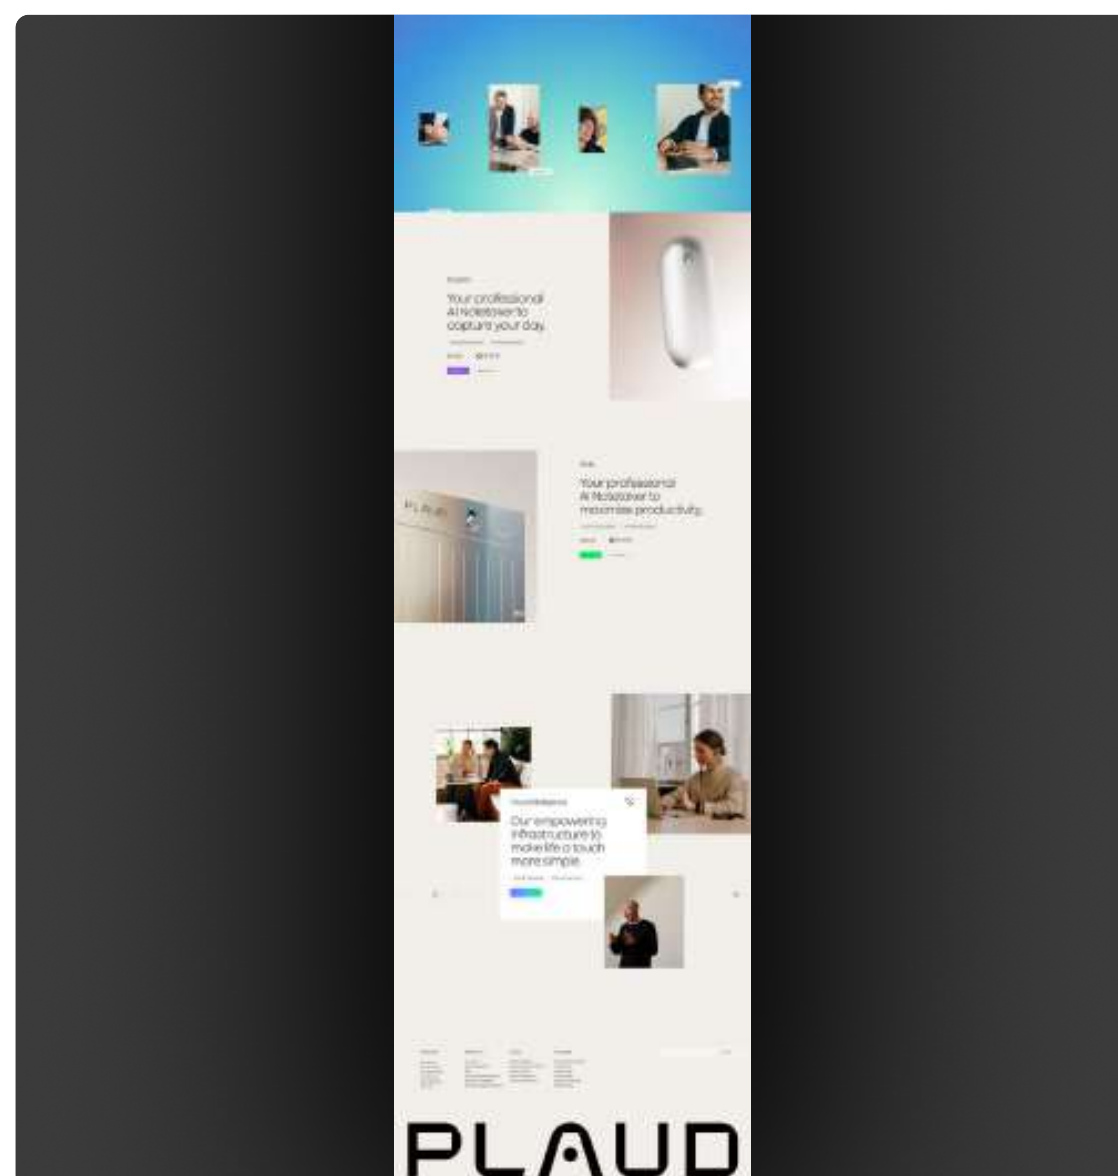

40% D0EAF6

20% B7F3FA

0% C9FFCA

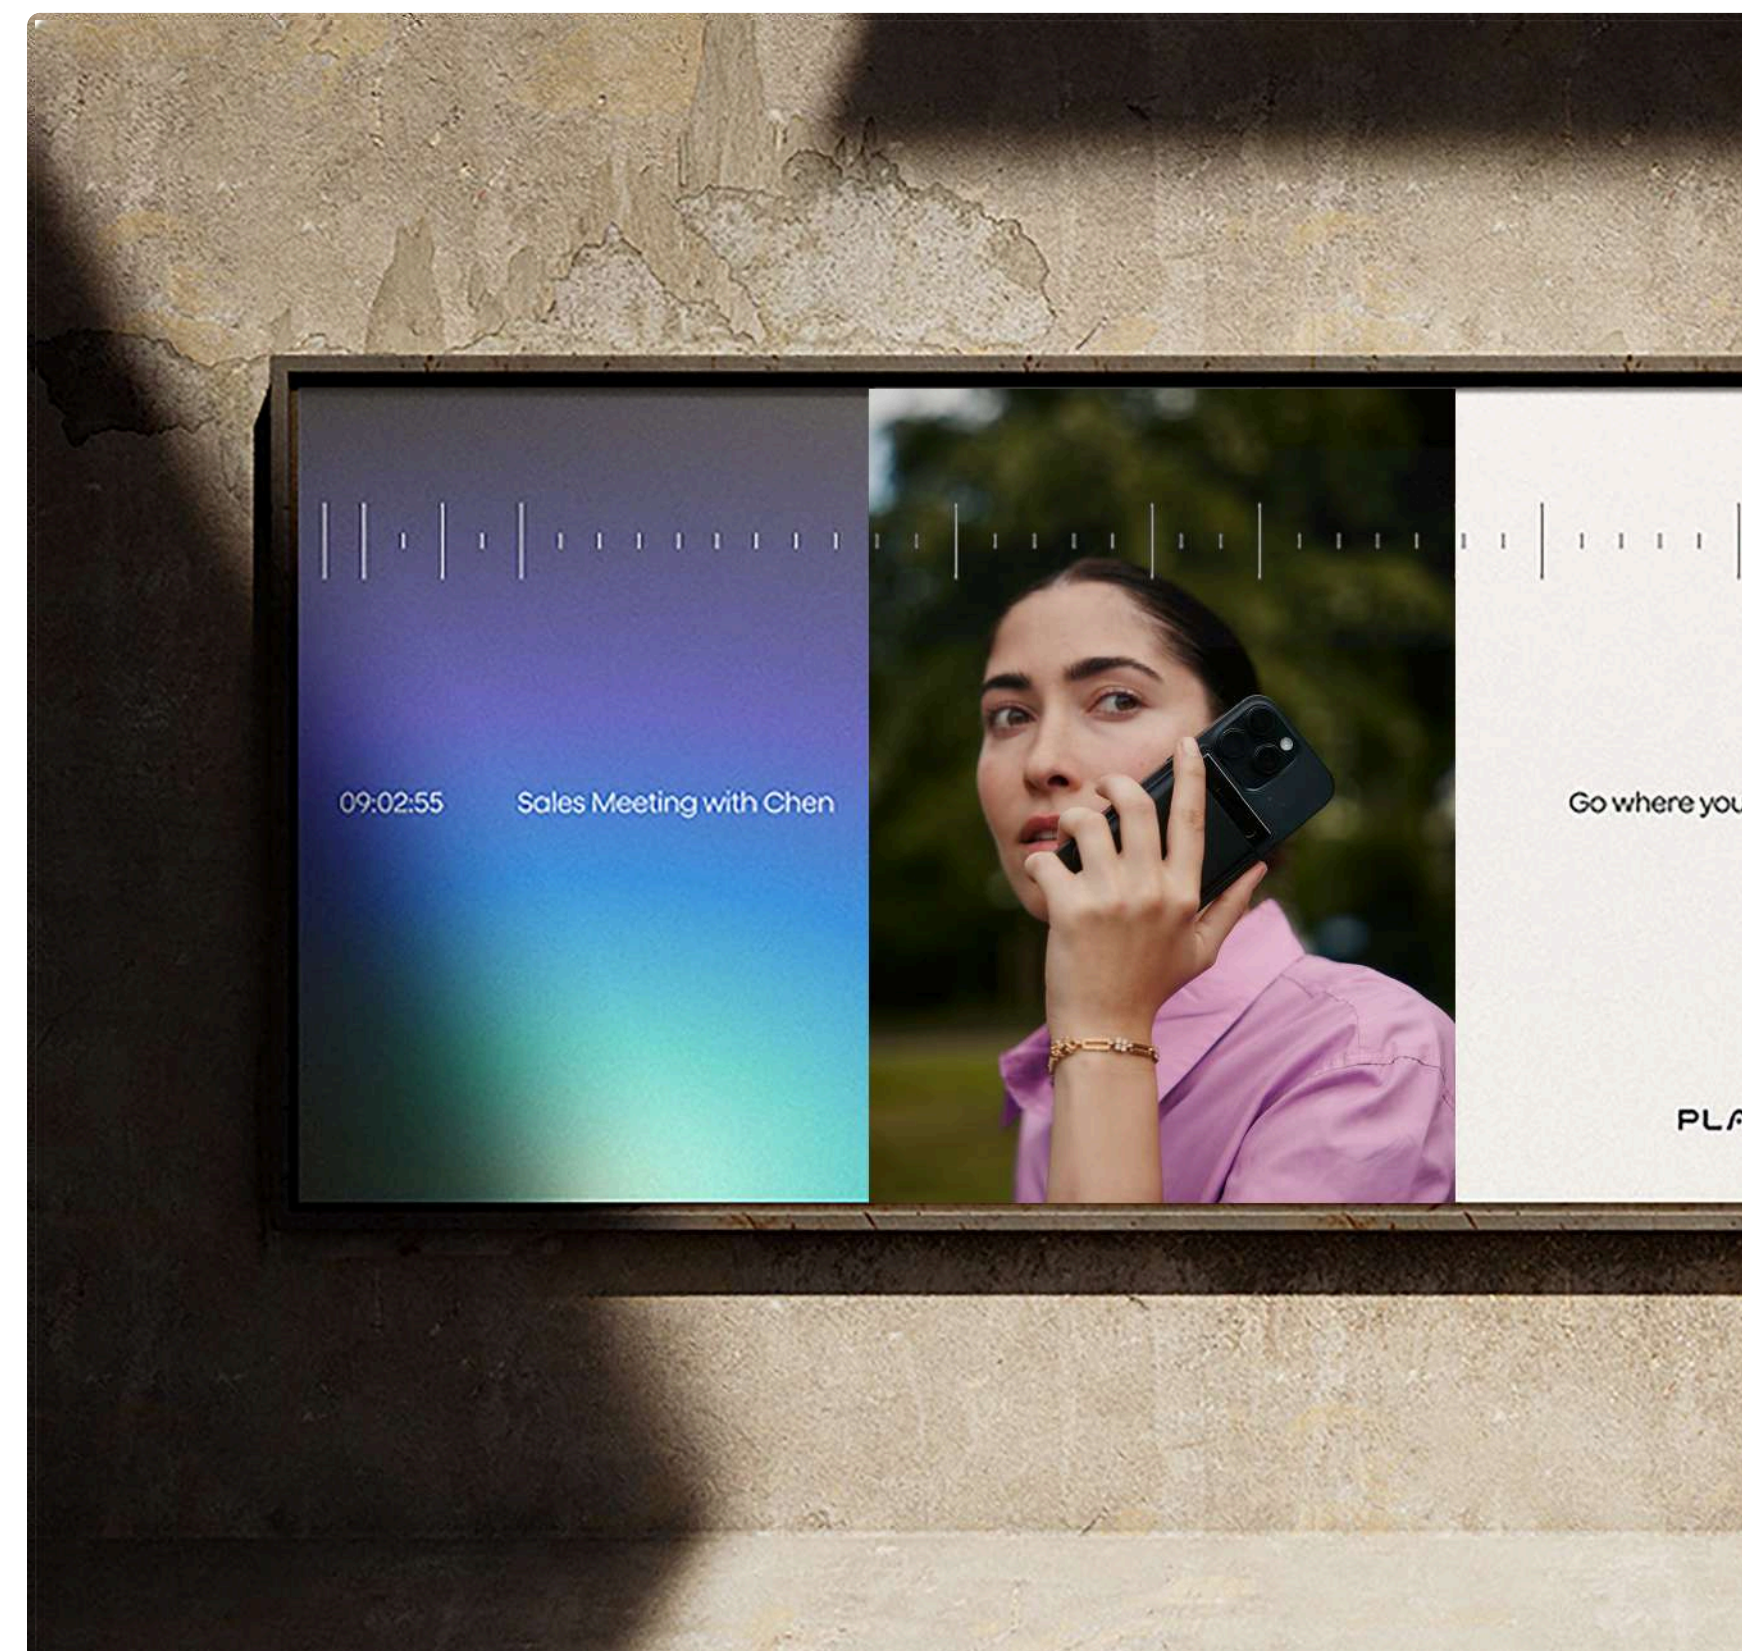

How we apply color

Here are a few rules on how we apply color.

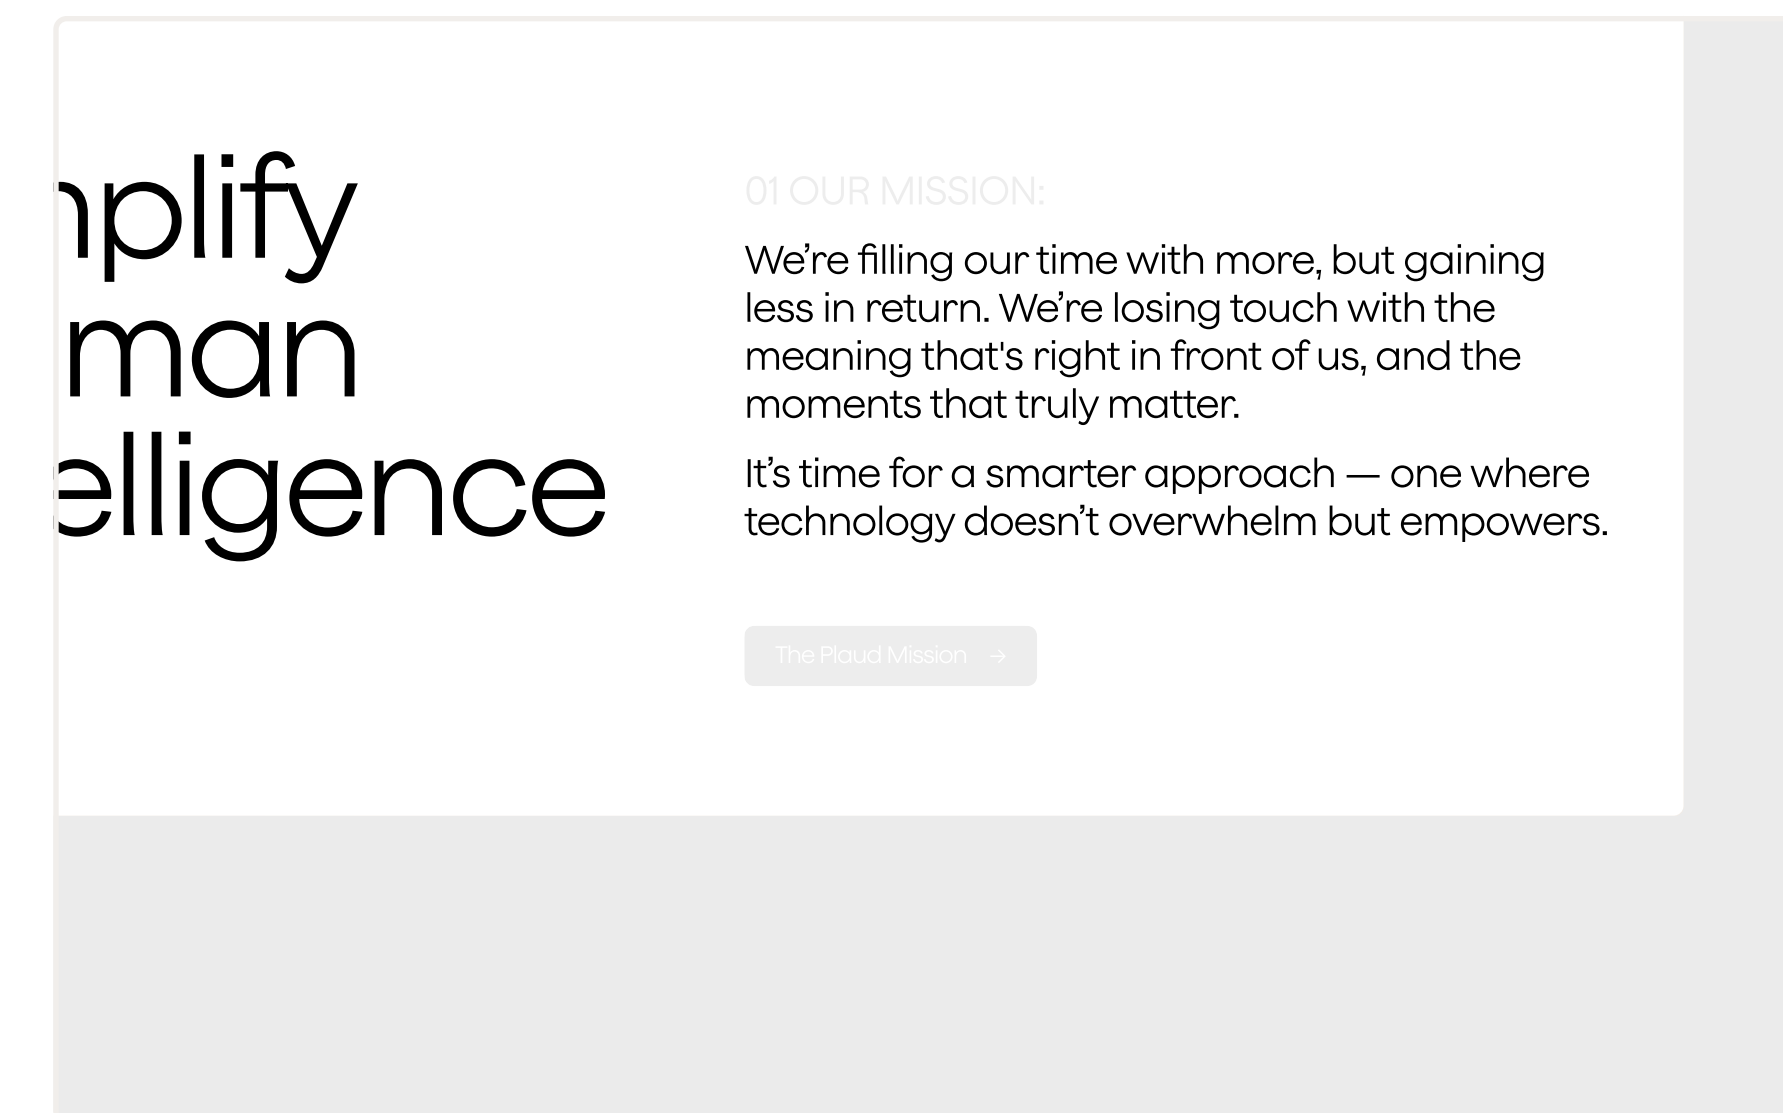

80% of background should utilize the neutral base palette.

Background gradients should be a special feature, only used once per application.

Maximum of one background gradient per application.

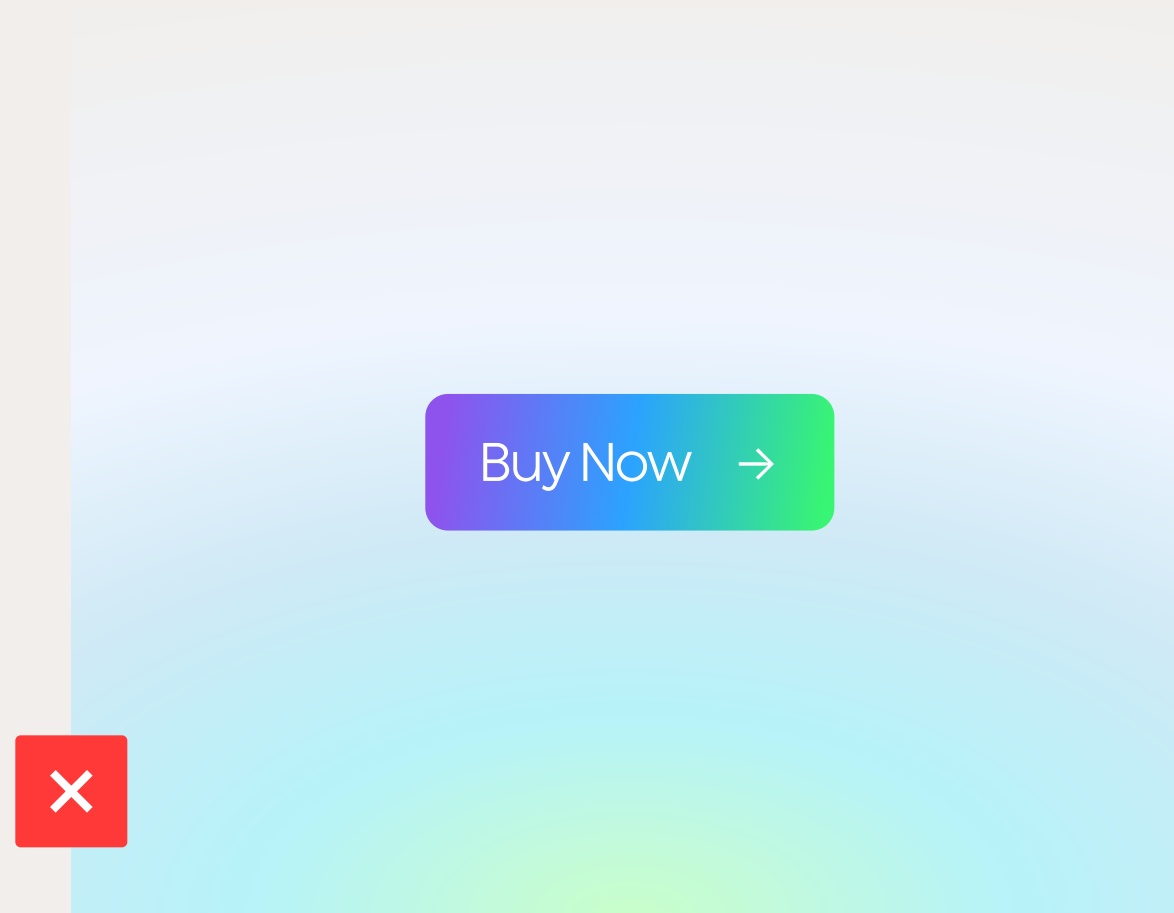

Use sparingly to ensure it elevates core moments, like branded messages and hero applications.

Small headers maybe be set in highlight colors. However, body copy should always use Black or White for optimum legibility.

Maximum contrast is essential when setting small text.

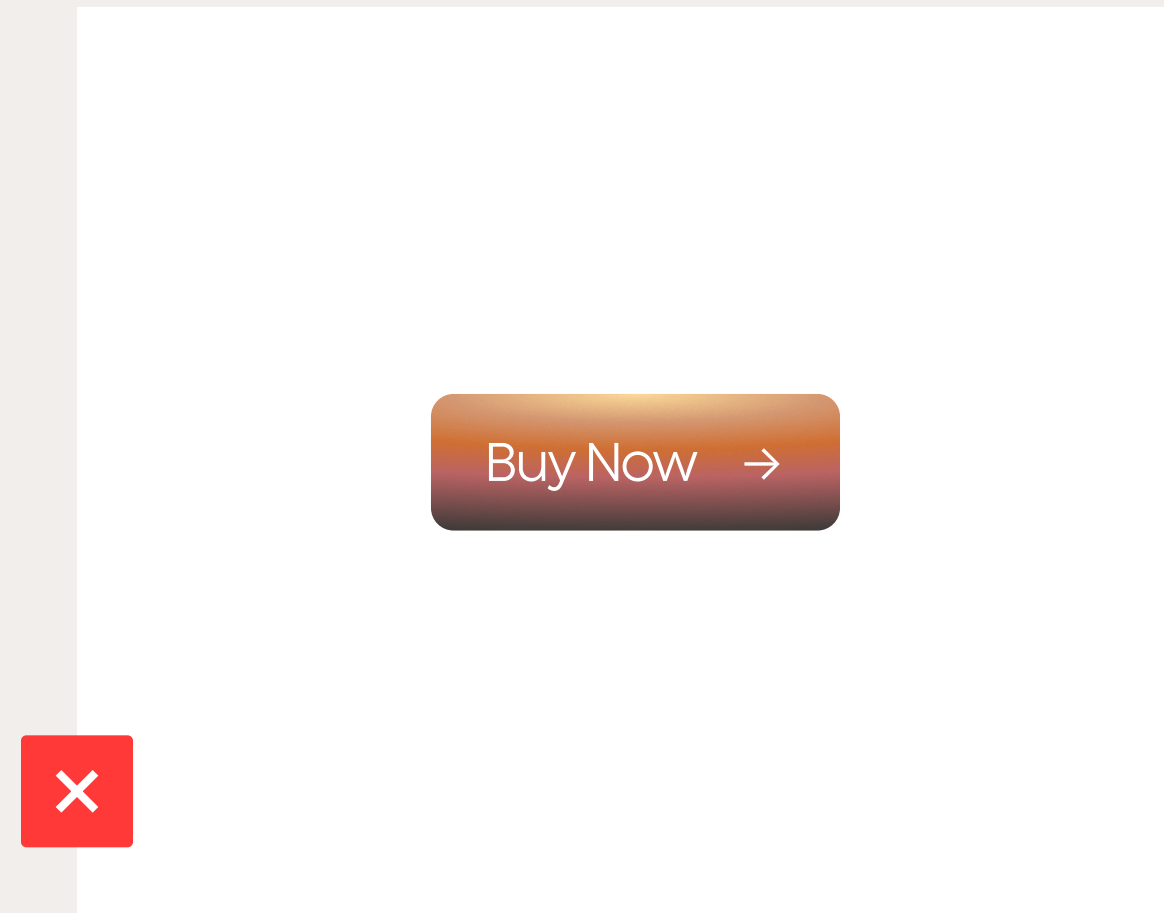

Color — What to avoid

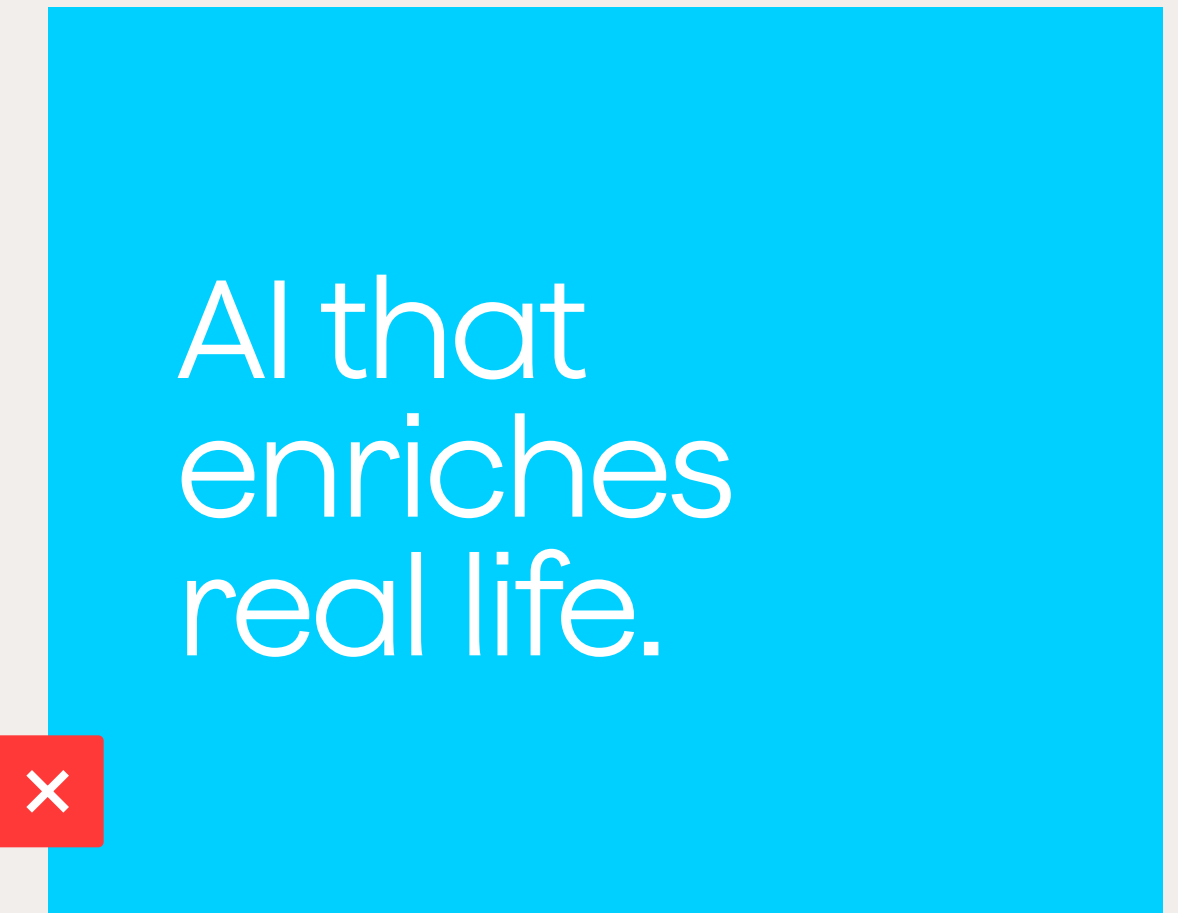

Do not place a gradient button on a gradient background — it's hard to read

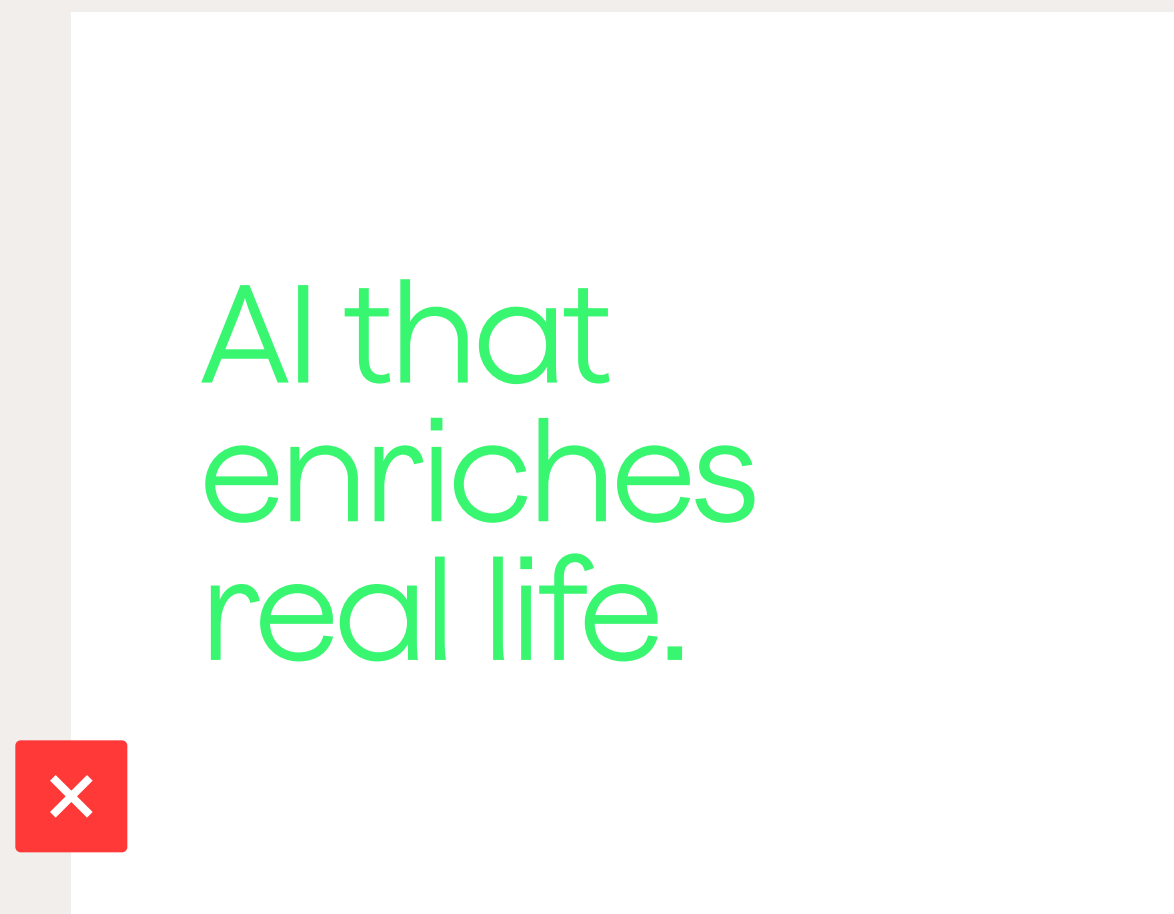

Do not use the core gradient as a background color

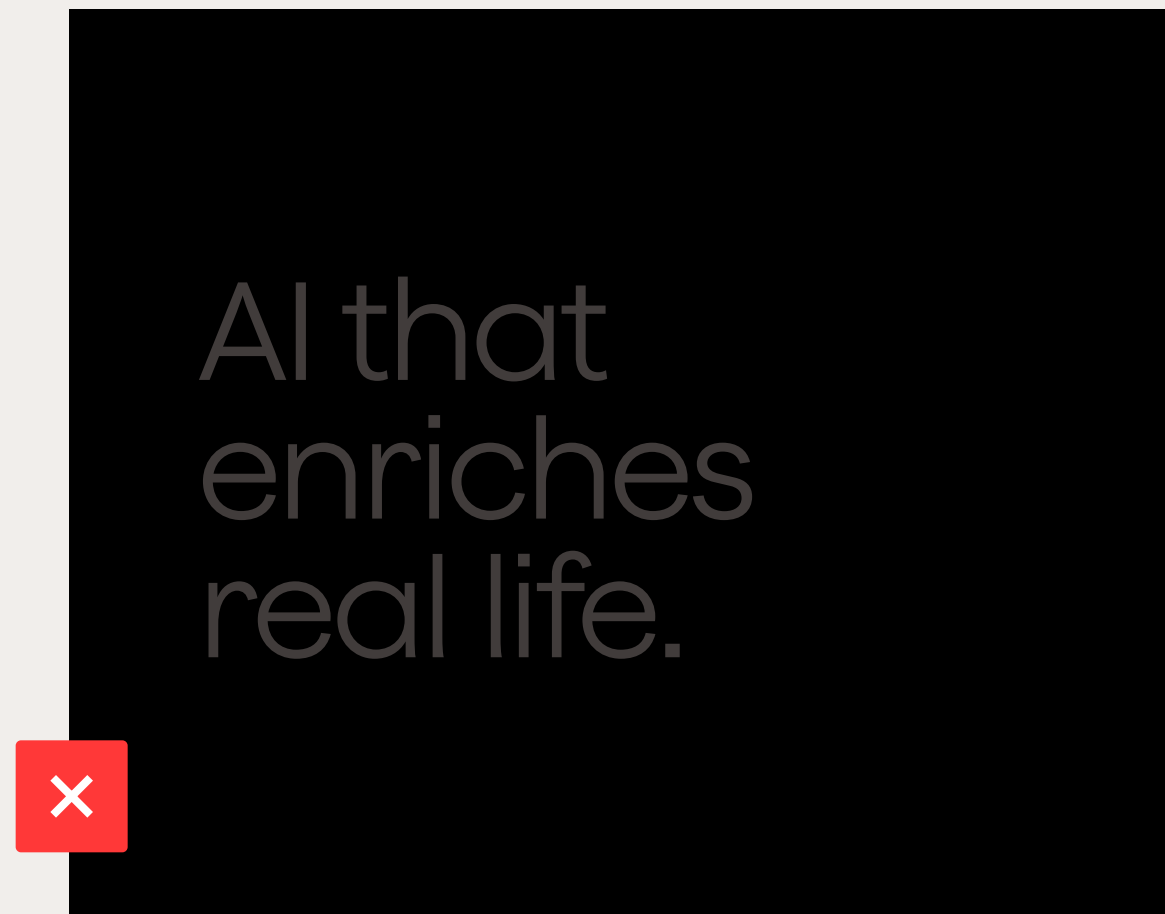

Do not use background gradients for buttons. Only use the core gradient for buttons

Do not use the highlight colors as a background color

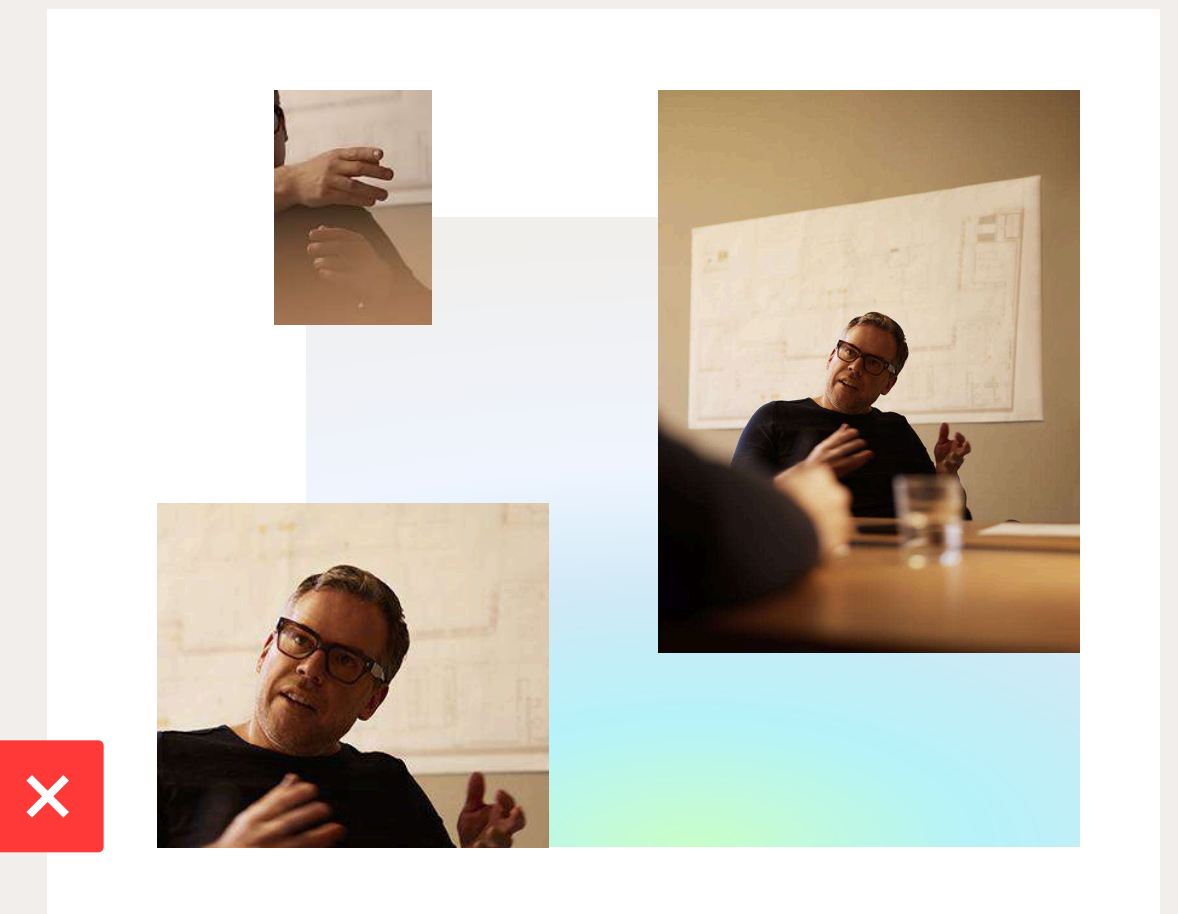

Do not use highlight colors for headers. Highlight colors may only be used for small headers (see previous page)

Do not use Light Warm Grey on a White background or Dark Warm Grey on a Black background.

Do not use more than one background gradient per application

Do not use a cool background gradient with warm-toned imagery. Always match the background gradient with the tonality of imagery

English Typography

Introducing, Jokker.

[Download →](#)

Jokker is a geometric sans-serif with subtle human details. Chosen for its precision and clarity, this font is designed to work at any size while maintaining a compact look.

- 1 Diagonal terminals for more dynamism
- 2 Elegant letterform details
- 3 Fluid spur flourishes add a sense of elegance
- 4 Fluid numeral shapes for a sense of movement

Font Weights

For ease of use we’ve selected two weights for our typography: Regular and Semibold.

Use Regular for Headers and Body copy. Use Semibold only to highlight words within body copy (as shown in the Type Sizes section).

Website

Branded Application*

*Note that these icons are intended as a visual brand identity asset, and not as a user interface asset for your app product.

Icon features

Our icons take the details from our logo's form. This connects the icons to our brand and gives them a touch of character and own-ability.

A Familiar Dot

Angled
Terminals

Contrast
Curves

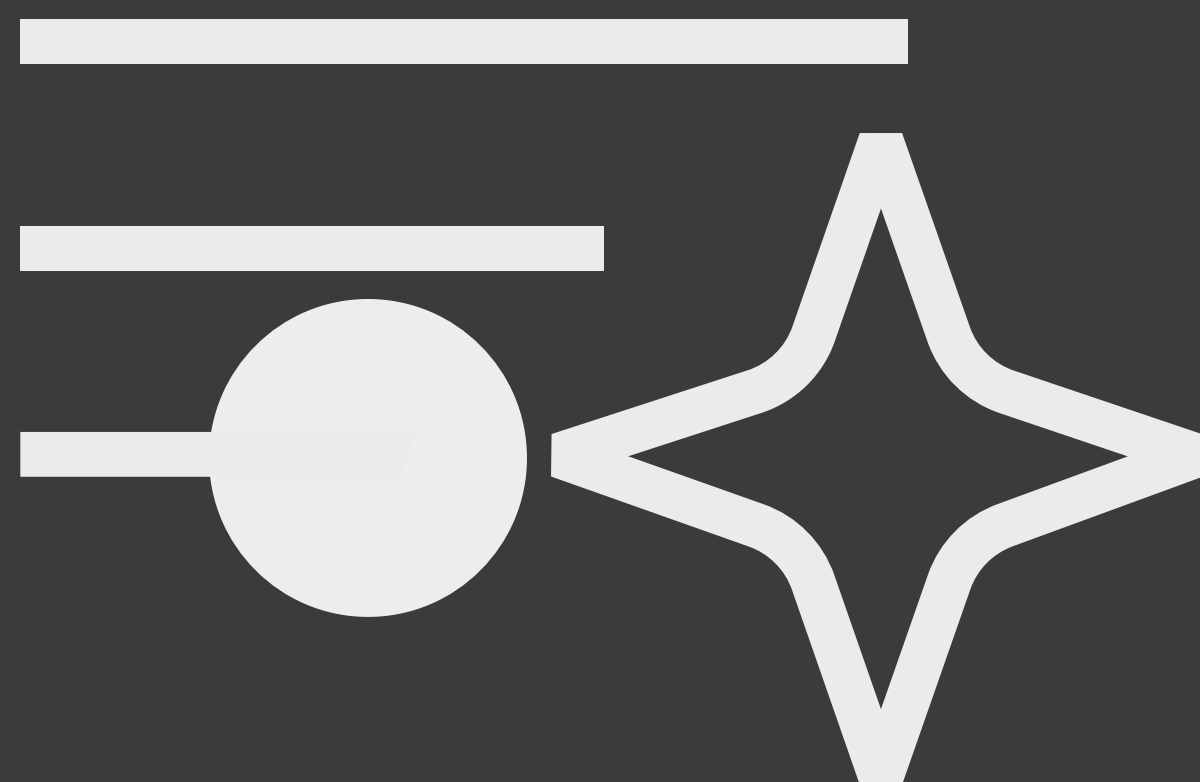

Icon features

Principles to follow for expanding the set:

- A Familiar Dot feature is added to any icon that references capturing/ recording.
- Contrast Curves are added to angles, much like in our logo itself.
- Angled Terminals are added to some ends — however, this is not over-done and forced into each icon.

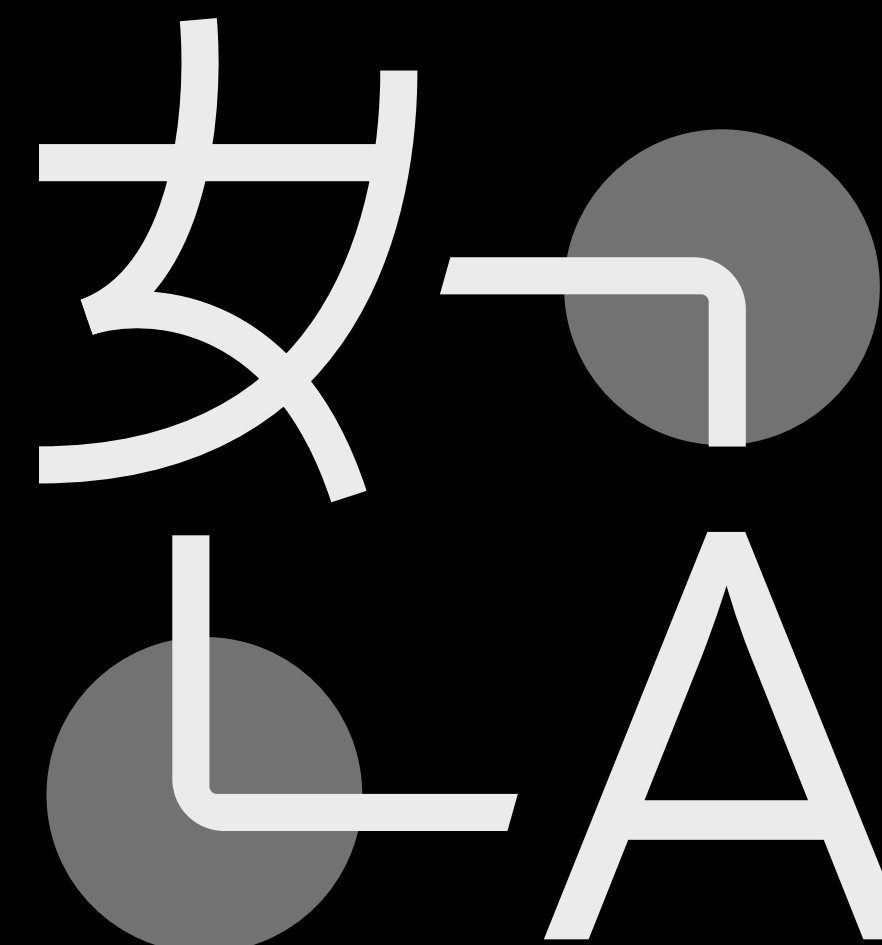

A Familiar Dot

Angled Terminals

Contrast Curves

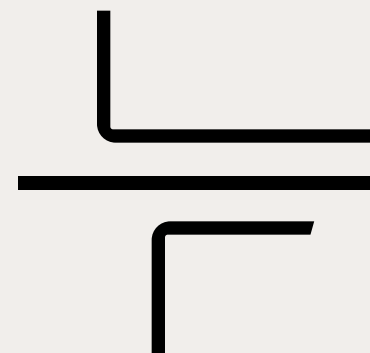

Icon set

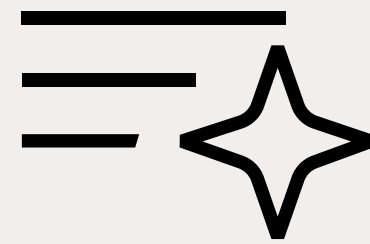

We have created an indicative icon set based on Plaud's brand functions and offering. This should act as a foundation and can be evolved in later UI projects.

Icons — What to avoid

Do not use our brand icons directly in your app. These icons are intended for brand purposes and not UI.

Do not modify or fill in any part of the icons

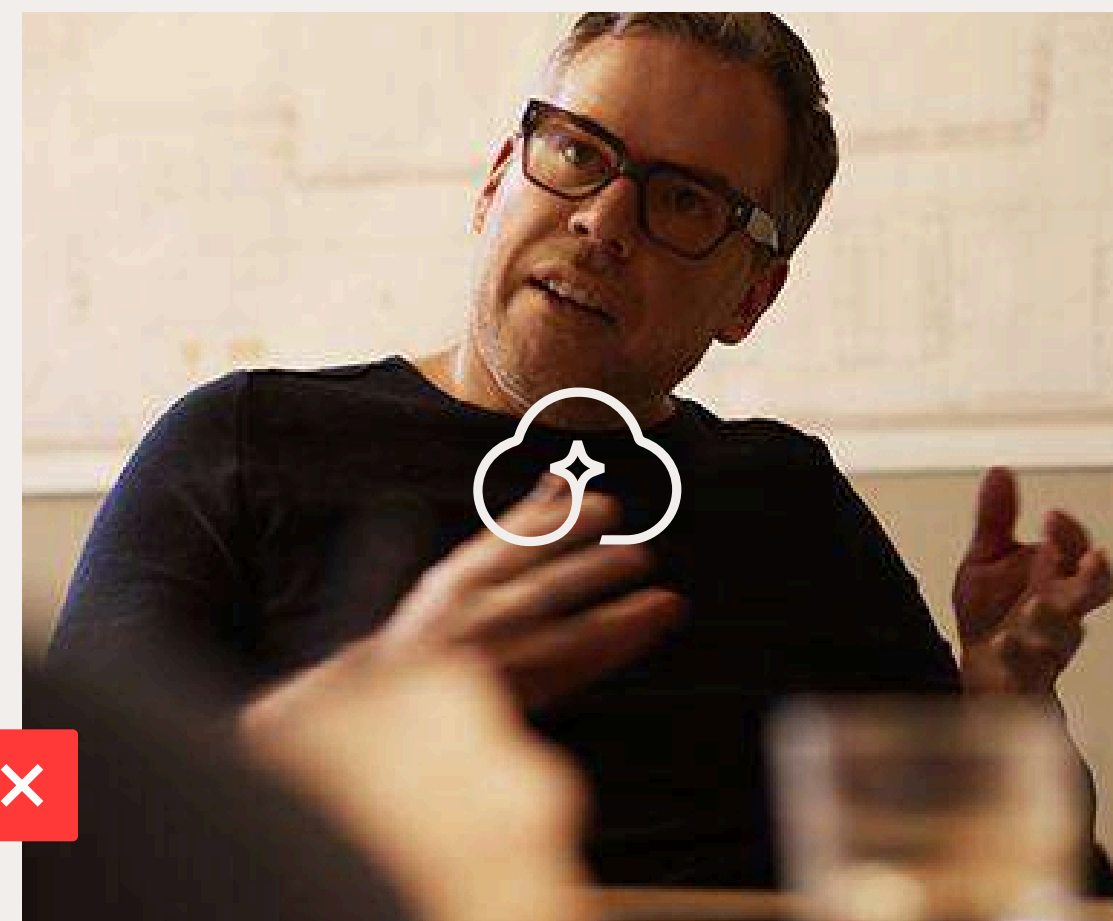

Do not create icons that do not follow the design system

Do not use the regular icons too small, they become too thin

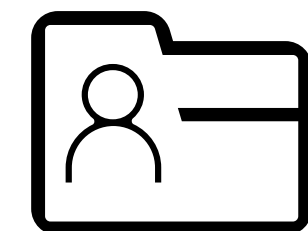

Do not use the Small icons too large, as they become too thick.

Do not place icons on imagery without a container.

Lorem ipsum dolor sit amet
consectetur adipiscing elit.
Dolor sit  amet
consectetur adipiscing
elit quisque faucibus.

Do not merge icons without adjusting the stroke width

BRAND DESIGN

05

Graphic device

Plaud timeline

We use our timeline as a graphic device to visualise recordings made with Plaud. With this timeline we amplify key moments within human interactions and conversations — fitting within our core idea: Amplify human intelligence.

The timeline also communicates precision, clarity and productivity.

The basis for this timeline is a 1pt repeated line.

Plaud moments

Time stamps can be added to indicate important moments or highlight quotes.

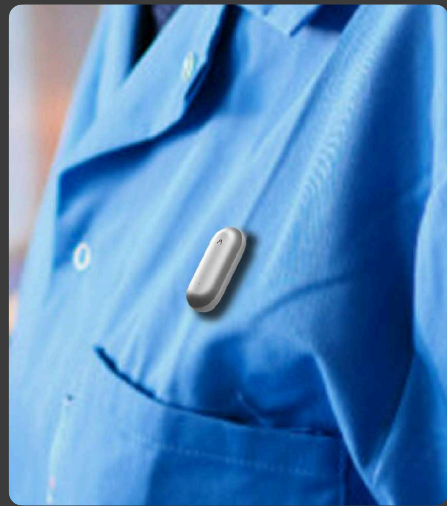

Use colors to indicate different speakers and time stamps to bring moments to life.

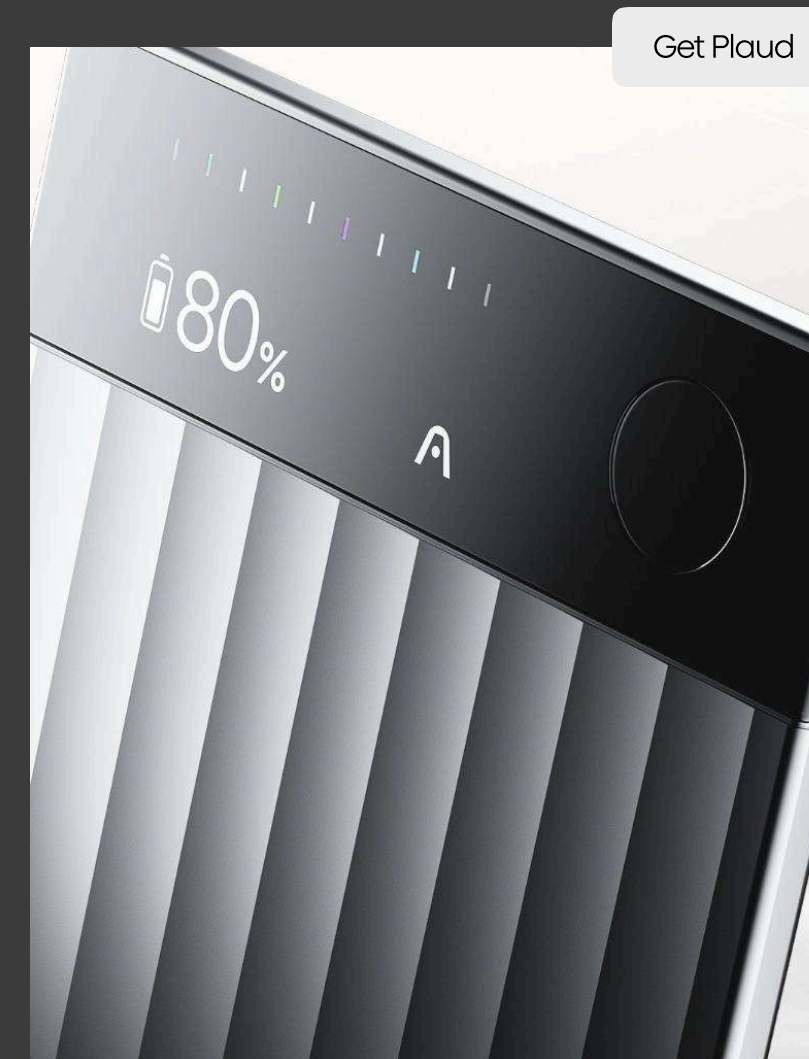

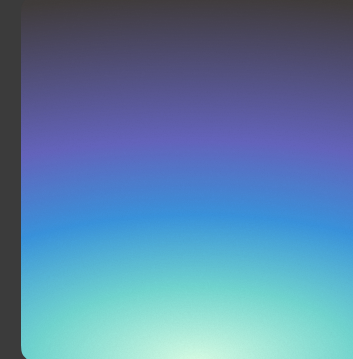

Live moments

Imagery can be added to the timeline to visualise moments in a conversation.

Using our art direction guidance, we can bring in a number of images at different sizes to add dynamism: close-ups, wider shots, bringing the product in.

Be Present →

Get Plaud →

Shape language

Our shape language communicates precision, clarity, and professionalism.

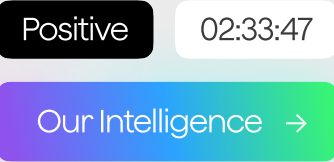

We use boxes to organise content, making copy easy to read. For consistency, boxes, buttons and tags always have a 5px corner radius.

Copy is always left aligned and set in sentence case.

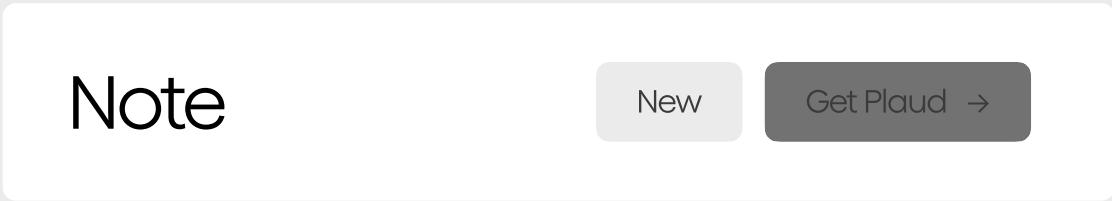

⌵ 5px Corner radius

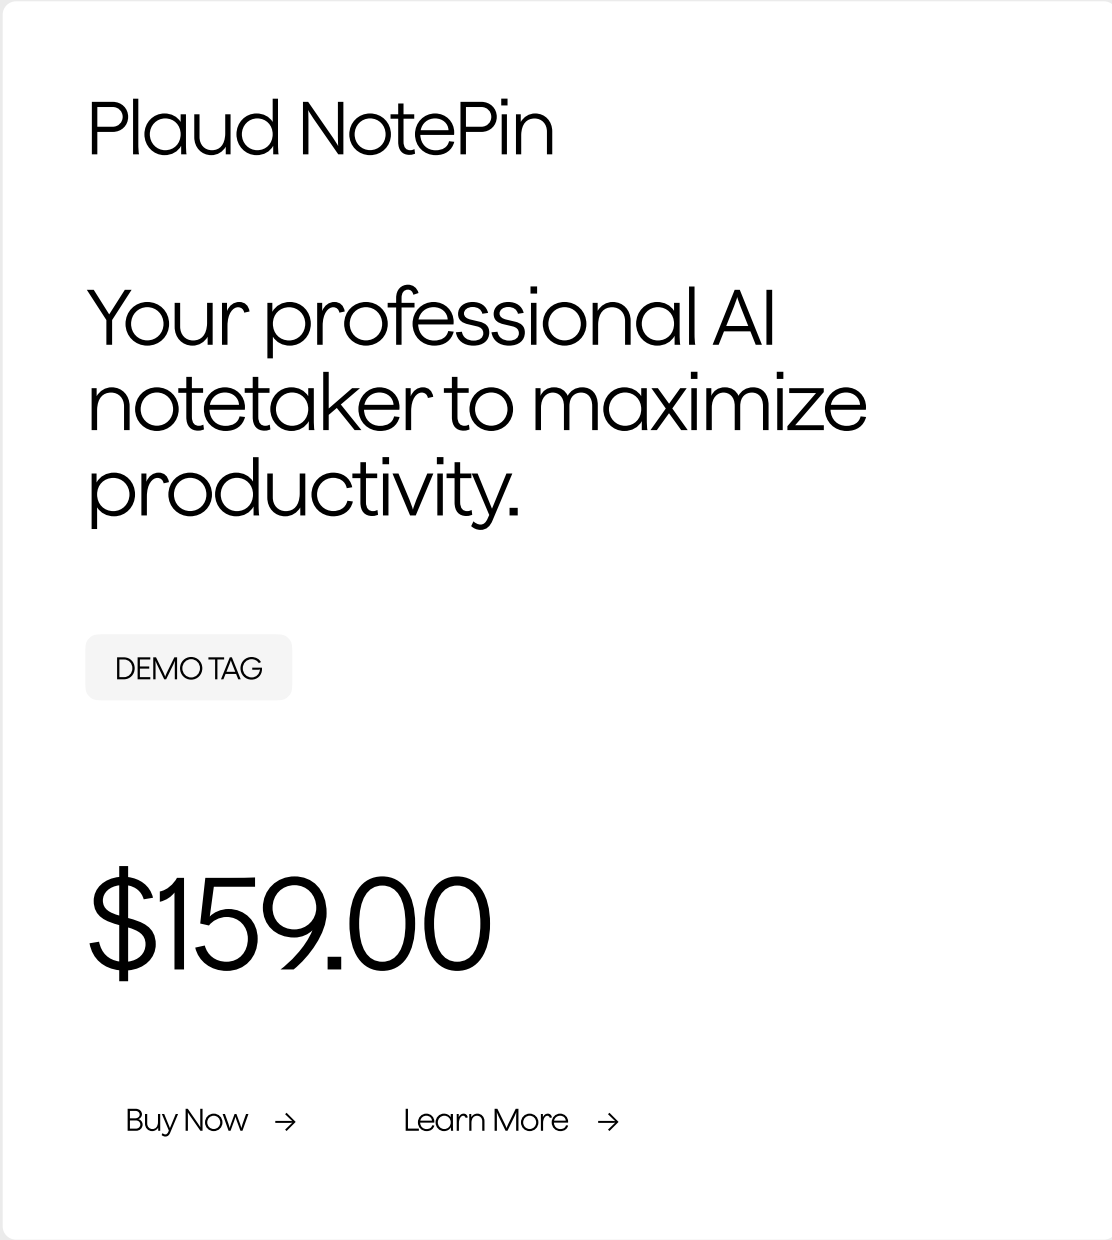

Icons

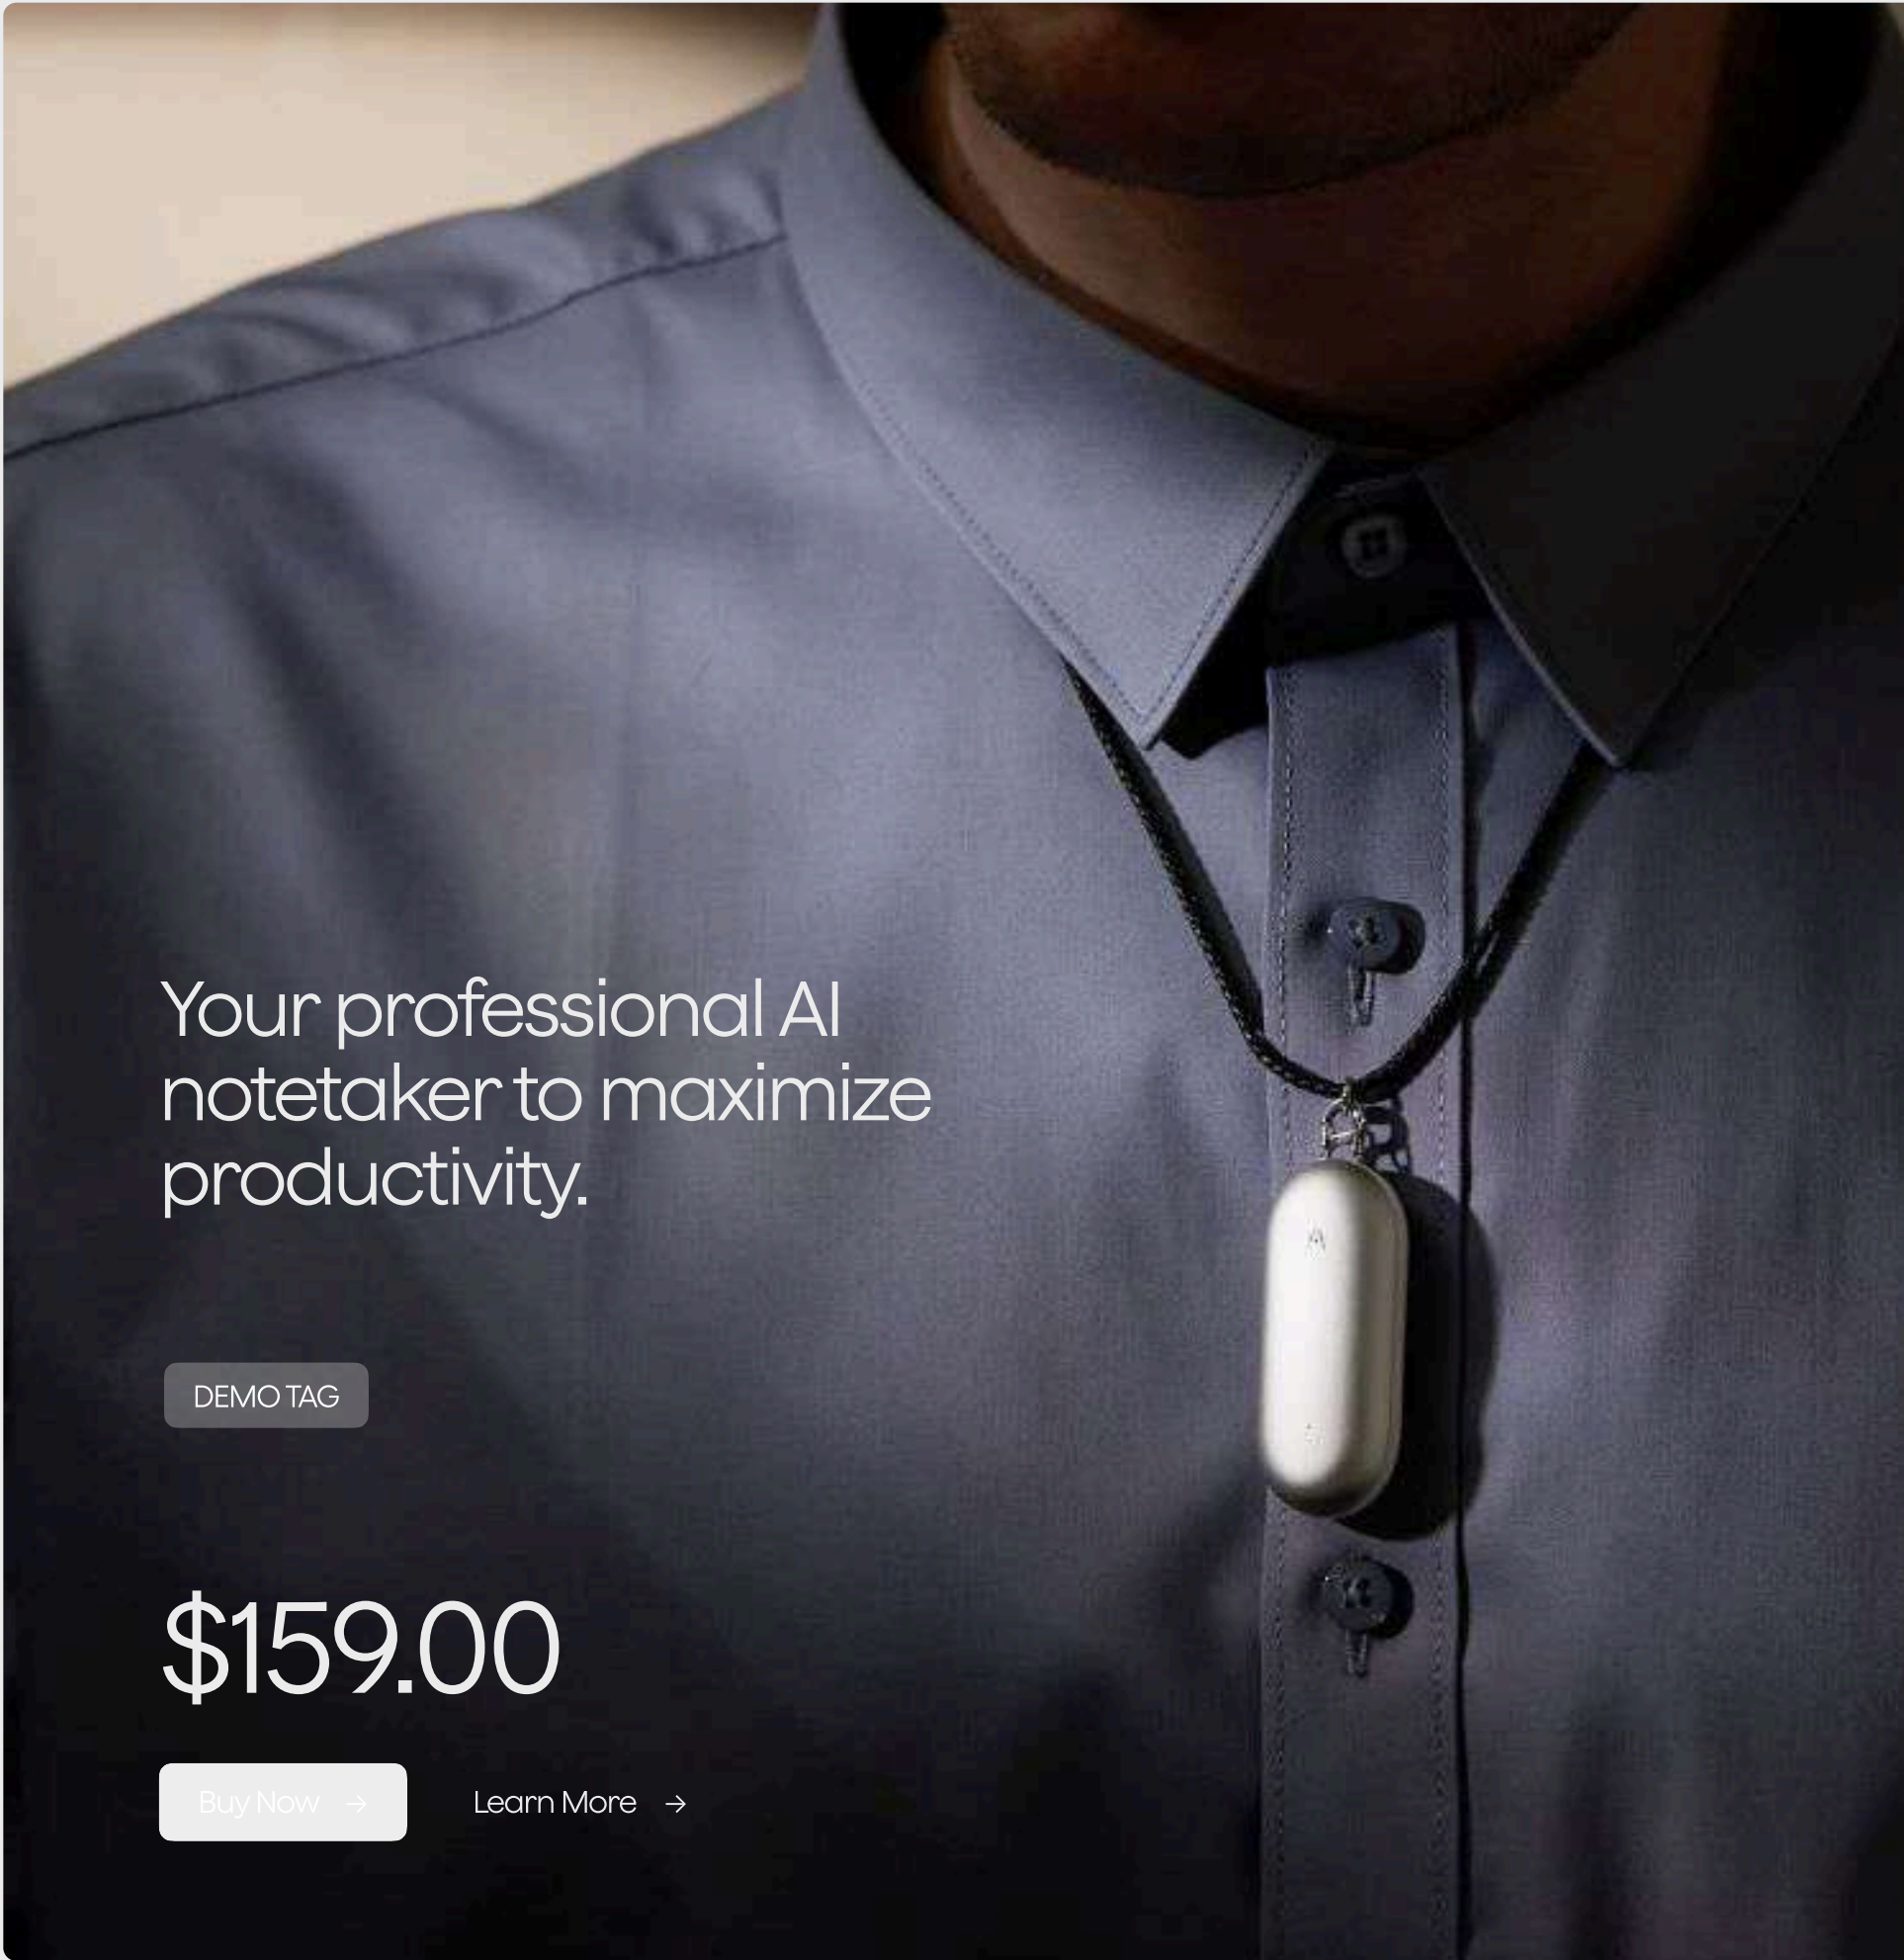

Buttons & Tags

Banners

Content boxes

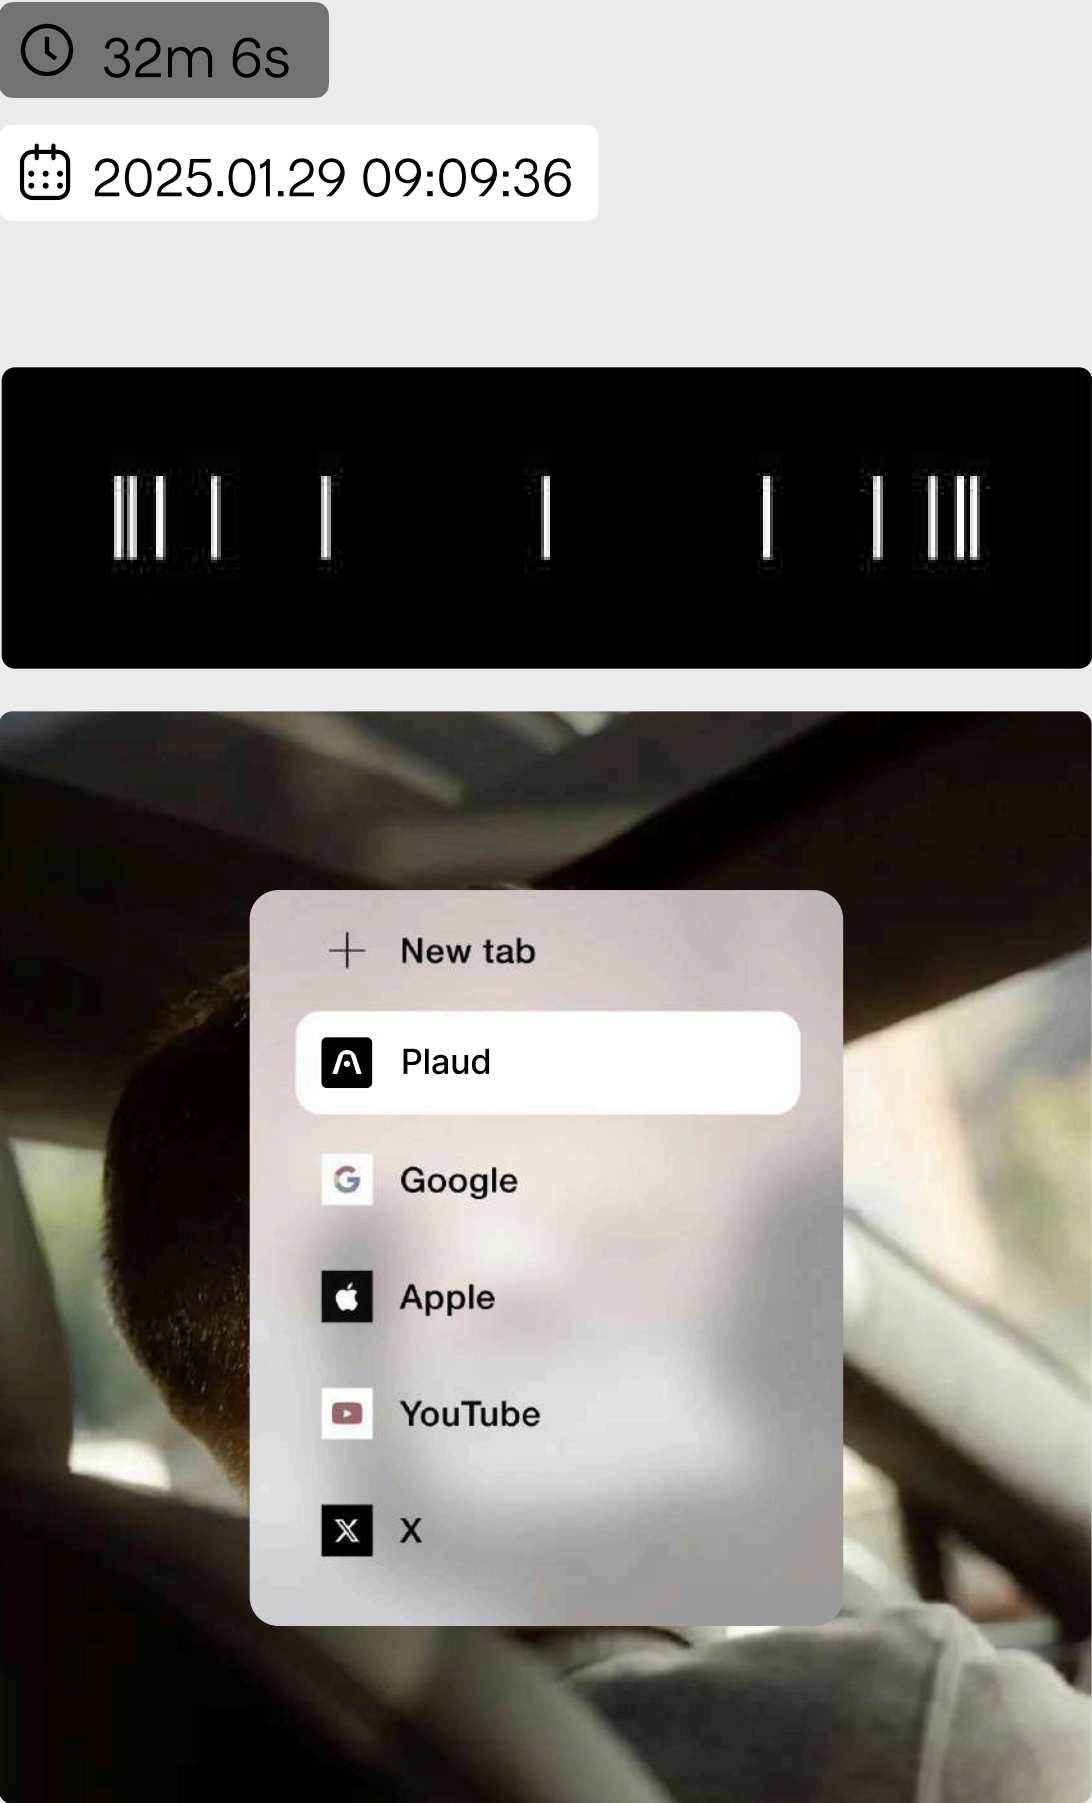

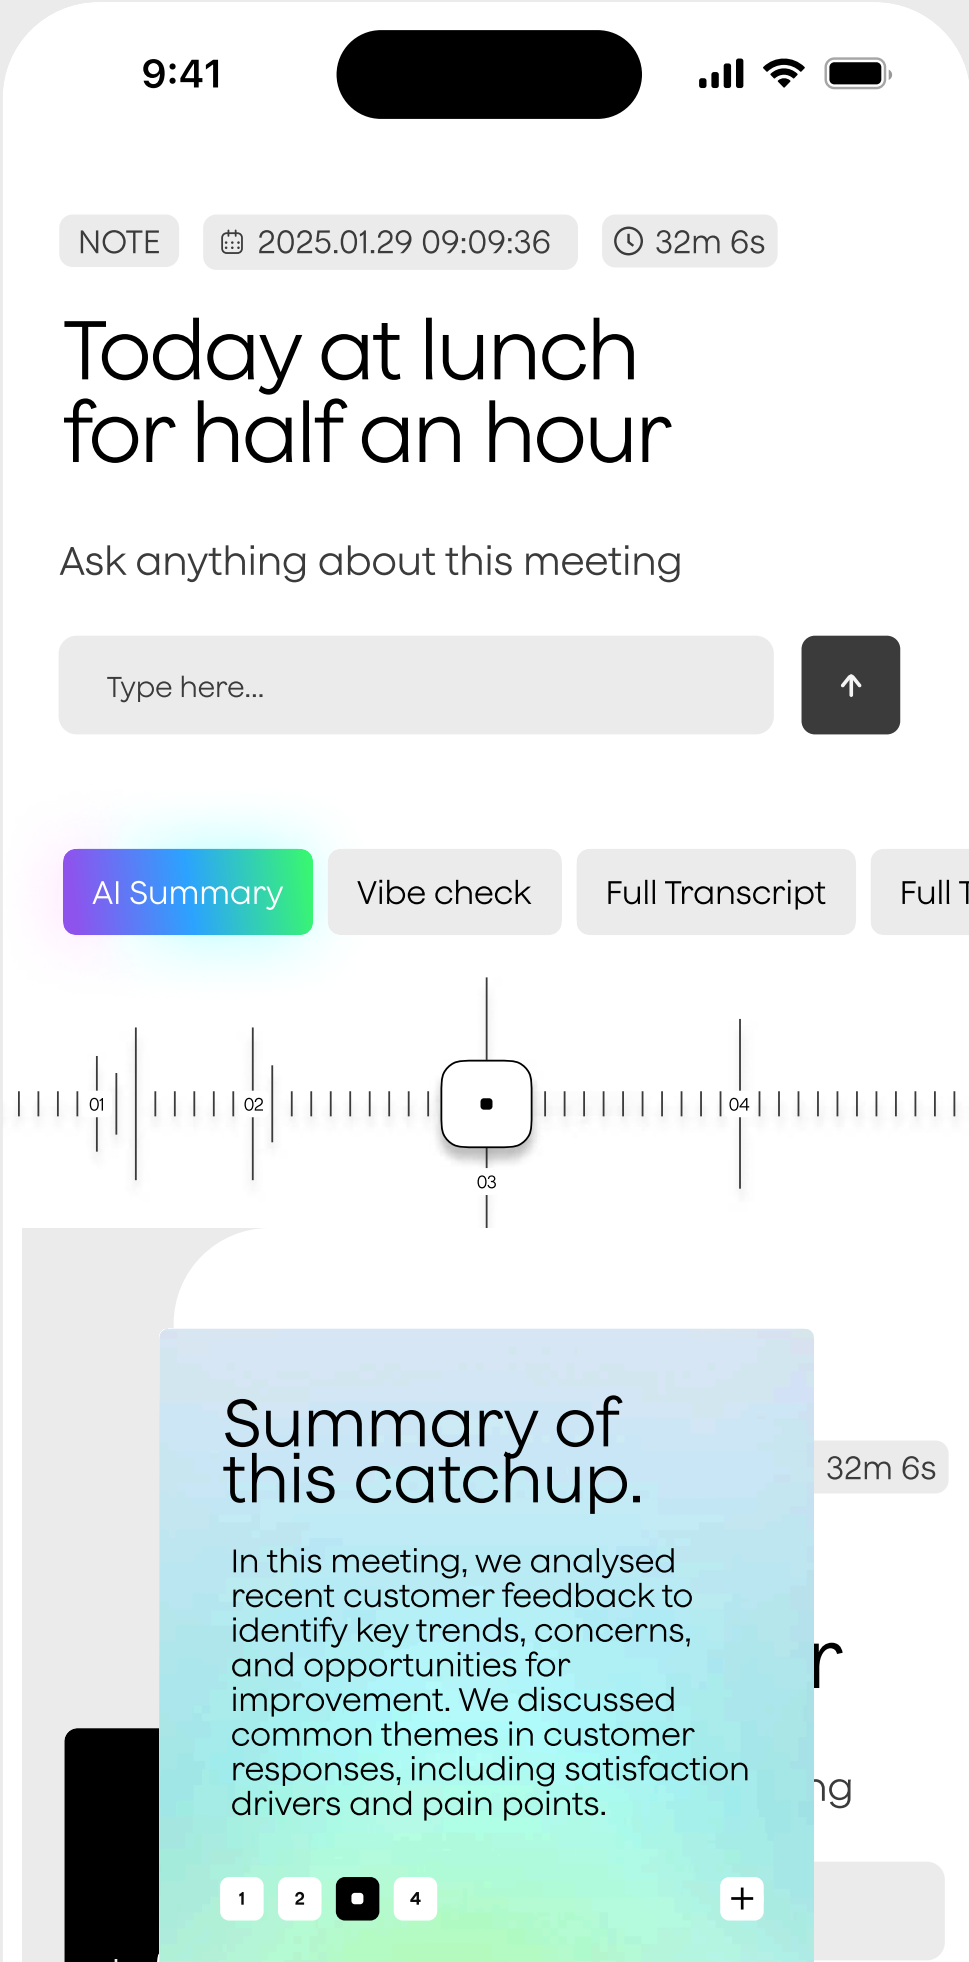

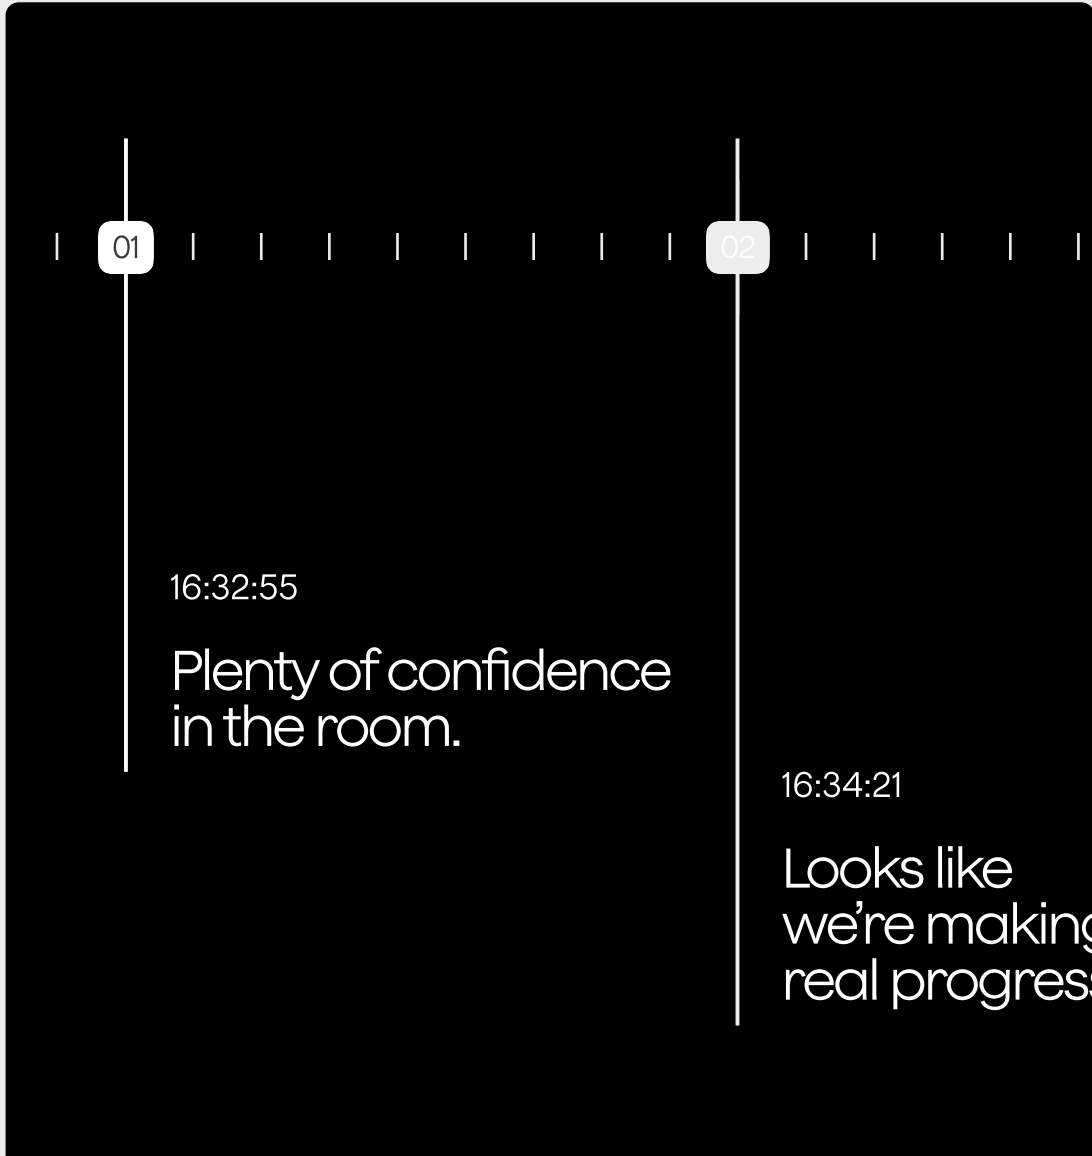

Images

UI & infographics

We use simple shapes like boxes, tags, lines and time stamps to create our infographics.

As a general rule, less is always more. Consider whitespace and type hierarchy to create simple compositions.

BRAND DESIGN

06

Layout template

BRAND DESIGN

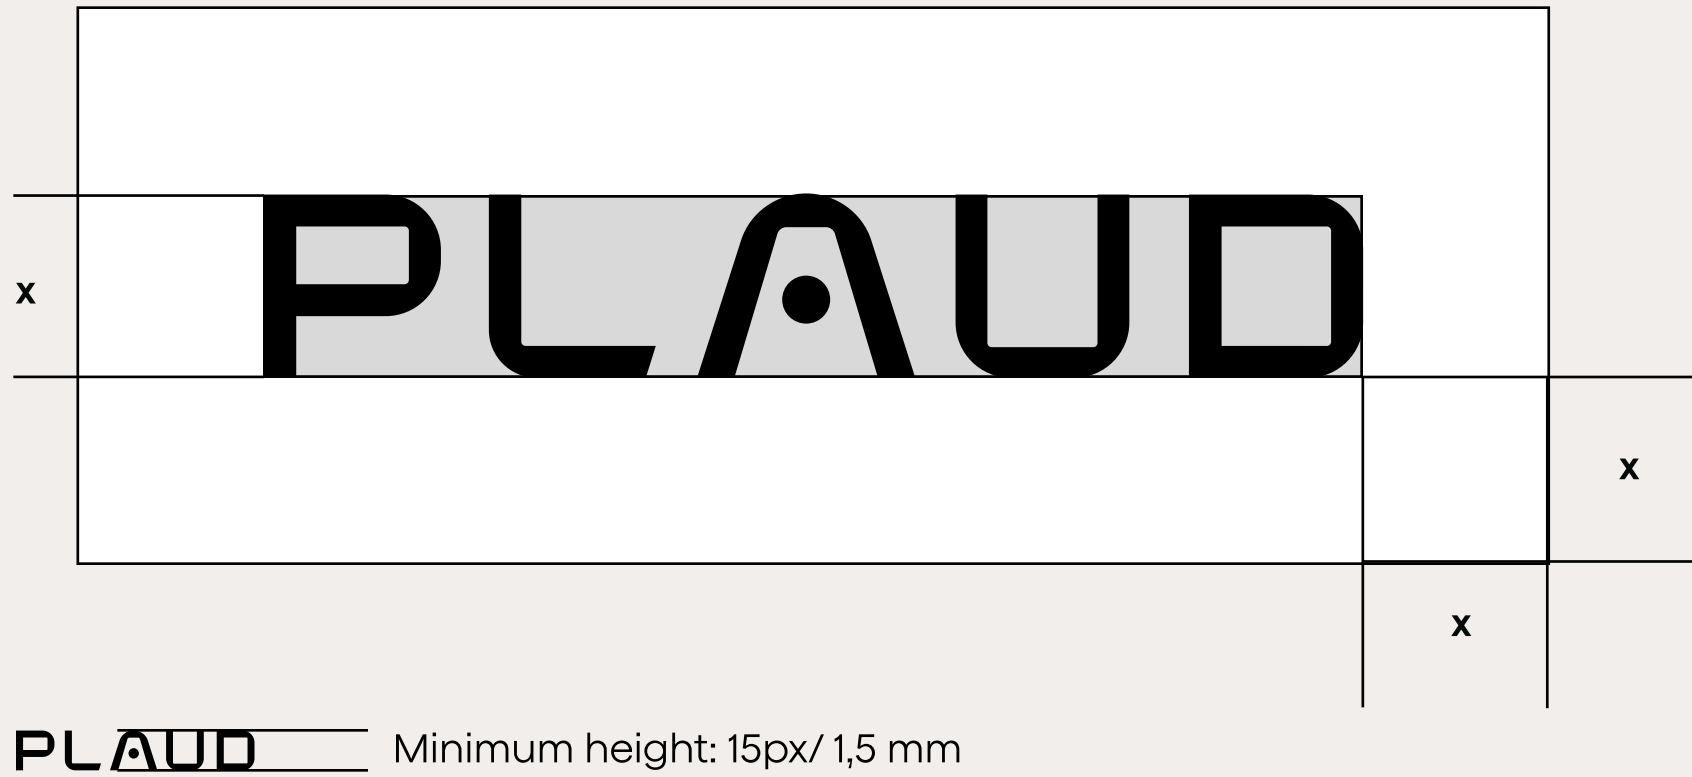

6.1

Graphic Template

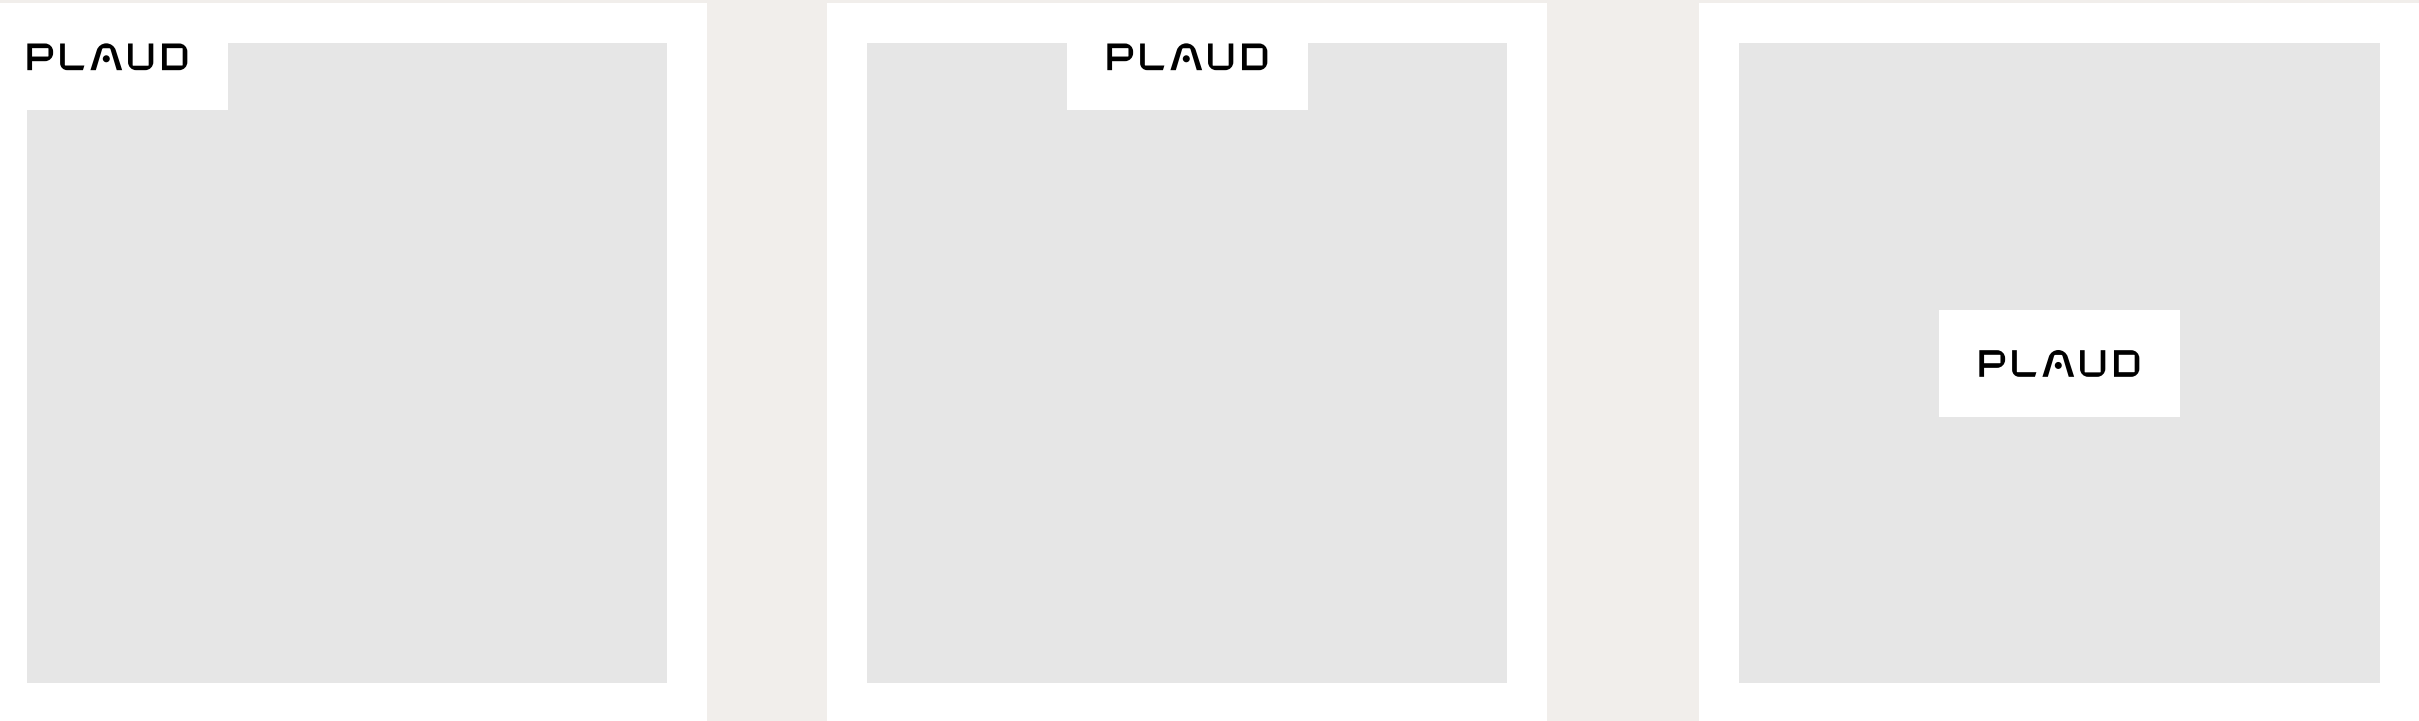

Platform Role

- Logo usage rules

The height of the graphic "X" is the logo's safe margin; no material should infringe upon the white inner area.

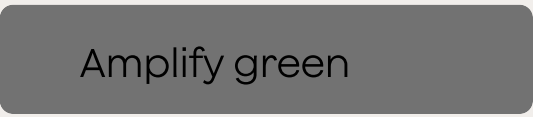

The placement of the logo follows these three options, with the top-left corner being the preferred position.

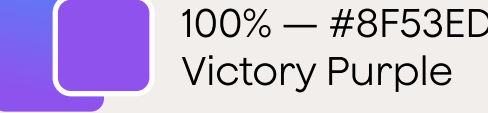

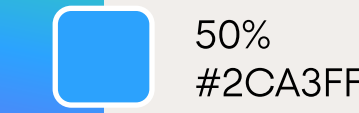

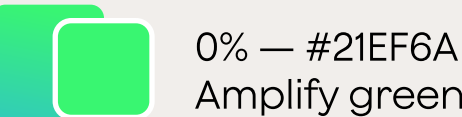

- Brand color hierarchy

With shooting scenes and product renders as the main focus, the overall tone should be neutral. Brand colors can be used as accents.

Buttons Timeline Markers UI Elements

AI Specific Buttons

Platform Role

- Typography system

Copy should have at most three levels. You may cut content, but not add any.(Headline / Body / Caption)

- CAPTION

Used for special events, such as when a new product is launched.

- HEADLINE

It is recommended that the title be limited to 5 words or less.

- BODY

Description of the text. It is recommended that the title be limited to 15 words or less.

NEW

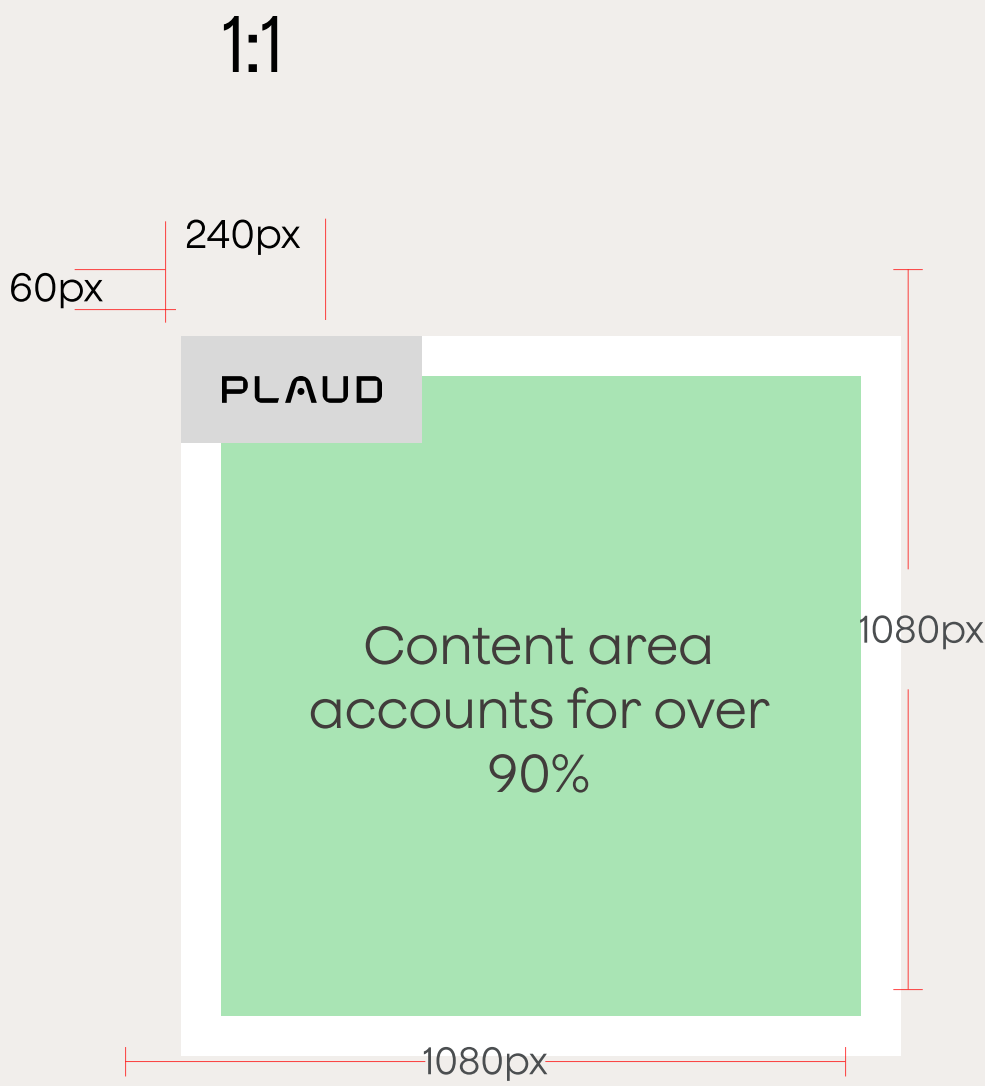

The world’s No.1

Capture, extract, and utilize conversation intelligence from what you say, hear, see, and think.

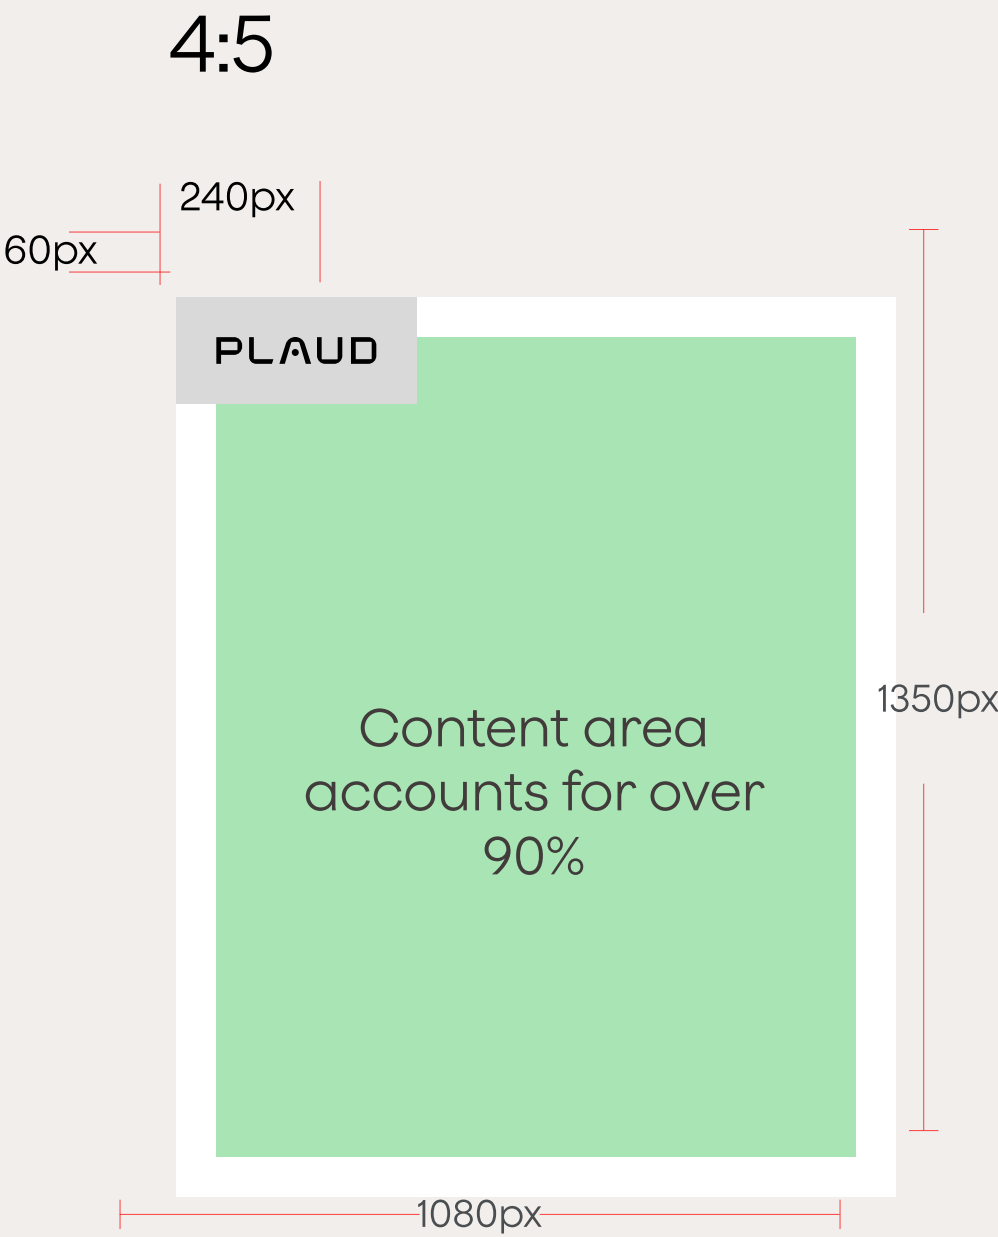

Common Design Ratios - Graphic

A high-level overview of key aspect ratios used across all platforms.
(Details are defined in individual platform sections.)

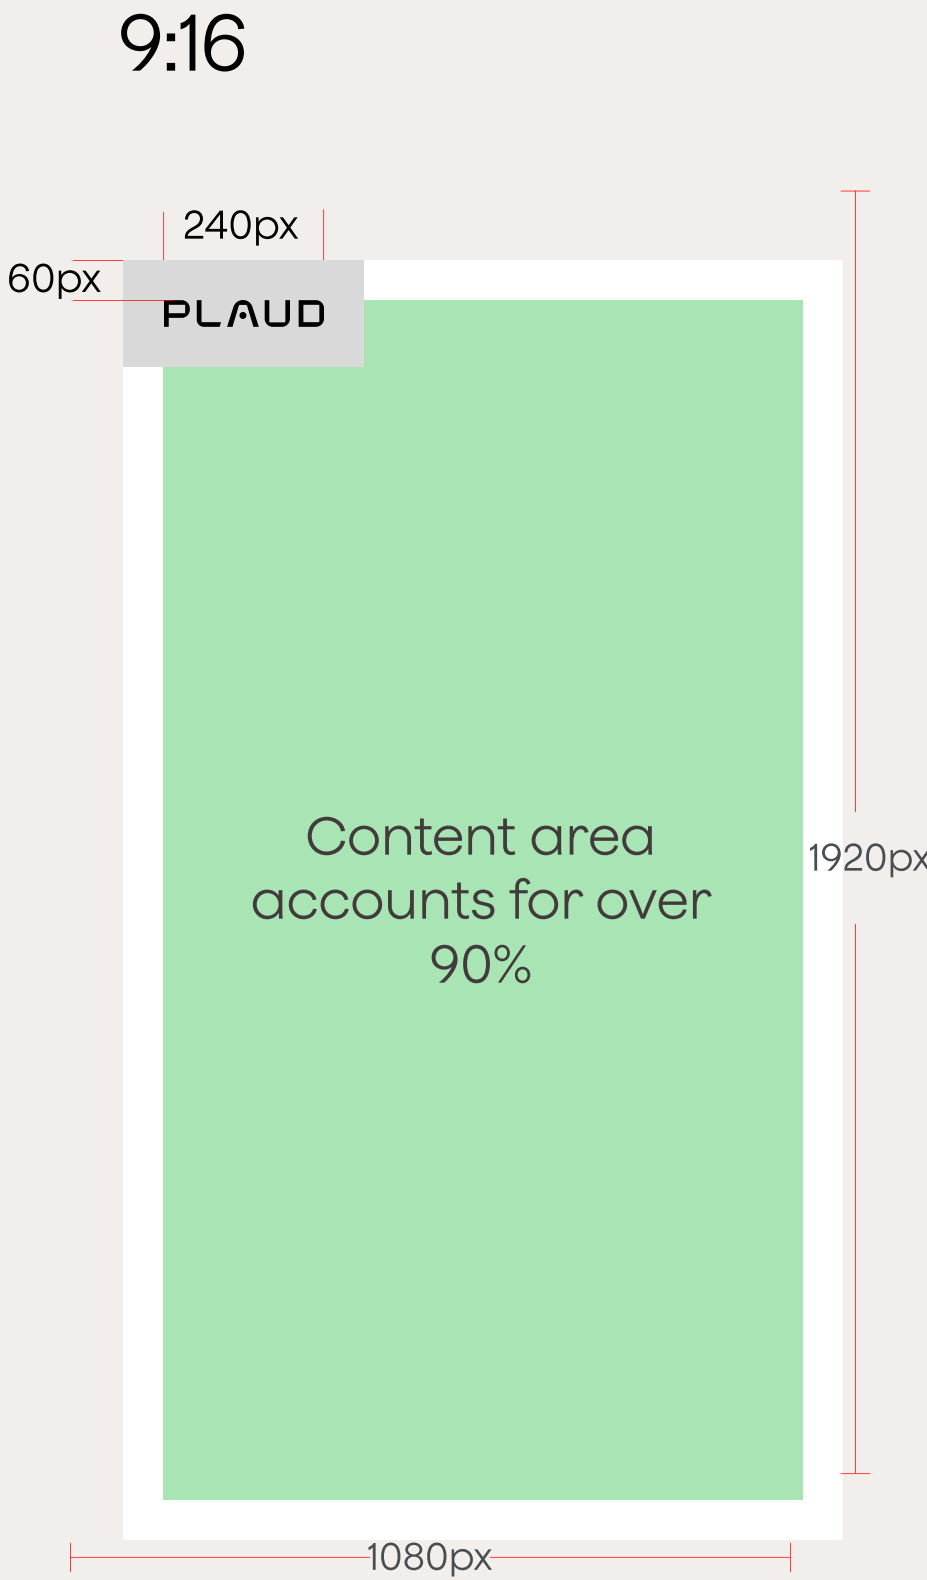

- 1:1
- 4:5
- 9:16
- 16:9
- 1.91:1

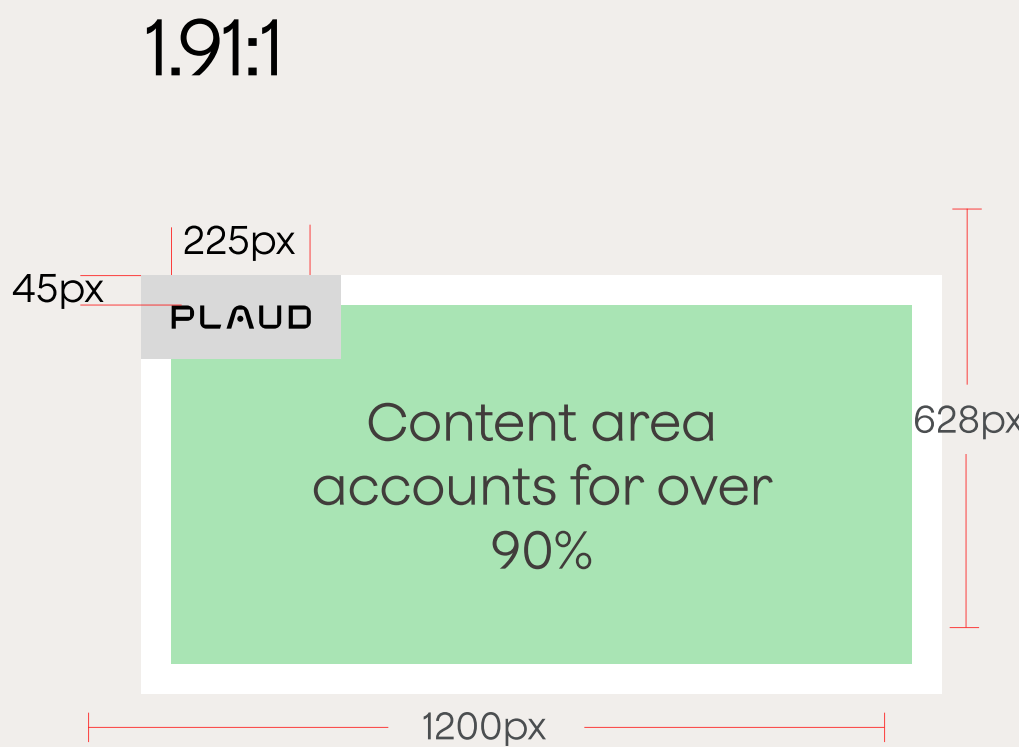

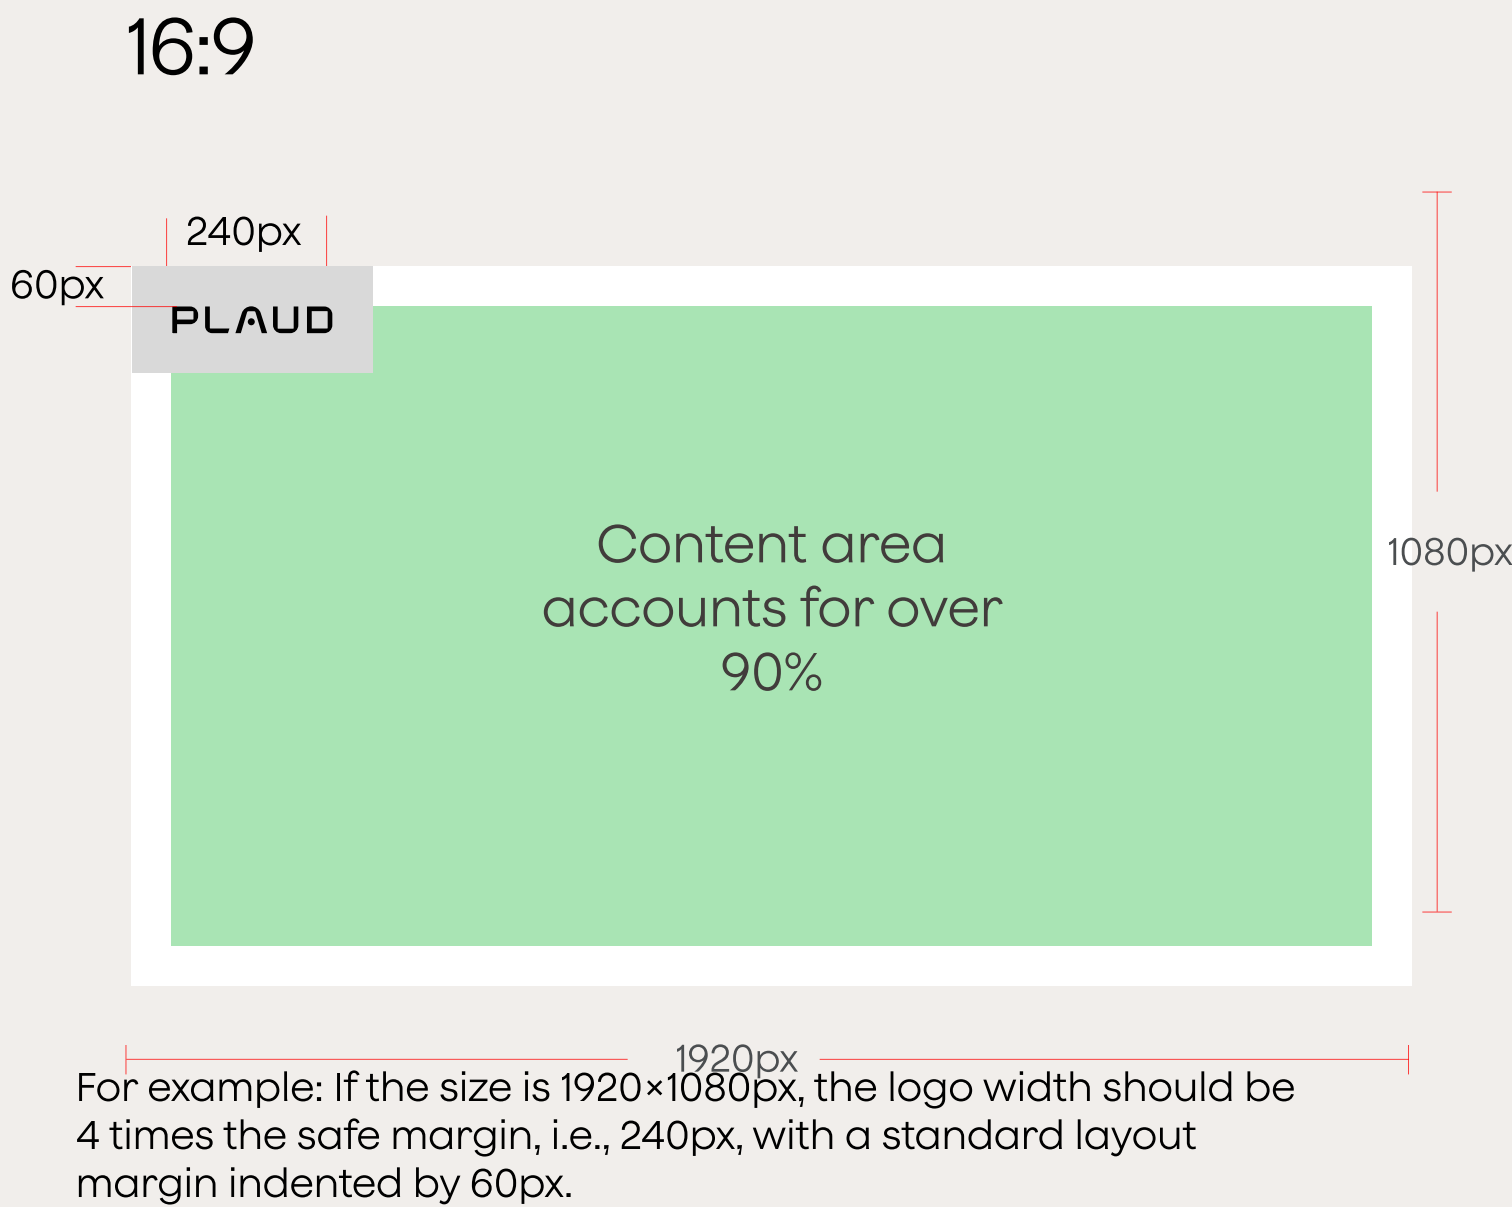

For example: If the size is 1080×1080px, the logo width should be 4 times the safe margin, i.e., 240px, with a standard layout margin indented by 60px.

For example: If the size is 1080×1350px, the logo width should be 4 times the safe margin, i.e., 240px, with a standard layout margin indented by 60px.

For example: If the size is 1080×1920px, the logo width should be 4 times the safe margin, i.e., 240px, with a standard layout margin indented by 60px.

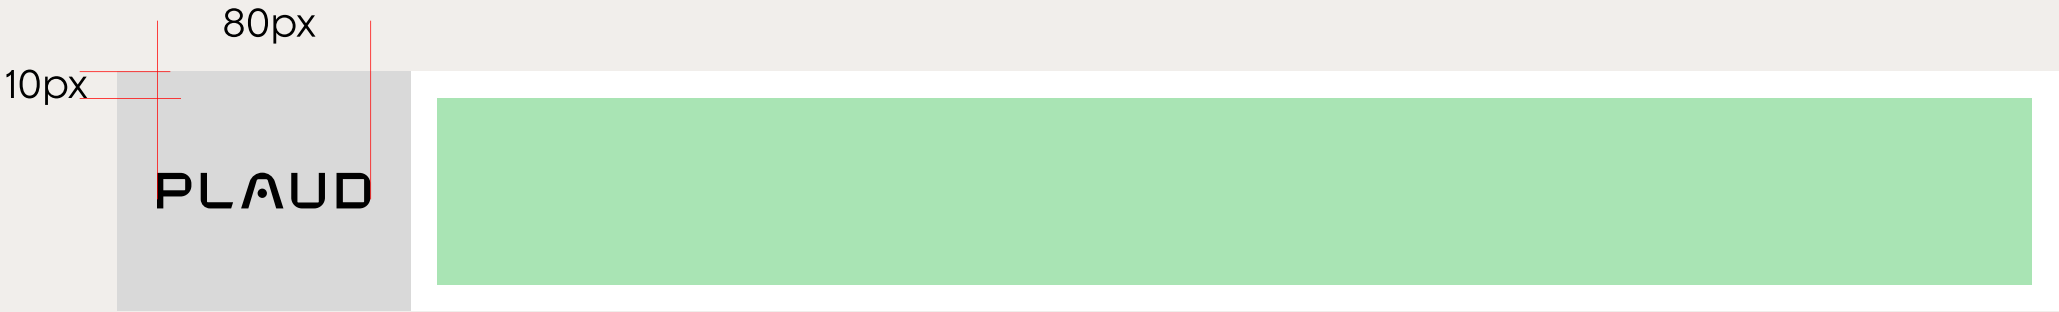

For example: If the size is 1200×628px, the logo width should be 5 times the safe margin, i.e., 225px, with a standard layout margin indented by 45px.

Common Design Ratios - Graphic

A high-level overview of key aspect ratios used across all platforms.
(Details are defined in individual platform sections.)

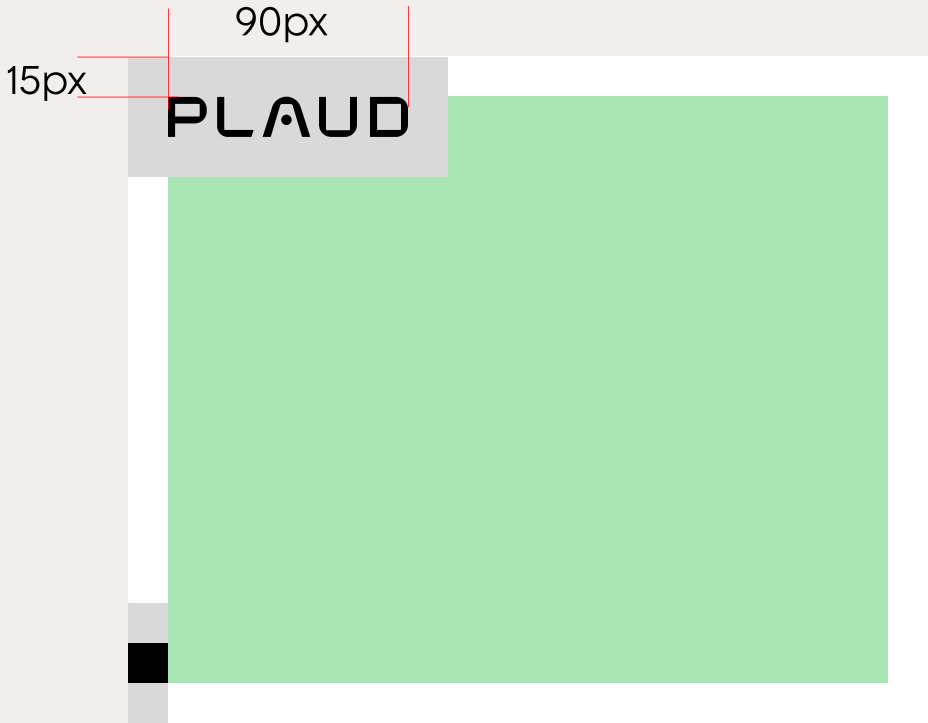

- 728x90
- 90x728
- 300x250

728x90

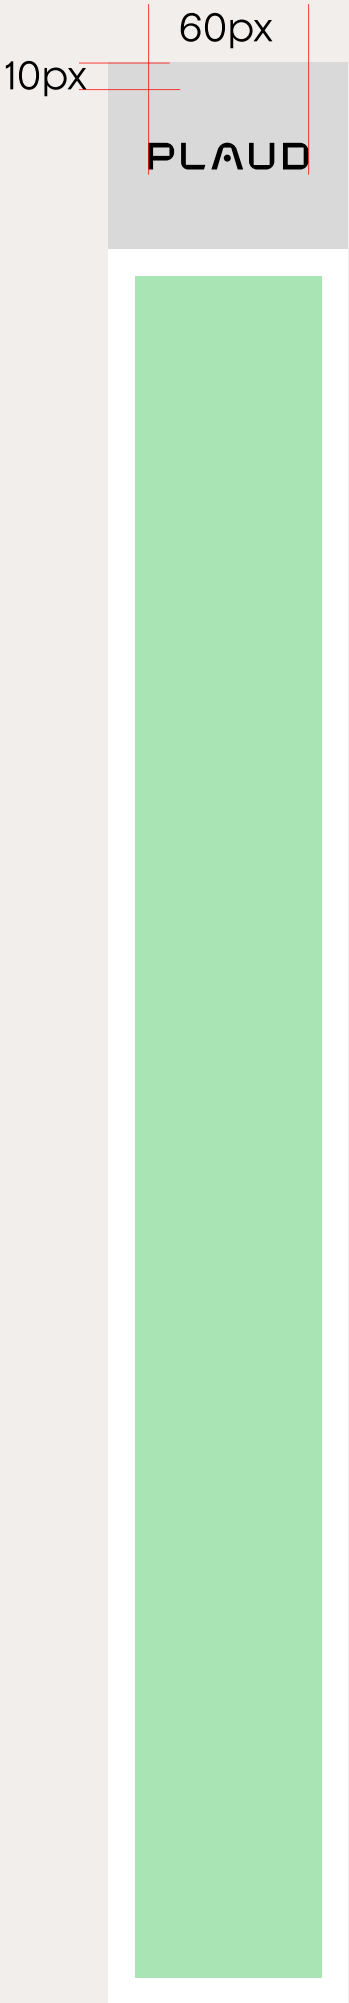

For example: If the size is 728×90px, the logo width should be 8 times the safe margin, i.e., 80px, with a standard layout margin indented by 10px.

300x250

For example: If the size is 300×250px, the logo width should be 6 times the safe margin, i.e., 90px, with a standard layout margin indented by 15px.

90x728

For example: If the size is 90×728px, the logo width should be 6 times the safe margin, i.e., 60px, with a standard layout margin indented by 10px.

BRAND DESIGN

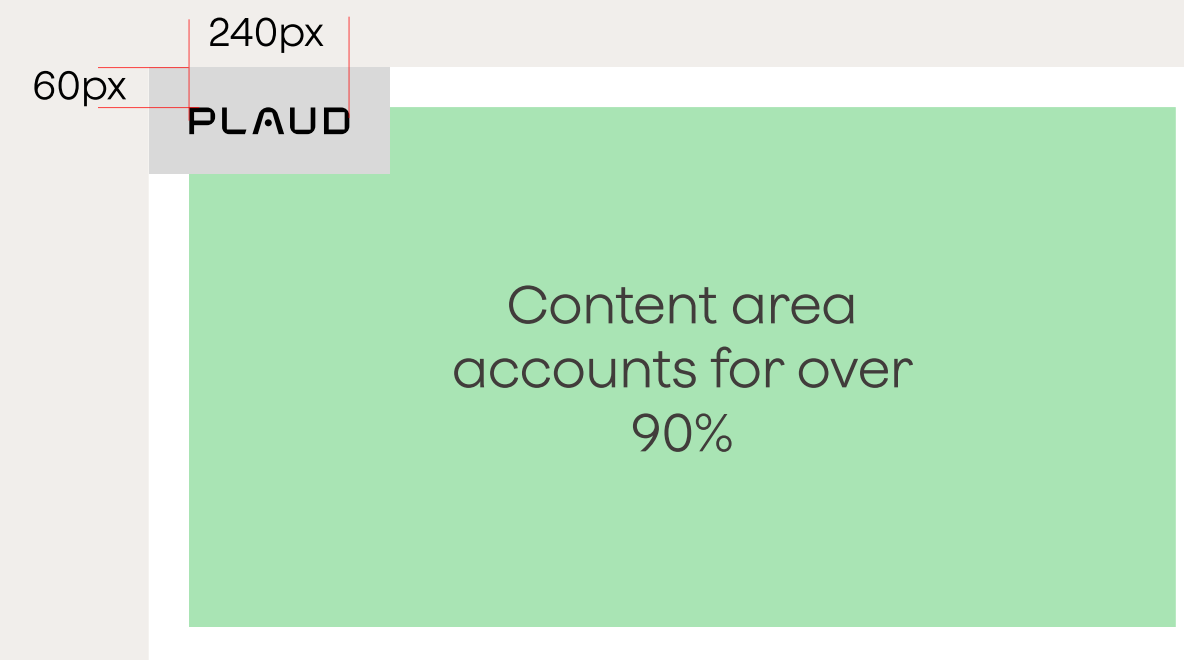

6.2

Video Template

Common Design Ratios - Video

- Youtube cover :
 - 16:9 (1600:900)

16:9 (1600×900)

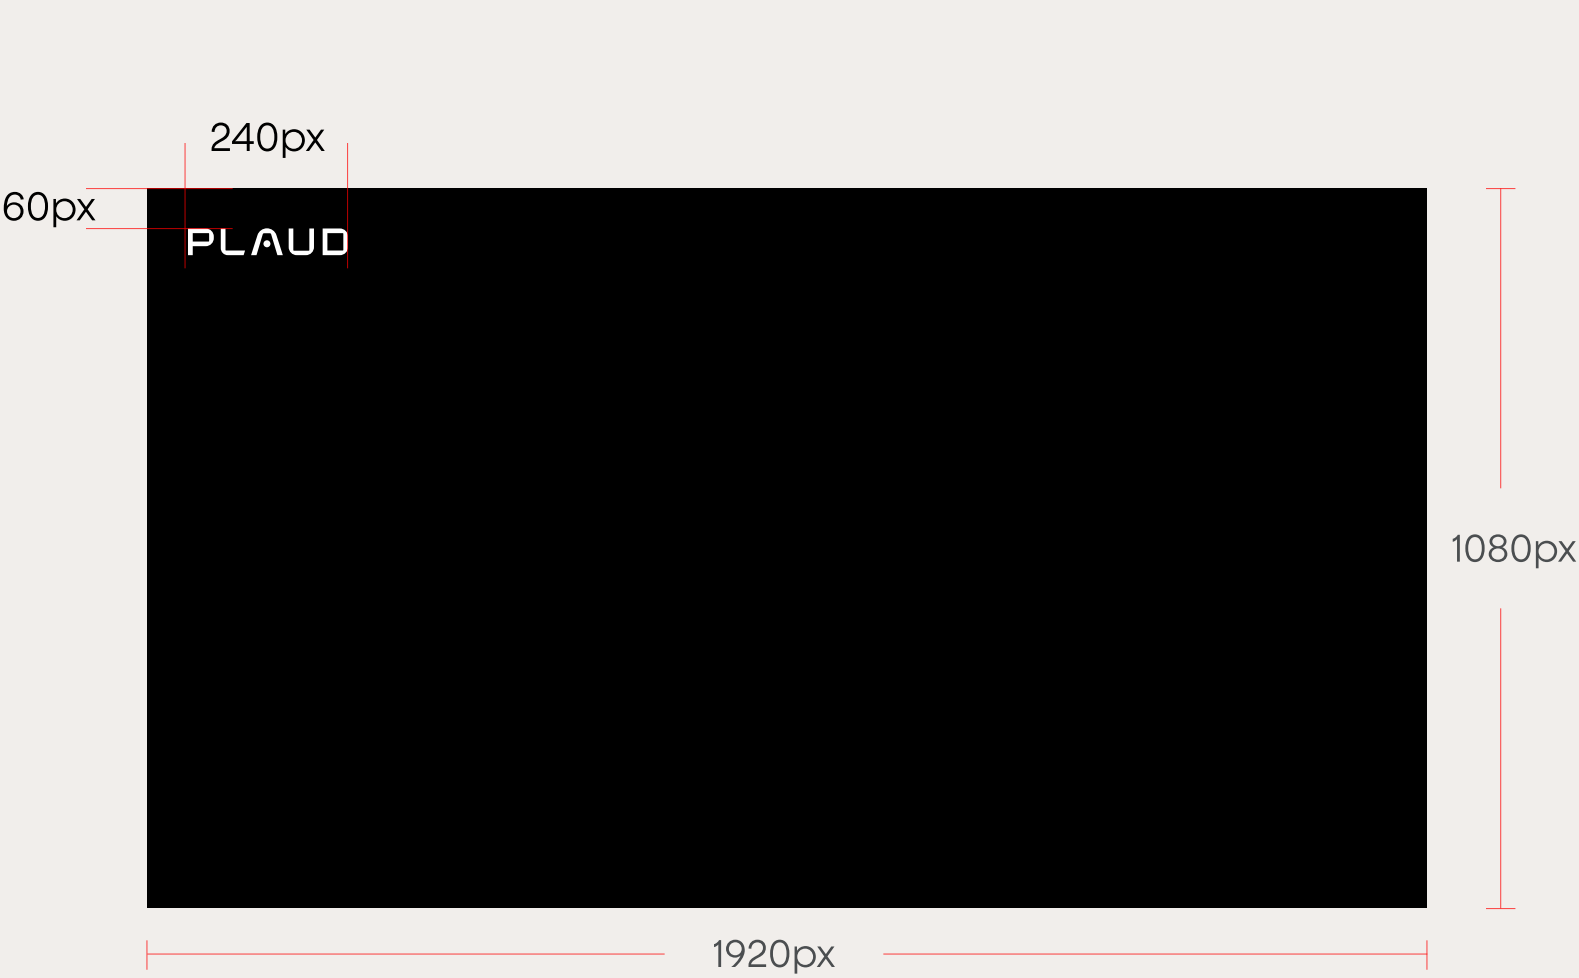

For example: If the size is 1600×900px, the logo width should be 4 times the safe margin, i.e., 240px, with a standard layout margin indented by 60px.

***The logo can only be placed in the top left corner.**

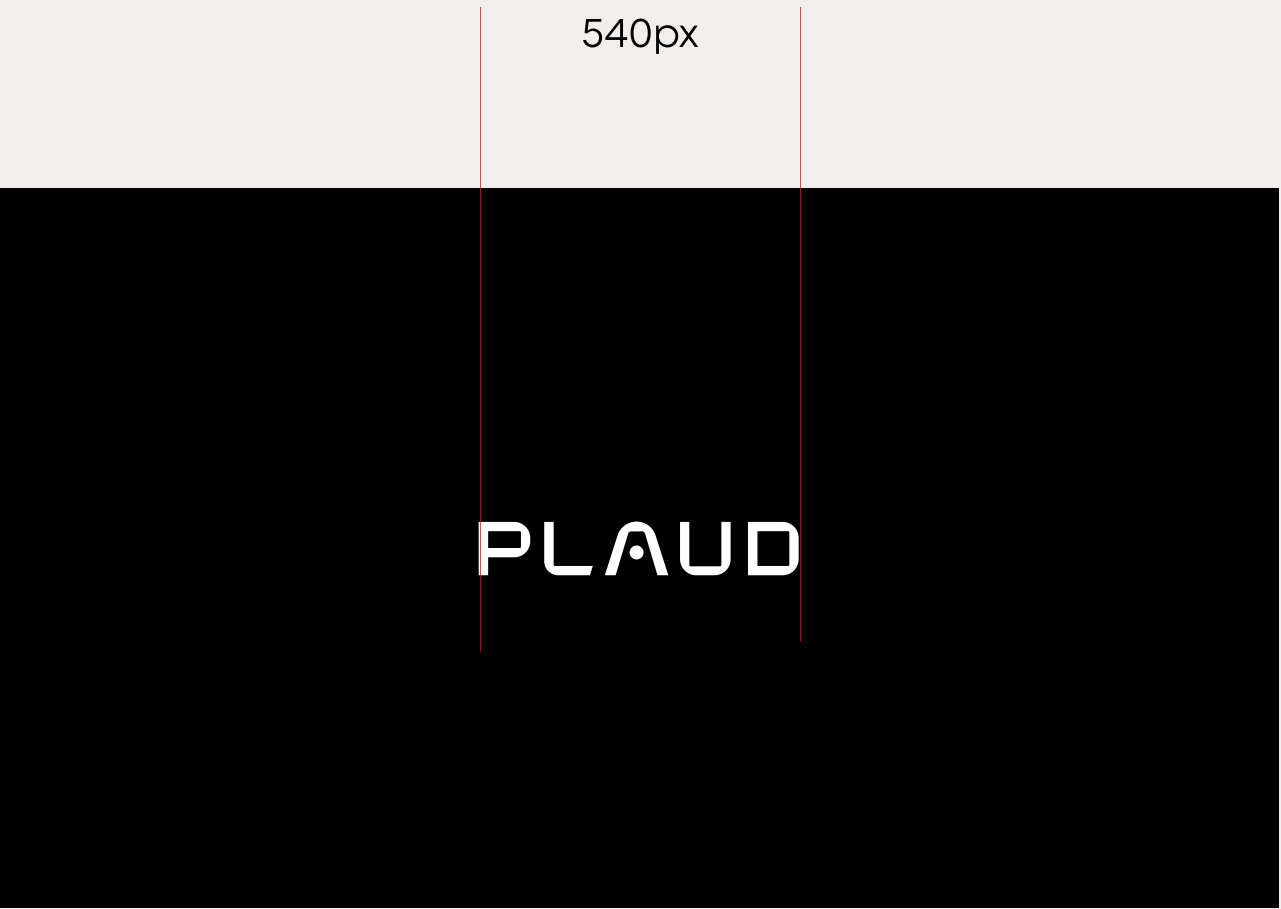

Common Design Ratios - Video

- Video/Thumbnail
 - 16:9
 - 9:16

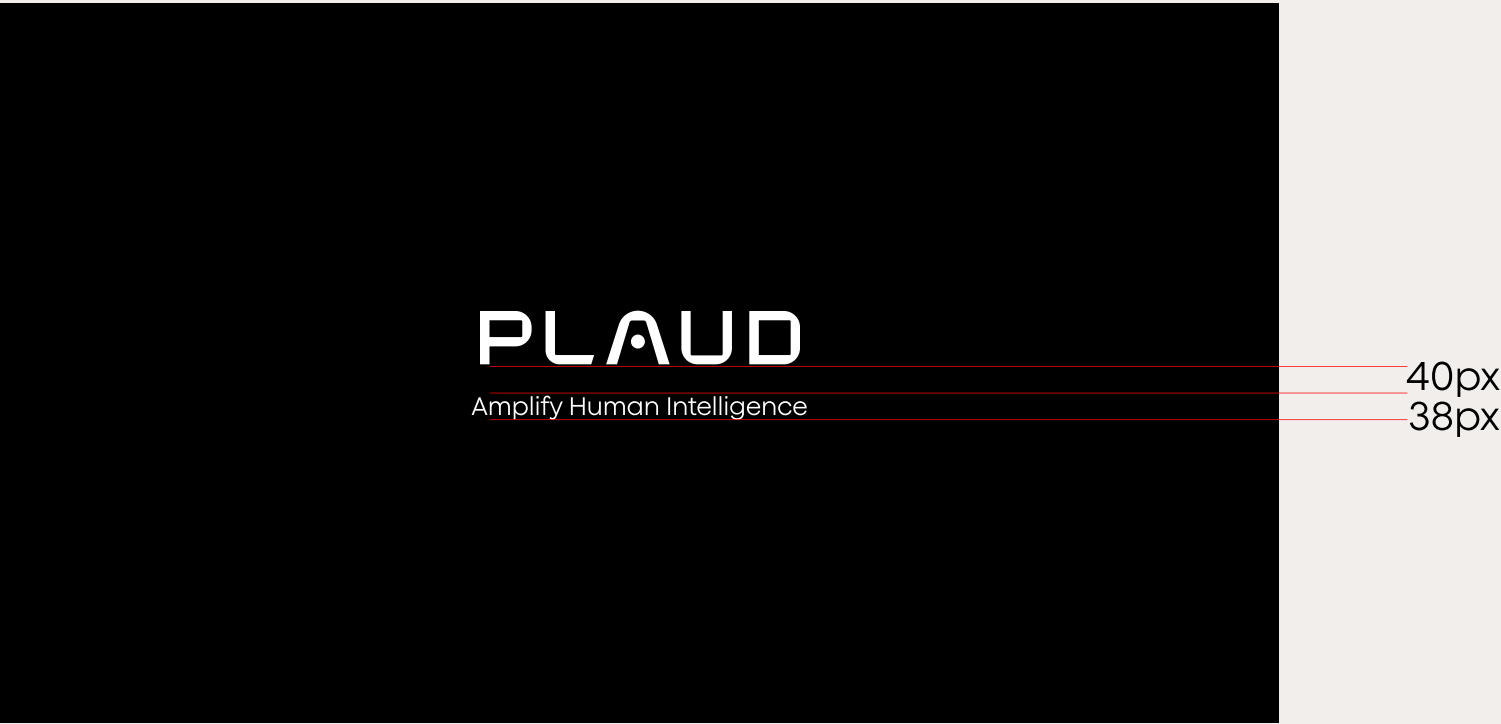

16:9 (1920×1080)

For example: If the size is 1920×1080px, the logo width should be 4 times the safe margin, i.e., 240px, with a standard layout margin indented by 60px. It is commonly used during video playback.

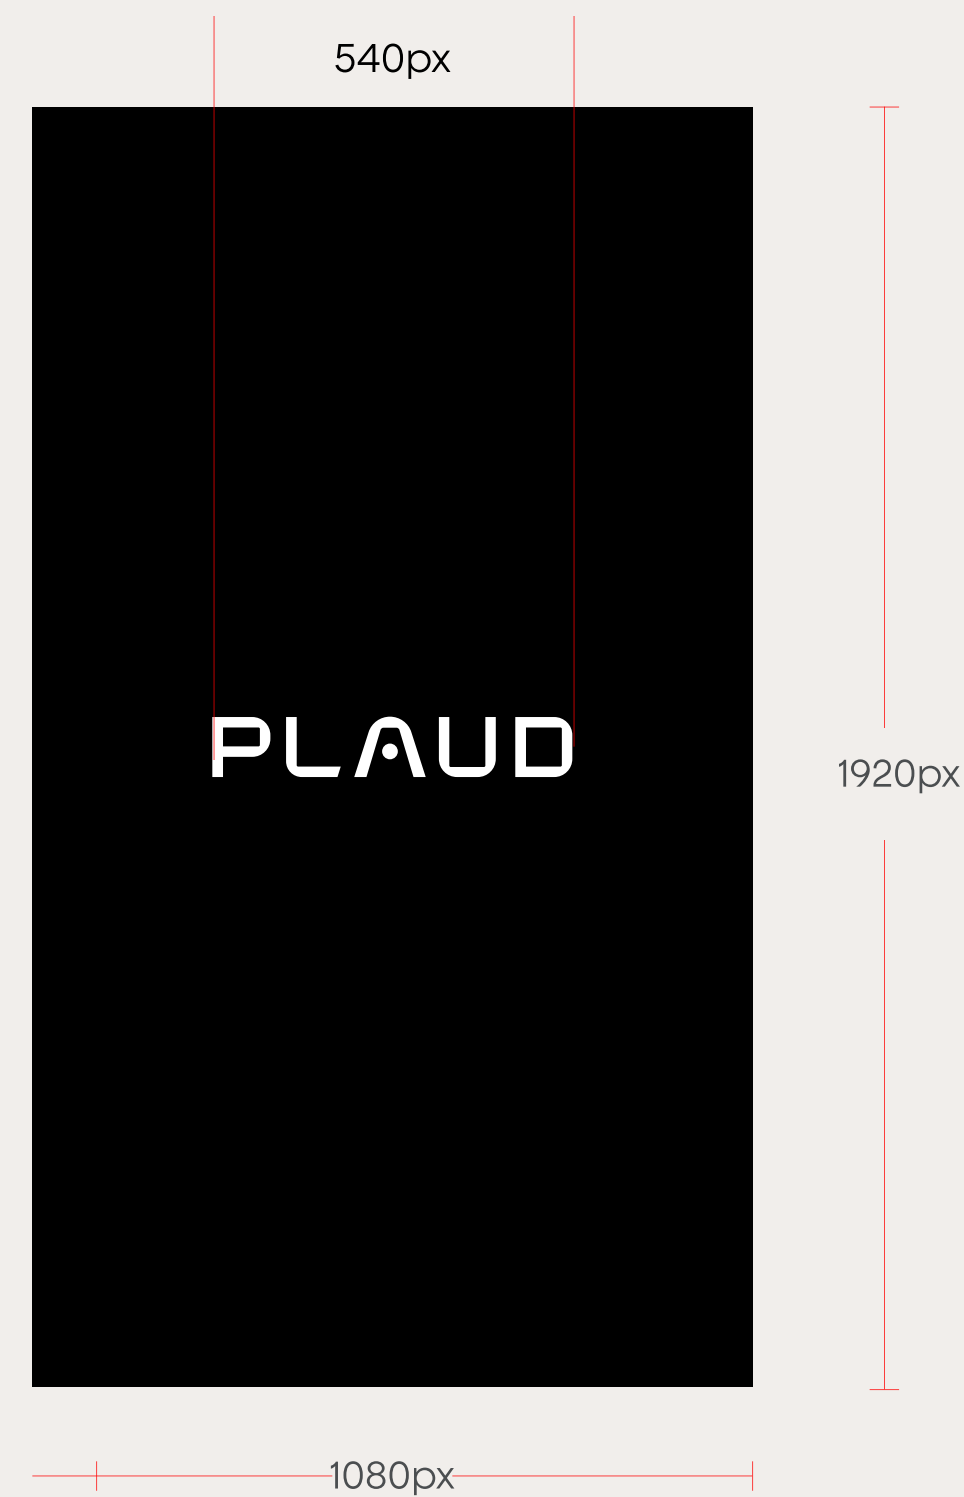

The width of the logo is a quarter of the video width. This format is commonly used in end-of-video displays and similar contexts.

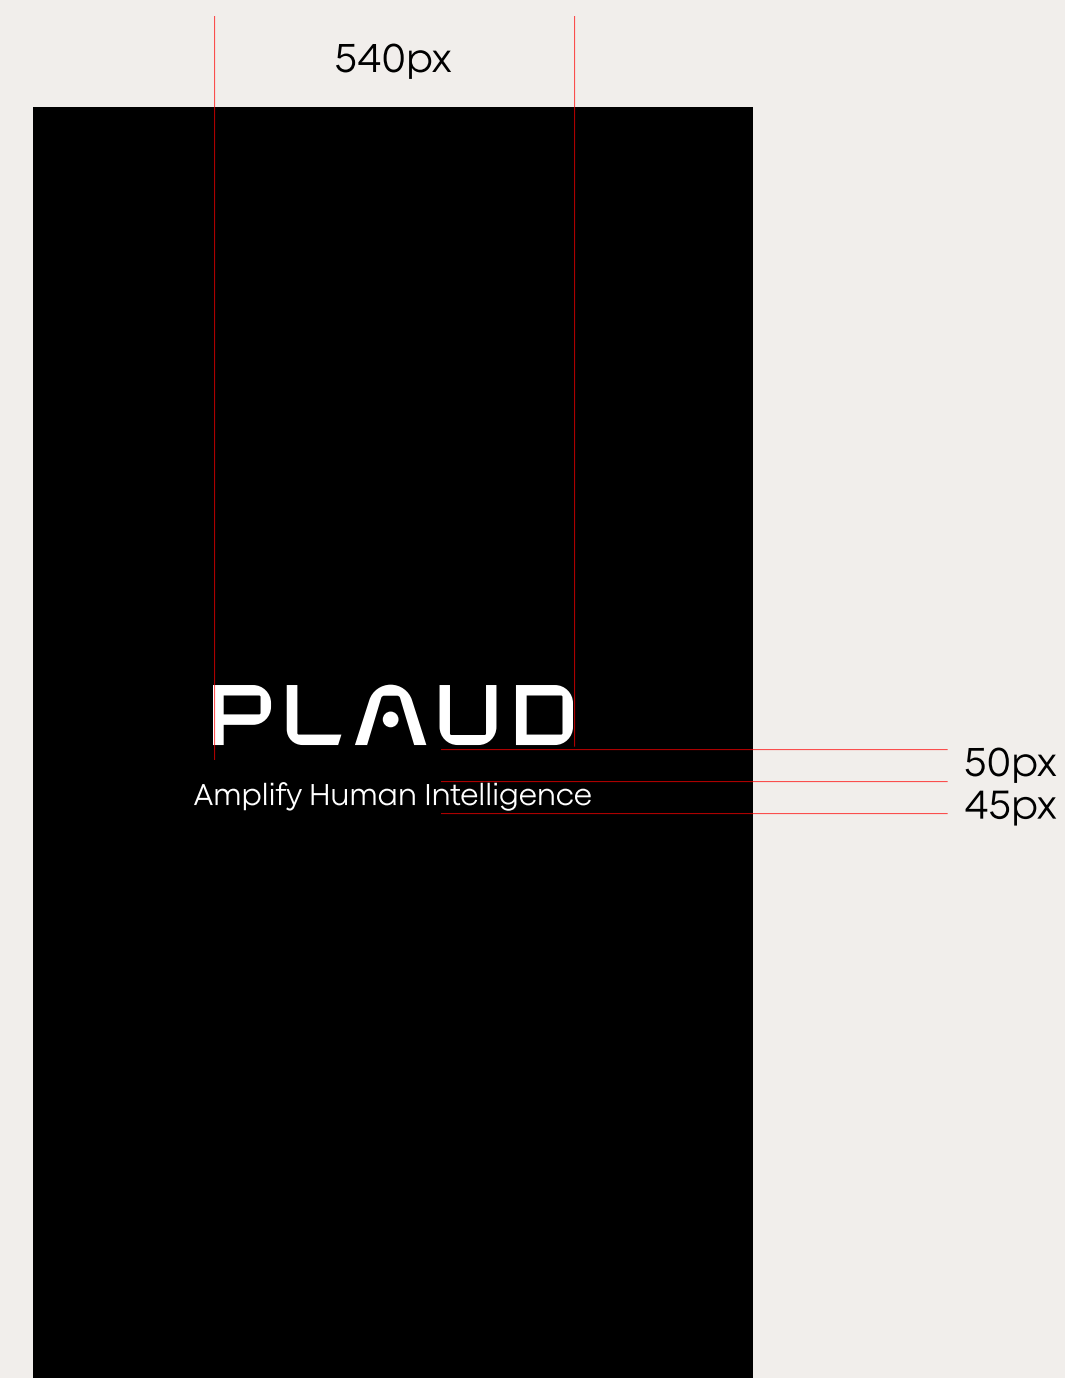

The text "Amplify Human Intelligence" has a Regular character weight of 38px, 100% line spacing, and 0% character spacing.

Common Design Ratios - Video

- Video/Thumbnail
 - 16:9
 - 9:16

The width of the logo is half of the video width. This format is often used for end-of-video displays and similar contexts.

The text "Amplify Human Intelligence" has a Regular character weight of 45px, 100% line spacing, and 0% character spacing.

BRAND DESIGN

Art direction

Real-life Interactions

Our Art direction captures what you hear, say and see.

The Amplify human intelligence concept is brought to life through collage-style visuals that mirror the Plaud experience. Plaud's products help users stay present and engaged. Our imagery reflects this by showing real, human interactions — focusing on different professional working environments.

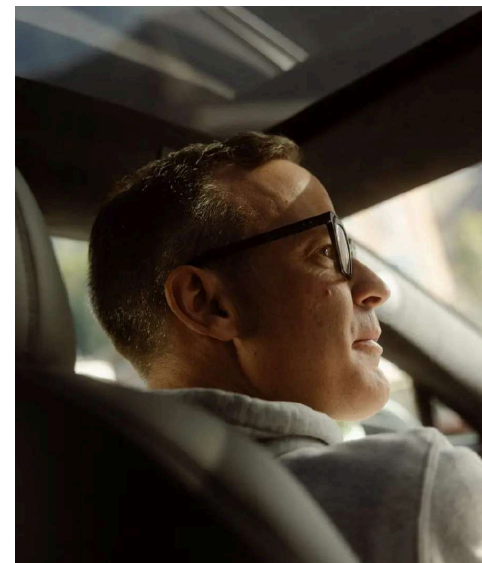

Our users— What we capture

We show our users in their professional work environment through unstaged photography. Using natural light and close crops, we ensure our photography feels genuine and human.

Sales people

Creative workers

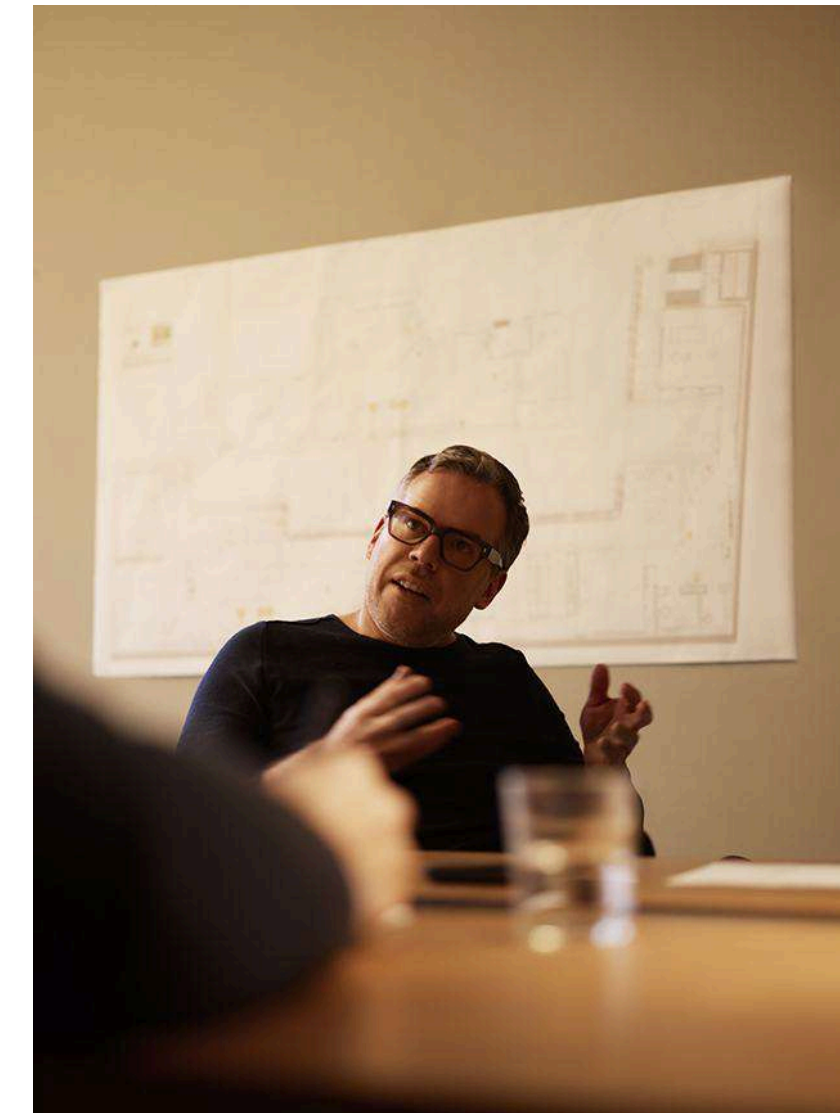

Digital nomads / Remote workers

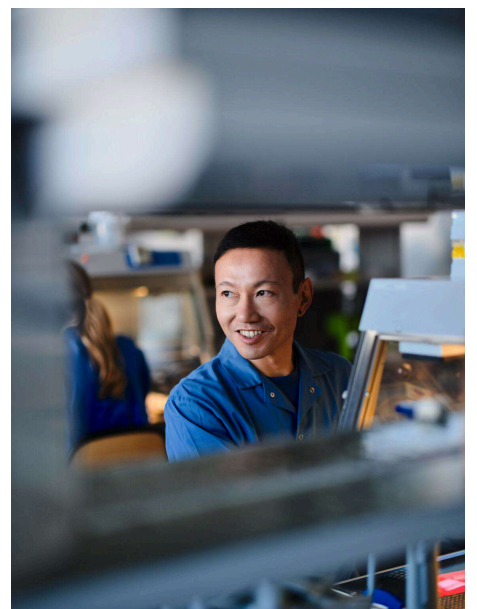

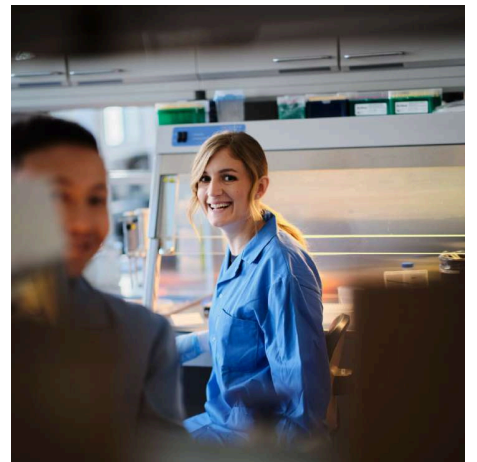

Educators

Healthcare professionals

Engineers / Technicians

Product experience— How we show it

We show the product experience using collage-style visuals of close-up textures and zoomed-in details, mixed with shots of real people in professional environments — capturing genuine conversations and interactions.

How to build these collages:

- Use maximum 4 images
- Images should be clustered so it's clear they belong together
- Use a variety of close-ups and wider shots
- A background gradient holds the collage together
- Background gradients should compliment the tonality of imagery. Choose from 4 background gradients in the color section

Example 1

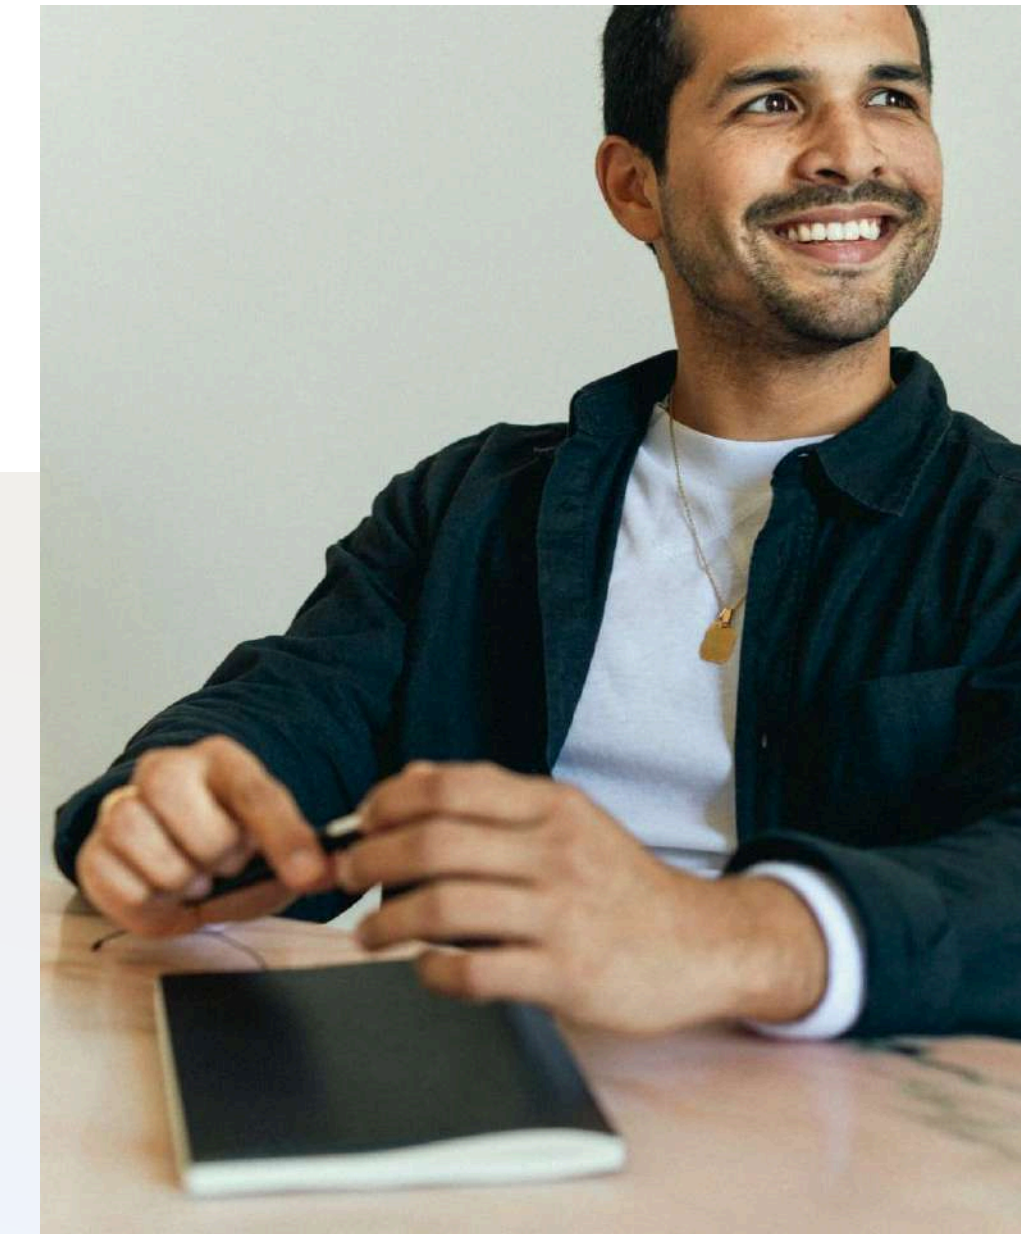

Product experience— How we show it

We show the Product experience using collage-style visuals of close-up textures and zoomed-in details, mixed with shots of real people in professional environments — capturing genuine conversations, interactions and emotions.

How to build these collages:

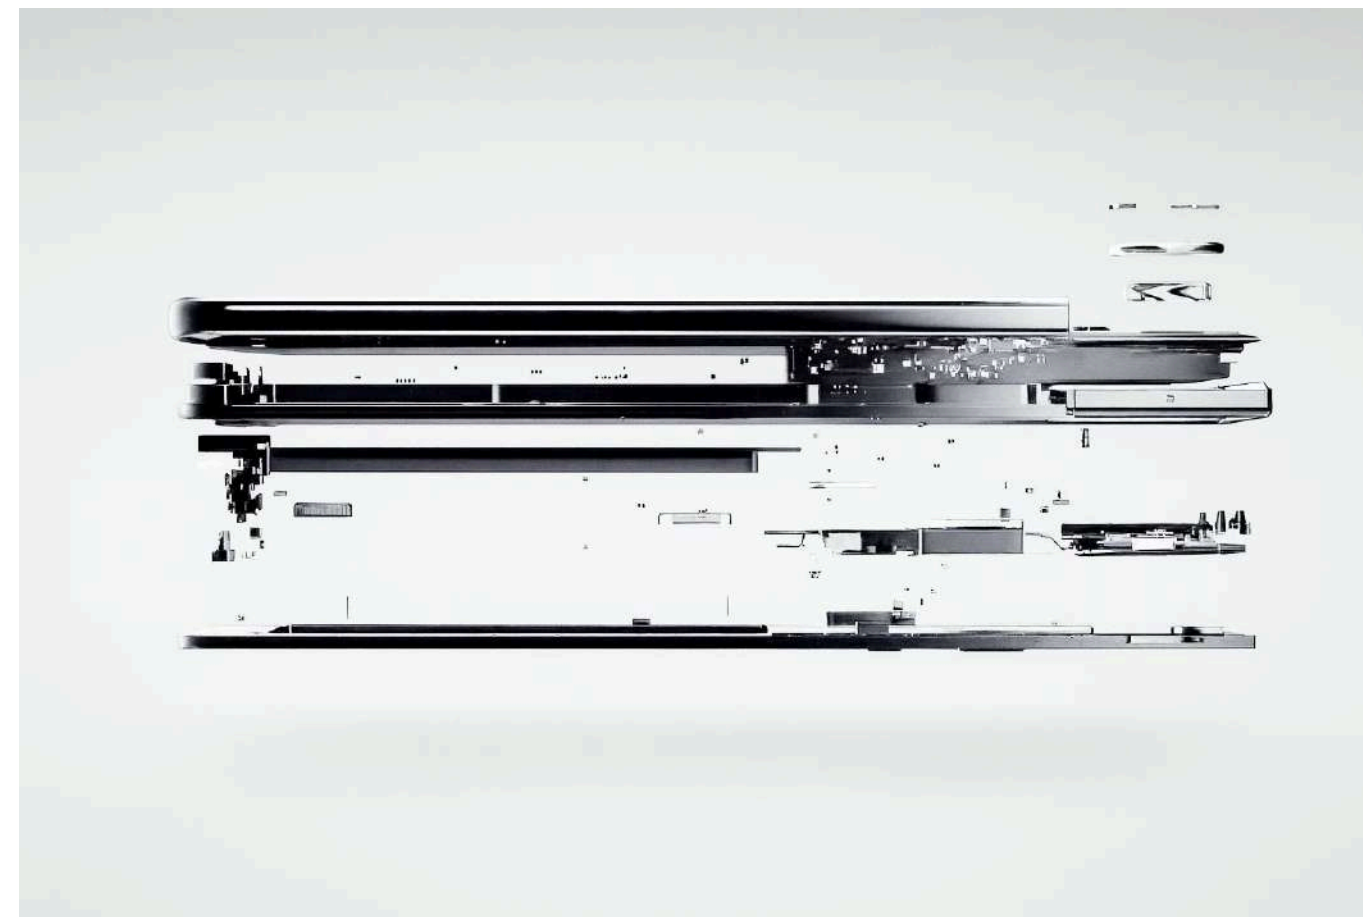

- Use maximum 4 images
- Images should be clustered so it's clear they belong together
- Use a variety of close-ups and wider shots
- A background gradient holds the collage together
- Background gradients should compliment the tonality of imagery. Choose from 4 background gradients in the color section

Example 2

Product visuals

Product visuals are inspired by the visible light spectrum, incorporating subtle color accents. They feature clean, minimal compositions with a blend of realistic 3D renders coming into focus to highlight sharp product details.
